SPINNING & WEAVING.

JOHN GEORGE BAXTER,

OFFERS for SALE his, "Improved Patent Family Machine," with six Spindles, for spinning Flax or Hemp Yarn, from six dozen cuts in the pound, to six pounds in the dozen.

The simplicity of the construction of this Machine is such, that competent judges* have delared it as "little likely to go out of order or require repair as any machine they have seen."

Another important advantage of this simplicity of construction is, that Yarn of any fineness may be spun on it by any person having strength and skill sufficient to turn a Coffee Mill or a Grinding Stone.

Its superiority over the ordinary family modes of Spinning is not however confined to the advantages of not requiring repair, or of being capable of being worked by any unskilled hand, but principally in the *quantity of work* which it is able to execute. This fact is incontrovertibly established by the deposition of *Charlotte Mills*, aged 13 years who has sworn "that on the 7th day of this month between the hours of 7 o'clock in the morning and 9 in the evening, she spun nine dozen of Flax Yarn, on six spindles, for coarse cloth."

The Machines will all be warranted. The price SIXTY DOLLARS, payable on the delivery of the Machine.

J. G. Baxter, makes Six Spindle Machines on the same principle for Spinning Cotton and Wool.

J. G. B. also makes LOOMS on an improved plan with harness, steel reeds and fly shuttles for weaving Linen or Hempen cloth of any fineness. Some idea of the superiority of these Looms may be formed on a knowledge of the fact that on one of them "Helen Elliott, did actually weave six pieces of Cotton Bagging, containing between three hundred and sixty and seventy yards in the course of one week."†

Those who contemplate the establishment of Baxter's Machinery for Spinning and Weaving shall have his good offices toward procuring them a woman from his own Manufactory well acquainted with the business.

An experience of 30 years in the manufacturing of Flax and Hemp and a considerable experience in Cotton, enables J. G. Baxter confidently to offer his services for the erection of any machinery connected with those articles, from one to any number of Spindles and to be worked by any known power.

The Machinery may be seen at work, and its principles explained at the Spinning and Weaving Manufactory, Blockley township, Philadelphia county, at which place, at the counting-house of Mr. *Henry Orth*, or at the Office of the Democratic Press, orders will be received

☞ The Certificates and Depositions abovementioned are left at the office of the Democratic Press.

Philadelphia, March 11, 1809.

, The Editors papers friendly to the encouragement of our own Manufactures will do a public service by giving the above a few insertions.
