Eclipses in the Year 1886.

There will be two Eclipses in 1886, both of the Sun, as follows:

1. An Annular Eclipse of the Sun, March 5; invisible in the United States east of a line from Rochester, N. Y., to Baltimore, and the Sun will set more or less eclipsed as far west as Denver and Santa Fé. The Annular Phase will be visible in Mexico.

2. A Total Eclipse of the Sun, August 28; visible in the Gulf and South Atlantic States as a Partial Eclipse about sunrise. It will not be visible north of a line from Portland, Me., through Central New-York to Springfield, Ill. The Sun will rise more or less eclipsed throughout the region from Charleston, S. C., where it begins at sunrise, to Houston, Tex., where it ends at sunrise. The path of the total phase extends from Madagascar to Aspinwall.

Divisions of Time.

A *Solar Day* is measured by the rotation of the earth upon its axis, and is of different lengths, owing to the ellipticity of the earth's orbit and other causes; but a mean solar day, recorded by the time-piece, is twenty-four hours long.

An *Astronomical Day* begins at noon, and is counted from the first to the twenty-fourth hour. A *Civil Day* begins at midnight, and is counted from the first to the twelfth hour, when it is counted again from the first to the twelfth hour. A *Nautical Day* is counted as a Civil Day, but begins, like an Astronomical Day, from noon.

A *Calendar Month* varies in length from 28 to 31 days. A *Mean Lunar Month* is 29 days, 12 hours, 44 minutes, 2 seconds, and 5.24 thirds.

A *Year* is divided into 365 days. A *Solar Year*, which is the time occupied by the Sun in passing from one Vernal Equinox to another, consists of 365.24224 solar days, or 365 days, 5 hours, 48 minutes, and 49.536 seconds.

A *Julian Year* is 365 days. A *Gregorian Year* is 365.2425 days; every fourth year is *Bissextile*, or Leap-Year, and is 366 days. The error of the Gregorian computation amounts only to one day in 3571.4286 years.

The time of High Water in this Almanac is given in Standard Time; all other matter in Clock Time.

THE WORLD.

Events in the Life of a Great Newspaper—Ancestry and Early Vicissitudes —Growth of Power and Influence as an Exponent of Democratic Ideas —Its Present Marvellous Success as a Journal for the People.

In the year 1813, when the war with Great Britain for the protection of American commerce and the vindication of American rights was at its height, a new Democratic journal appeared in the city of New York, under the auspices of the patriotic and fighting Tammany Society of that day, and under the editorship of Henry Wheaton, the illustrious writer on international law. This was the source and starting-point of the broad Democratic stream which flows through the columns of THE WORLD of 1886. The *National Advocate*, after distinguished services to the administration of President Monroe, passed in 1826 under the control of Major M. M. Noah, who changed its name to the *Enquirer*, and that paper in 1829 combined with the *Morning Courier*, which had been established two years before as a Jacksonian Democratic newspaper. Thus was created that celebrated commercial and political journal, under the management of General James Watson Webb, widely known for more than thirty years as the New York *Courier and Enquirer*. In July, 1861, it was absorbed by the then lately born metropolitan venture, THE WORLD.

THE BIRTH OF THE WORLD.

The first issue of THE NEW YORK WORLD appeared on the morning of June 14th, 1860. It was an eight-page paper of nearly the present form. It started with abundant capital and a large and brilliant corps of writers and reporters. The new and handsome building at the corner of Park Row and Beekman Street was selected for its home, and great vaults were excavated for Hoe's lightning presses. The manager of the enterprise was Alexander Cummings, formerly of the Philadelphia *North American* (and afterward Governor of Colorado), and his chief assistant was the scholarly James R. Spalding, a classmate of Henry J. Raymond, and for some time a leading writer on the *Courier and Enquirer*.

THE WORLD of 1860, thus generously equipped to fight for a position in the front ranks of New York daily journalism, would probably have achieved success but for the lack of one essential thing in a newspaper—the news.

FOR SERIOUS FAMILIES.

The projectors were several gentlemen of large means and evangelical affiliations, who had conceived the idea that there was a place in the community for a daily paper which would exclusively represent the thought and please the taste of the evangelical part of it. In furtherance of this idea everything was shut out from the columns of the paper which might offend the sensibilities of the distinctive class for which it was designed—even to theatrical advertisements. But the experience of a few months taught the proprietors that even the seriously-minded persons upon whom they had depended for support would not buy a paper which did not print with promptness and fulness a record of all events of "contemporaneous human interest." Two hundred thousand dollars had been expended and lost in the experiment, and the business passed into other hands.

THE WORLD BECOMES A NEWSPAPER.

Then THE WORLD became a newspaper. In July, 1861, it had absorbed the *Courier and Enquirer*, the largest of the old-fashioned "blanket sheets." For a short time the paper bore the title of THE WORLD AND COURIER AND ENQUIRER, but the cumbersome addition was soon dropped. In 1862, after a year's varying fortunes, the property was bought by several wealthy Democrats, headed by August Belmont and Samuel L. M. Barlow, and the paper assumed the position which it continues to hold—that of the principal Democratic newspaper of the country. Manton Marble was made the editor-in-chief. Under his management it took rank at once as a high class, well-written journal of strong Democratic convictions and great power and influence. It defended with vigor the Democratic policy during the later years of the Civil War, and drew upon itself the bitter animosity of the Republican partisans in government positions, who could brook no criticism of their official conduct.

1869—1883.

On December 29th, 1869, Mr. Marble, who had gradually acquired three fourths of THE WORLD newspaper property, purchased the remaining interest for \$100,000, and thus became sole proprietor. It continued under his control until 1877, the paper maintaining its elevated character, and serving the Democracy with zeal and efficiency through the Presidential campaigns of 1868, 1872, and 1876.

In the following year Mr. Marble retired from journalism, and the property was purchased by a syndicate of capitalists, represented by William H. Hurlbert. Backed by the richest men in America, with an editorial staff embracing the ablest men of letters and the brightest minds in journalism, under this management THE WORLD steadily declined in influence and circulation, not only failing to pay expenses, but entailing a loss of nearly \$100,000 a year merely to keep it alive. *It did not serve the people*, and neither ability nor money could save it.

A NEW WORLD.

The present proprietor of THE WORLD, Mr. Joseph Pulitzer, became its purchaser in May, 1883. In announcing the change of ownership in the issue of May 10th, he declared that under the new management THE WORLD would be entirely different—"different in men, measures, and methods; different in purpose, policy, and principle; different in objects and interest; different in sympathies and convictions; different in head and heart;" and the new editor and proprietor added:

"There is room in this great and growing city for a journal that is not only cheap but bright, not only bright but large, not only large but truly Democratic—dedicated to the cause of the people rather than that of purse-potentates—devoted more to the news of the New than the Old World—that will expose all fraud and sham, fight all public evils and abuses—that will serve and battle for the people with earnest sincerity."

TWO YEARS' STUPENDOUS GROWTH.

The success of the undertaking thus inaugurated has been proved by the logic of figures. It is needless to dilate on the causes of a prosperity for which those figures speak so eloquently. They tell the whole story. A circulation that has leaped from 15,000 to 200,000 in about two years is without parallel on this planet. The why and the wherefore were summed up in THE WORLD last May. It said then: "It is because at the end of two years we can reproduce the promises we made to the public when we took charge of THE WORLD, with the proud consciousness that we have fully and faithfully lived up to their spirit and their letter."

RAISING \$100,000 FOR LIBERTY.

As an illustration of how widely its influence is spread, and how strongly it has engaged the confidence and entered into the hearts of the American people, THE WORLD can point with pride to its successful effort to raise the fund for the completion of the pedestal of Bartholdi's great statue of "Liberty Enlightening the World," to be erected in New York Harbor—a gift from the sister republic of France. THE WORLD made its patriotic appeal in April, 1885, and in four months the public had responded with contributions of more than \$100,000, representing over 120,000 individual subscriptions; and thus the means were provided to accomplish the work.

FOR THE PEOPLE AND GOOD GOVERNMENT.

When THE WORLD became the journal of the people, it enlisted in their behalf against all forms of social and political wrong. The humblest citizen has found protection in its columns against the injustice of the powerful in place and wealth. The most powerful has not escaped exposure and punishment when guilty of wrong-doing. In face of a strong local pressure it secured justice for the weak and friendless victim of the brutal police sergeant; in opposition to a vast combination of money and influence it tore away the potent defences behind which a rich bank president and a millionaire swindler had sheltered themselves, and helped to send them to the felon's dock.

At the same time THE WORLD has fought the good fight for an honest administration of government, civic, State, and federal, and can fairly claim a share in the result of the election which cast out a corrupt political party and restored purity and efficiency in the conduct of national affairs. In its treatment of every public question the welfare of the people has been the

first and only consideration. The touchstone has been "What is for the public welfare?" Thus the paper has become strong and popular, not so much because it has presented all the news in a scrupulously clean and acceptable shape as because it has rendered public service by doing good. The people have shown their appreciation of it by giving THE WORLD the largest circulation ever accorded to an American newspaper.

CIRCULATION AND ADVERTISING.

THE WORLD points with natural pride to the circulation which it has achieved under its present management. When the change in proprietorship took place it was printing an average of 15,000 copies daily. In the first week of February of the present year the circulation of its daily edition averaged 150,000 copies, and its Sunday edition had reached 213,040 copies. Comparing the three Januaries of 1884, 1885, and 1886, the figures were respectively 1,486,050, 3,064,859, and 5,338,281 copies printed and sold in each of the months. The showing for January, 1886, was the more remarkable for the reason that the weather was unpropitious, and the news not of a character to create an extra demand. A half-million of people read each issue of THE WORLD, and at the present enormous ratio of increase it will have vastly more before the close of 1886. This multitude is not confined to the metropolis. It covers the whole country, and the great journal is as eagerly sought and almost as readily served in other cities and States as in the place of its publication. A tabular statement of circulation will be found on the next page.

The growth in advertising has been equally wonderful. In May, 1883, when the new management came in, the average number of columns of advertising was 13 in each issue. THE SUNDAY WORLD of February 7 published 100 $\frac{1}{4}$ columns of advertising. The total number of columns of advertising in 1883, from May to the close of the year, was 4,628 $\frac{1}{4}$. In 1884 the number had risen to 8,457 $\frac{1}{4}$ columns, and in 1885 to 12,092 $\frac{3}{4}$ columns. But it is in the specialty of "want" advertisements that the appreciation of THE WORLD as a popular advertising medium is most conspicuously shown. By actual count 448,793 "want" advertisements appeared in this newspaper in the year 1885. And the growth of this class of advertisements has continued with the new year, the edition of Sunday, January 31, giving place to 3,108 of them. In answer to these, 20,204 letters were received at THE WORLD office, and this number did not include letters addressed to the various authorized agencies. To some single advertisements as many as 500 answers have frequently been received. It is an exhibit which no paper has been able to make before, and which no paper can ever make unless it has a large and generally scattered circulation. This volume of advertising, which peculiarly represents the active daily necessities and requirements of the mass of the population, has been obtained by THE WORLD in competition with and in preference to the paper which had the greatest reputation in the world in that respect, and which it had required a half century to build up.

MECHANICAL APPLIANCES.

THE WORLD now has the best machines and appliances of all descriptions that money can procure or ingenuity devise. As regards present capacity to do a phenomenal amount of work promptly, accurately, and admirably, it can confidently challenge comparison with any newspaper that civilization has known. Regardless of expense or exertion, every modern improvement, every practical contrivance that tends to promote its efficiency in the service of the public, has been adopted. Its composing-room is equal to all emergencies, its stereotyping department has availed itself of the latest developments in that art, and in its press-room are planted machines of the latest pattern that can produce 120,000 eight-page papers every sixty minutes. THE WORLD, as will be seen, has endeavored to meet the public want, convenience, and approval at all points, not only in the freshness and reliability of its news, and in the vigor and candor of its editorials, but also in everything appertaining to its manufacture, in the receipt and classification of its advertisements, and in its efforts to promptly place its pages before all readers far and near.

Every night in the year the topmost story of THE WORLD Building on Park Row is ablaze with hundreds of incandescent electric lights. Here are the cryes of the editors and reporters, the compositors and proof-readers of a metropolitan newspaper that never sleeps. To the desks in these elevated quarters, by cable, and wire, and mail, and messenger, comes the news of the day and night, gathered by innumerable agents in every land with untiring enterprise, thoroughness, and fidelity.

CIRCULATION OF THE WORLD.

FOR EVERY DAY IN THE YEAR 1885.

The following table gives the actual *bona-fide*, sworn-to circulation of THE WORLD, day by day, during the year 1885. Its steady, clock-like march upward is most forcibly demonstrated by the actual figures of the circulation:

Postal Information.**DOMESTIC RATES OF POSTAGE.**

ALL mailable matter for transmission by the United States mails within the United States is divided into four classes, under the following regulations:

FIRST-CLASS MATTER.

This class includes letters, postal cards, and anything sealed or otherwise closed against inspection, or anything containing writing not allowed as an accompaniment to printed matter under class three.

Rates of letter postage to any part of the United States *two cents per ounce or fraction thereof.*

Rates on local or drop letters at free delivery offices two cents per ounce or fraction thereof. At offices where there is no free delivery by carriers, one cent per ounce or fraction thereof.

Rates on postal cards, one cent. Nothing must be added or attached to a postal card, except that a printed address slip may be pasted on the address side. The addition of anything else subjects the card to letter postage. A card containing any scurrilous or indecent communication will not be forwarded. Nothing but the address must be placed on the face, or stamped side.

Rates on specially delivered letters from offices designated by the post-office department as special delivery offices (of which there are over 500 in the United States), ten cents on each letter in *addition* to the regular postage. This entitles the letter to immediate delivery by special messenger. Special delivery stamps are sold at special delivery offices, and must be affixed to such letters.

Pre payment by stamps invariably required. Postage on all letters should be *fully* prepaid, but if prepaid one full rate and no more they will be forwarded, and the amount of deficient postage collected on delivery; if wholly unpaid, or prepaid with less than one full rate, and deposited at a post-office not having a free delivery by carriers, they will be sent to the Dead Letter office; or if forwarded by mistake, double the regular rates will be collected on delivery; but if deposited at a free delivery office, they will be returned to the sender if the address be printed or written upon them.

Letter rates are charged on all productions by the typewriter or manifold process.

Letters (but no other class of mail matter) will be returned to the sender free, if a request to that effect is printed or written on the envelope. There is no limit of weight for first-class matter.

Prepaid letters will be re-forwarded from one post-office to another upon the written request of the person addressed, without additional charge for postage. The direction on forwarded letters may be changed as many times as may be necessary to reach the person addressed.

SECOND-CLASS MATTER.

This class includes all newspapers, periodicals, or matter exclusively in print and regularly issued at stated intervals as frequently as four times a year, from a known office of publication or news agency, to actual subscribers or news agents, and transient newspapers and publications of this character mailed by persons other than publishers.

Rates of postage to publishers, *one cent a pound, or fractional part thereof*, prepaid by special stamps. Publications designed primarily for advertising or free circulation, or not having a legitimate list of subscribers, are excluded from the pound rate, and pay third-class rates.

Publications sent to actual subscribers in the county where published are free, unless the delivery is to be made by a letter-carrier's office.

Rates of postage on transient newspapers, magazines, or periodicals *one cent for each four ounces or fraction thereof*. It should be observed that the rate is one cent for each four ounces, not one cent for each paper.

THIRD-CLASS MATTER.

Mail matter of the third class includes printed books, pamphlets, engravings, circulars (in print or by the hectograph, electric pen, or similar process), and other matter wholly in print, legal and commercial papers filled out in writing, proof-sheets, corrected proof-sheets, and manuscript copy accompanying the same.

The rate on matter of this class is *one cent for each two ounces or fraction thereof*.

Manuscript, unaccompanied by proof-sheets, must pay letter rates.

Third-class matter must admit of easy inspection, otherwise it will be charged letter rates on delivery. It must be fully prepaid, or it will not be forwarded.

The limit of weight is four pounds, except single books in separate packages, on which the weight is not limited.

The sender of any book may write names or addresses therein, or on the outside, with the word "from" preceding the same, or a sender may write briefly on any package the number and names of the articles inclosed.

FOURTH-CLASS MATTER.

Fourth-class matter is all mailable matter not included in the three preceding classes, which is so prepared for mailing as to be easily withdrawn from the wrapper and examined. It embraces merchandise and samples of every description, coin or specie, as well as printed matter if sent as samples or merchandise, labels, playing cards, photographs, lithographs, valentines, maps, chromos, etc.

Rate of postage *one cent for each ounce or fraction thereof*. This matter must be fully prepaid, or it will not be forwarded.

Articles of this class that are liable to injure or deface the mails, such as glass, flour, sugar, needles, nails, pens, etc., must be first wrapped in a bag, box or open envelope and then secured in another outside tube or box, made of metal or hard wood, without sharp corners or edges, and having a sliding, a clasp and a screw lid, thus securing the articles in a double package. The public should bear in mind that the first object of the department is to transport the mails safely, and every other interest is made subordinate.

Such articles as liquids, poisons, greasy or fatty substances, explosives or inflammable articles, live animals, insects, or substances exhaling a bad odor, will not be forwarded in any case.

Limit of weight of fourth-class matter, four pounds.

The name and address of the sender, preceded by the word "from," also the names and number (quantity) of the articles inclosed, may be written on the wrapper of fourth-class matter without additional postage charge. A request to the delivering postmaster may also be written, asking him to notify the sender if the package is not delivered. The names or titles of photographs, stereoscopic views, etc., may be written on the same.

REGISTRATION.

All kinds of postal matter, *except second-class matter*, can be registered at the rate of *ten cents for each package* in addition to the regular rates of postage, to be fully prepaid by stamps. Each package must bear the name and address of the sender, and a receipt will be returned from the person to whom addressed.

The Post-Office Department or its revenue is not by law liable for the loss of any registered mail matter.

MONEY ORDERS.

Domestic money orders are issued by money-order post-offices for any amount up to one hundred dollars, at the following rates:

For \$10 or less, eight cents; for \$10 to \$15, ten cents; for \$15 to \$30, fifteen cents; for \$30 to \$40, twenty cents; for \$40 to \$50, twenty five cents; for \$50 to \$60, thirty cents; for \$60 to \$70, thirty-five cents; for \$70 to \$80, forty cents; for \$80 to \$100, forty-five cents.

When more than \$100 is required, additional orders must be obtained, but not more than three orders will be issued in one day to the same payee, payable at the same office.

POSTAL NOTES.

These will be issued for sums less than five dollars for a fee of three cents, and are payable to any person presenting them either at the office designated on the note or at the office of issue within three months of date of issue.

FREE DELIVERY.

The free delivery of mail matter at the residences of the people desiring it is required by law in every city of 50,000 or more population, and may be established at every place containing not less than 20,000 inhabitants. The present number of free delivery offices is 178.

The franking privilege was abolished July 1, 1873, but the following mail-matter may be sent free by legislative saving clauses—viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by members of Congress or the Secretary of the Senate, or Clerk of the House.

2. Seeds transmitted by the Commissioner of Agriculture, or by any Member of Congress, procured from that department.

3. All periodicals sent to subscribers within the county where printed.

4. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, publications required to be mailed to the Librarian of Congress by the copyright law, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

All communications to Government officers, and to or from Members of Congress, are required to be prepaid by stamps.

SUGGESTIONS TO THE PUBLIC.

(From the *United States Official Postal-Guide*.)

Mail all letters, etc., as early as practicable, especially when sent in large numbers, as is frequently the case with newspapers and circulars. The trouble of the post-office is much diminished if letters, when mailed in large numbers, are tied in bundles, with the addresses all in one direction.

Make the address legible and complete, giving the name of the post-office, county, and State. The name of the street and number of the house should also be given on letters addressed to cities where letter-carriers are employed; while the letter will eventually reach its destination without a number, the omission is often a cause of hesitation and delay. In the case of letters for places in foreign countries, and especially in Canada, in which country there are many post-offices having the same names as post-offices in the United States and in England, the name of the country as well as the post-office should be given in full. Letters addressed, for instance, merely to "London," without adding "England," are frequently sent to London, Canada, and *vice versa*, thereby

causing delay, and often serious loss. Letters addressed to Burlington, N. S. (Nova Scotia), often go to Burlington, New York, on account of the resemblance between S and Y when carelessly written.

Avoid, as much as possible, using envelopes made of thin paper, especially where more than one sheet of paper, or any other article than paper, is inclosed. Being often handled, and even in the mail bags subject to pressure, such envelopes not unfrequently split open, giving cause of complaint against officials who are entirely innocent in the matter.

Never send money or any other article of value through the mail, except either by means of a money-order or in a registered letter. Any person who sends money or jewelry in an unregistered letter not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter-carrier to ruin.

See that every letter contains the full name and post-office address of the writer, with county and State, in order to secure the return of the letter, if the person to whom it is directed cannot be found. A much larger portion of the undelivered letters could be returned if the names and addresses of the senders were always fully and plainly written or printed inside or on the envelopes. Persons who have large correspondence find it most convenient to use "special-request envelopes," but those who only mail an occasional letter can avoid much trouble by writing a request to "return if not delivered," etc., on the envelope.

When dropping a letter, newspaper, etc., into street mailing-box, or into the receptacle at a post-office, always see that the packet falls into the box, and does not stick in its passage; observe, also, particularly, whether the postage stamps remain securely in their places.

Postage stamps should be placed on the upper right-hand corner of the address side of all mail-matter.

Postmasters are not obliged to accept in payment for postage stamps or stamped envelopes, wrappers, etc., any currency which may be so mutilated as to be uncurrent, or the genuineness of which cannot be clearly ascertained. They are not obliged to receive more than twenty-five cents in copper or nickel coins. They are not obliged to affix stamps to letters, nor are they obliged to make change except as a matter of courtesy. They must not give credit for postage.

Letters cannot be carried out of the mail except in postage-stamped envelopes. There is no objection to a person who is not acting as a common carrier carrying a sealed letter, whether in a stamped envelope or not; but to continue the practice, or receive money for so doing, would subject the party to a penalty of one hundred and fifty dollars. Newspapers, magazines, and periodicals may be carried out of the mail for sale or distribution to subscribers, but if they are put into a post-office for delivery the postage must be paid thereon.

Mail-matter deposited in any receptacle erected by the Post-Office Department, such as street mailing boxes for the reception of mail-matter to be collected by letter carriers, or boxes in railroad depots for the reception of matter to be collected by employes of the railway mail service, cannot be reclaimed by any one under any circumstances. Persons depositing letters in the latter, intended for city delivery, do so at their own risk, and cannot reclaim them except through the Dead Letter Office.

Letters addressed to persons temporarily sojourning in a city where the Free Delivery System is in operation should be marked "Transient" or "General Delivery," if not addressed to a street and number or some other designated place of delivery.

Party Platforms.

NATIONAL DEMOCRATIC PLATFORM, ADOPTED AT THE CHICAGO CONVENTION,
JULY 10, 1884.

THE Democratic party of the Union, through its representatives in National Convention assembled, recognizes that, as the nation grows older, new issues are born of time and progress, and old issues perish. But the fundamental principles of the Democracy, approved by the united voice of the people, remain, and will ever remain, as the best and only security for the continuance of free government. The preservation of personal rights; the equality of all citizens before the law; the reserved rights of the States, and the supremacy of the Federal Government within the limits of the Constitution, will ever form the true basis of our liberties, and can never be surrendered without destroying that balance of rights and powers which enables a continent to be developed in peace, and social order to be maintained by means of local self-government.

But it is indispensable for the practical application and enforcement of these fundamental principles that the Government should not always be controlled by one political party. Frequent change of Administration is as necessary as constant recurrence to popular will. Otherwise abuses grow, and the Government, instead of being carried on for the general welfare, becomes an instrumentality for imposing heavy burdens on the many who are governed, for the benefit of the few who govern. Public servants thus become arbitrary rulers.

This is now the condition of the country. Hence, a change is demanded. The Republican party, so far as principle is concerned, is a reminiscence; in practice, it is an organization for enriching those who control its machinery. The frauds and jobbery which have been brought to light in every department of the Government are sufficient to have called for reform within the Republican party; yet those in authority, made reckless by the long possession of power, have succumbed to its corrupting influence, and have placed in nomination a ticket against which the independent portion of the party are in open revolt.

Therefore, a change is demanded. Such a change was alike necessary in 1876, but the will of the people was then defeated by a fraud which can never be forgotten, nor condoned. Again, in 1880, the change demanded by the people was defeated by the lavish use of money contributed by unscrupulous contractors and shameless jobbers, who had bargained for unlawful profits, or for high office.

The Republican party, during its legal, its stolen, and its bought tenures of power, has steadily decayed in moral character and political capacity.

Its platform promises are now a list of its past failures.

It demands the restoration of our navy. It has squandered hundreds of millions to create a navy that does not exist.

It calls upon Congress to remove the burdens under which American shipping has been depressed. It imposed and has continued those burdens.

It professes the policy of reserving the public

lands for small holdings by actual settlers. It has given away the people's heritage till now a few railroads and non-resident aliens, individual and corporate, possess a larger area than that of all our farms between the two seas.

It professes a preference for free institutions. It organized and tried to legalize a control of State elections by Federal troops.

It professes a desire to elevate labor. It has subjected American workingmen to the competition of convict and imported contract labor.

It professes gratitude to all who were disabled or died in the war, leaving widows and orphans. It left to a Democratic House of Representatives the first effort to equalize both bounties and pensions.

It proffers a pledge to correct the irregularities of our tariff. It created and has continued them. Its own Tariff Commission confessed the need of more than twenty per cent reduction. Its Congress gave a reduction of less than four per cent.

It professes the protection of American manufactures. It has subjected them to an increasing flood of manufactured goods, and a hopeless competition with manufacturing nations, not one of which taxes raw material.

It professes to protect all American industries. It has impoverished many to subsidize a few.

It professes the protection of American labor. It has depleted the returns of American agriculture—an industry followed by half our people.

It professes the equality of all men before the law. Attempting to fix the *status* of colored citizens, the acts of its Congress were overset by the decisions of its courts.

It "accepts anew the duty of leading in the work of progress and reform." Its caught criminals are permitted to escape through contrived delays or actual connivance in the prosecution. Honeycombed with corruption, out-breaking exposures no longer shock its moral sense. Its honest members, its independent journals, no longer maintain a successful contest for authority in its counsels, or a veto upon bad nominations.

That change is necessary is proved by an existing surplus of more than \$100,000,000, which has yearly been collected from a suffering people. Unnecessary taxation is unjust taxation. We denounce the Republican party for having failed to relieve the people from crushing war taxes, which have paralyzed business, crippled industry and deprived labor of employment and of just reward.

The Democracy pledges itself to purify the Administration from corruption, to restore economy, to revive respect for law, and to reduce taxation to the lowest limit consistent with due regard to the preservation of the faith of the nation to its creditors and pensioners.

Knowing full well, however, that legislation affecting the occupations of the people should be cautious and conservative in method, not in advance of public opinion, but responsive to its demands, the Democratic party is pledged to revise the tariff in a spirit of fairness to all interests.

But in making reduction in taxes, it is not pro-

posed to injure any domestic industries, but rather to promote their healthy growth. From the foundation of this Government, taxes collected at the Custom House have been the chief source of Federal revenue. Such they must continue to be. Moreover, many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved. The process of reform must be subject in the execution of this plain dictate of justice.

All taxation shall be limited to the requirements of economical government. The necessary reduction in taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor, and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country.

Sufficient revenue to pay all the expenses of the Federal Government, economically administered, including pensions, interest and principal of the public debt, can be got, under our present system of taxation, from Custom House taxes on fewer imported articles, bearing heaviest on articles of luxury, and bearing lightest on articles of necessity.

We therefore denounce the abuses of the existing tariff, and, subject to the preceding limitations, we demand that Federal taxation shall be exclusively for public purposes, and shall not exceed the needs of the Government economically administered.

The system of direct taxation known as "internal revenue" is a war tax, and so long as the law continues, the money derived therefrom should be sacredly devoted to the relief of the people from the remaining burdens of the war, and be made a fund to defray the expenses of the care and comfort of worthy soldiers disabled in the line of duty in the wars of the Republic, and for the payment of such pensions as Congress may from time to time grant to such soldiers; a like fund for the sailors having been already provided, and any surplus should be paid into the treasury.

We favor an American continental policy, based upon more intimate commercial and political relations with the fifteen sister republics of North, Central and South America, but entangling alliances with none.

We believe in honest money, the gold and silver coinage of the Constitution, and a circulating medium convertible into such money without loss.

Asserting the equality of all men before the law, we hold that it is the duty of the Government, in its dealings with the people, to mete out equal and exact justice to all citizens of whatever nativity, race, color or persuasion—religious or political.

We believe in a free ballot and a fair count; and we recall to the memory of the people the noble struggle of the Democrats in the Forty-fifth and Forty-sixth Congresses, by which a reluctant Republican opposition was compelled to assent to legislation making everywhere illegal the presence of troops at the polls, as the conclusive proof that a Democratic Administration will preserve liberty with order.

The selection of Federal officers for the Territories should be restricted to citizens previously resident therein.

We oppose sumptuary laws which vex the citizen and interfere with individual liberty; we favor honest Civil Service Reform, and the compensation of all United States officers by fixed salaries; the separation of Church and State, and the diffusion of free education by common schools, so that every child in the land may be taught the rights and duties of citizenship.

While we favor all legislation that will tend to the equitable distribution of property, to the prevention of monopoly, and to the strict enforcement of individual rights against corporate abuses, we hold that the welfare of society depends upon a scrupulous regard for the rights of property, as defined by law.

We believe that labor is best rewarded where it is freest and most enlightened. It should therefore be fostered and cherished. We favor the repeal of all laws restricting the free action of labor, and the enactment of laws by which labor organizations may be incorporated, and of all such legislation as will tend to enlighten the people as to the true relations of capital and labor.

We believe that the public lands ought, as far as possible, to be kept as homesteads for actual settlers; that all unearned lands heretofore improvidently granted to railroad corporations by the action of the Republican party, should be restored to the public domain, and that no more grants of land shall be made to corporations, or be allowed to fall into the ownership of alien absentees.

We are opposed to all propositions which, upon any pretext, would convert the general Government into a machine for collecting taxes to be distributed among the States, or the citizens thereof.

In reaffirming the declaration of the Democratic platform of 1856, that "the liberal principles embodied by Jefferson in the Declaration of Independence, and sanctioned by the Constitution, which make ours the land of liberty and the asylum of the oppressed of every nation, have ever been cardinal principles in the Democratic faith," we nevertheless do not sanction the importation of foreign labor, or the admission of servile races, unfitted by habits, training, religion, or kindred, for absorption into the great body of our people, or for the citizenship which our laws confer. American civilization demands that against the immigration or importation of Mongolians to these shores, our gates be closed.

The Democratic party insists that it is the duty of this Government to protect, with equal fidelity and vigilance, the rights of its citizens, native and naturalized, at home and abroad, and to the end that this protection may be assured, United States papers of naturalization, issued by courts of competent jurisdiction, must be respected by the executive and legislative departments of our own Government, and by all foreign powers.

It is an imperative duty of this Government to efficiently protect all the rights of persons and property of every American citizen in foreign lands, and demand and enforce full reparation for any invasion thereof.

An American citizen is only responsible to his own Government for any act done in his own country, or under her flag, and can only be tried therefor on her own soil, and according to her laws; and no power exists in this Government

to expatriate an American citizen to be tried in any foreign land for any such act.

This country has never had a well-defined and executed foreign policy, save under Democratic Administration; that policy has ever been in regard to foreign nations, so long as they do not act detrimental to the interests of the country, or hurtful to our citizens, to let them alone; that, as the result of this policy we recall the acquisition of Louisiana, Florida, California, and of the adjacent Mexican territory by purchase alone; and contrast these grand acquisitions of Democratic statesmanship with the purchase of Alaska, the sole fruit of a Republican Administration of nearly a quarter of a century.

The Federal Government should care for and improve the Mississippi River and other great waterways of the Republic, so as to secure for the interior States easy and cheap transportation to tide-water.

Under a long period of Democratic rule and policy our merchant marine was fast overtaking and on the point of outstripping that of Great Britain.

Under twenty years of Republican rule and policy our commerce has been left to British bottoms, and almost has the American flag been swept off the high seas.

Instead of the Republican party's British policy we demand for the people of the United States an American policy.

Under Democratic rule and policy our merchants and sailors, flying the stars and stripes in every port, successfully searched out a market for the varied products of American industry.

Under a quarter of a century of Republican rule and policy, despite our manifest advantage over all other nations in high-paid labor, favorable climates and teeming soils; despite freedom of trade among all these United States; despite their population by the foremost races of men, and an annual immigration of the young, thrifty and adventurous of all nations; despite our freedom here from the inherited burdens of life and industry in old world monarchies—their costly war navies, their vast tax-consuming, non-producing standing armies; despite their twenty

years of peace—that Republican rule and policy have managed to surrender to Great Britain, along with our commerce, the control of the markets of the world.

Instead of the Republican party's British policy, we demand, in behalf of the American Democracy, an American policy.

Instead of the Republican party's discredited scheme and false pretence of friendship for American labor, expressed by imposing taxes, we demand, in behalf of the Democracy, freedom for American labor by reducing taxes, to the end that these United States may compete with unhindered powers for the primacy among nations in all the arts of peace and fruits of liberty.

With profound regret we have been apprised by the venerable statesman, through whose person was struck that blow at the vital principle of republics (acquiescence in the will of the majority) that he cannot permit us again to place in his hands the leadership of the Democratic hosts, for the reason that the achievement of reform in the administration of the Federal Government is an undertaking now too heavy for his age and failing strength.

Rejoicing that his life has been prolonged until the general judgment of our fellow countrymen is united in the wish that that wrong were righted in his person, for the Democracy of the United States we offer to him in his withdrawal from public cares not only our respectful sympathy and esteem, but also that best homage of freemen, the pledge of our devotion to the principles and the cause, now inseparable in the history of this Republic from the labors and the name of Samuel J. Tilden.

With this statement of the hopes, principles and purposes of the Democratic party, the great issue of reform and change in Administration is submitted to the people in calm confidence that the popular voice will pronounce in favor of new men, and new and more favorable conditions for the growth of industry, the extension of trade, the employment and due reward of labor and of capital, and the general welfare of the whole country.

NATIONAL REPUBLICAN PLATFORM, ADOPTED AT THE CHICAGO CONVENTION,
JUNE 5, 1884.

The Republicans of the United States in national Convention assembled renew their allegiance to the principles upon which they have triumphed in six successive Presidential elections, and congratulate the American people on the attainment of so many results in legislation and administration by which the Republican party has, after saving the Union, done so much to render its institutions just, equal and beneficent—the safeguard of liberty and the embodiment of the best thought and highest purposes of our citizens. The Republican party has gained its strength by quick and faithful response to the demands of the people for the freedom and the equality of all men; for a united nation, assuring the rights of all citizens; for the elevation of labor; for an honest currency; for purity in legislation, and for integrity and accountability in all departments of the Government; and it accepts anew the duty of leading in the work of progress and reform.

We lament the death of President Garfield, whose sound statesmanship, long conspicuous in

Congress, gave promise of a strong and successful Administration, a promise fully realized during the short period of his office as President of the United States. His distinguished success in war and in peace has endeared him to the hearts of the American people.

In the Administration of President Arthur we recognize a wise, conservative, and patriotic policy, under which the country has been blessed with remarkable prosperity, and we believe his eminent services are entitled to and will receive the hearty approval of every citizen.

It is the first duty of a good government to protect the rights and promote the interests of its own people. The largest diversity of industry is most productive of general prosperity and of the comfort and independence of the people. We therefore demand that the imposition of duties on foreign imports shall be made, not for revenue only, but that in raising the requisite revenues for the Government such duties shall be so levied as to afford security to our diversified industries, and protection to the rights and

wages of the laborer, to the end that active and intelligent labor, as well as capital, may have its just reward, and the laboring man his full share in the national prosperity.

Against the so-called economic system of the Democratic party which would degrade our labor to the foreign standard, we enter our earnest protest. The Democratic party has failed completely to relieve the people of the burden of unnecessary taxation by a wise reduction of the surplus.

The Republican party pledges itself to correct the inequalities of the tariff, and to reduce the surplus, not by the vicious and indiscriminate process of horizontal reduction, but by such methods as will relieve the taxpayer without injuring the laborer or the great productive interests of the country.

We recognize the importance of sheep husbandry in the United States, the serious depression which it is now experiencing, and the danger threatening its future prosperity; and we therefore respect the demands of the representatives of this important agricultural interest for a readjustment of duty upon foreign wool, in order that such industry shall have full and adequate protection.

We have always recommended the best money known to the civilized world, and we urge that an effort be made to unite all commercial nations in the establishment of an international standard which shall fix for all the relative value of gold and silver coinage.

The regulation of commerce with foreign nations and between the States is one of the most important prerogatives of the general Government, and the Republican party distinctly announces its purpose to support such legislation as will fully and efficiently carry out the Constitutional power of Congress over inter-State commerce.

The principle of the public regulation of railway corporations is a wise and salutary one for the protection of all classes of the people, and we favor legislation that shall prevent unjust discrimination and excessive charges for transportation, and that shall secure to the people and to the railways alike the fair and equal protection of the laws.

We favor the establishment of a national bureau of labor, the enforcement of the eight-hour law, and a wise and judicious system of general education by adequate appropriation from the national revenues wherever the same is needed. We believe that everywhere the protection to a citizen of American birth must be secured to citizens of American adoption, and we favor the settlement of national differences by international arbitration.

The Republican party having its birth in a hatred of slave-labor, and in a desire that all men may be free and equal, is unalterably opposed to placing our workmen in competition with any form of servile labor, whether at home or abroad. In this spirit we denounce the importation of contract labor, whether from Europe or Asia, as an offence against the spirit of American institutions, and we pledge ourselves to sustain the present law restricting Chinese immigration, and to provide such further legislation as is necessary to carry out its purposes.

The reform of the Civil Service, auspiciously begun under Republican Administration, should be completed by the further extension of the reformed system, already established by law, to

all the grades of the service to which it is applicable. The spirit and purpose of the reform should be observed in all executive appointments, and all laws at variance with the objects of existing reformed legislation should be repealed, to the end that the danger to free institutions which lurks in the power of official patronage may be wisely and effectively avoided.

The public lands are a heritage of the people of the United States, and should be reserved, as far as possible, for small holdings by actual settlers. We are opposed to the acquisition of large tracts of these lands by corporations or individuals, especially where such holdings are in the hands of non-resident aliens, and we will endeavor to obtain such legislation as will tend to correct this evil. We demand of Congress the speedy forfeiture of all land grants which have lapsed by reason of non-compliance with acts of incorporation, in all cases where there has been no attempt in good faith to perform the conditions of such grants.

The grateful thanks of the American people are due to the Union soldiers and sailors of the late war, and the Republican party stands pledged to suitable pensions for all who were disabled, and for the widows and orphans of those who died in the war. The Republican party also pledges itself to the repeal of the limitation contained in the Arrars act of 1879, so that all invalid soldiers shall share alike, and their pensions shall begin with the date of disability or discharge, and not with the date of their application.

The Republican party favors a policy which shall keep us from entangling alliances with foreign nations, and which shall give the right to expect that foreign nations shall refrain from meddling in American affairs—the policy which seeks peace and can trade with all Powers, but especially with those of the Western Hemisphere.

We demand the restoration of our navy to its old-time strength and efficiency, that it may, in any sea, protect the rights of American citizens and the interests of American commerce, and we call upon Congress to remove the burdens under which American shipping has been depressed, so that it may again be true that we have a commerce which leaves no sea unexplored, and a navy which takes no law from superior force.

Resolved, That appointments by the President to offices in the territories should be made from the *bona fide* citizens and residents of the territories wherein they are to serve.

Resolved, That it is the duty of Congress to enact such laws as shall promptly and effectually suppress the system of polygamy within our territories, and divorce the political from the ecclesiastical power of the so-called Mormon Church, and that the law so enacted should be rigidly enforced by the civil authorities if possible, and by the military if need be.

The people of the United States, in their organized capacity, constitute a Nation and not a mere confederacy of States. The National Government is supreme within the sphere of its national duty, but the States have reserved rights which should be faithfully maintained; each should be guarded with jealous care so that the harmony of our system of Government may be preserved and the Union be kept inviolate.

The perpetuity of our institutions rests upon

the maintenance of a free ballot, an honest count and correct returns. We denounce the fraud and violence practised by the Democracy in the Southern States by which the will of the voter is defeated, as dangerous to the preservation of free institutions, and we solemnly arraign the Democratic party as being the guilty recipient of the fruits of such fraud and violence.

We extend to the Republicans of the South, regardless of their former party affiliations, our cordial sympathy, and pledge to them our utmost earnest efforts to promote the passage of such legislation as will secure to every citizen, of whatever race and color, the full and complete recognition, possession and exercise of all civil and political rights.

NATIONAL PROHIBITION PARTY PLATFORM, ADOPTED AT PITTSBURGH,
JULY 24, 1884.

First. The Prohibition party, in National Convention assembled, acknowledge Almighty God as the rightful sovereign of all men, from whom the just powers of government are derived, and to whose laws human enactments should conform as an absolute condition of peace, prosperity and happiness.

Second. That the importation, manufacture, supply and sale of alcoholic beverages, created and maintained by the laws of the national and State governments during the entire history of such laws, are everywhere shown to be the promoting cause of intemperance, with resulting crime and pauperism, making large demands upon public and private charity; imposing large and unjust taxation for the support of penal and sheltering institutions upon thrift, industry, manufactures and commerce; endangering the public peace; desecrating the Sabbath; corrupting our politics, legislation and administration of the laws; shortening lives, impairing health and diminishing productive industry; causing education to be neglected and despised; nullifying the teachings of the Bible, the Church and the school, the standards and guides of our fathers and their children in the founding and growth of our widely extended country; and which, imperilling the perpetuity of our civil and religious liberties, are hateful fruits by which we know that these laws are contrary to God's laws and contravene our happiness. We therefore call upon our fellow-citizens to aid in the repeal of these laws and in the legal suppression of this baneful liquor traffic.

Third. During the twenty-four years in which the Republican party has controlled the general Government and many of the States, no effort has been made to change this policy. Territories have been created, governments for them established, States admitted to the Union, and in no instance in either case has this traffic been forbidden or the people been permitted to prohibit it; that there are now over 200,000 distilleries, breweries, wholesale and retail dealers in their products, holding certificates and claiming the authority of Government for the continuation of the business so destructive to the moral and material welfare of the people, together with the fact that they have turned a deaf ear to remonstrance and petition for the correction of this abuse of civil Government, is conclusive that the Republican party is insensible to, or impotent for the redress of these wrongs, and should no longer be intrusted with the powers and responsibilities of government, that, although this party in its late national Convention, was silent on the liquor question, not so its candidates, Messrs. Blaine and Logan. Within the year past Mr. Blaine has recommended that the revenue derived from the liquor traffic be distributed among the States; and Senator Logan has, by bill, pro-

posed to devote these revenues to the support of the public schools. Thus both virtually recommend the perpetuation of the traffic, and that the States and their citizens become partners in the liquor crime.

Fourth. That the Democratic party has, in its national deliverances of party policy, arrayed itself on the side of the drink-makers and sellers by declaring against the policy of Prohibition, under the false name of "sumptuary laws"; that when in power in many of the States it has refused remedial legislation; and that in Congress it has obstructed the creation of a Commission of Inquiry into the effects of this traffic, proving that it should not be intrusted with power and place.

Fifth. That there can be no greater peril to the nation than the existing competition of the Republican and Democratic parties for the liquor vote. Experience shows that any party not openly opposed to the traffic will engage in this competition; will court the favor of the criminal classes; will barter the public morals, the purity of the ballot, and every trust and object of good government for party success. Patriots and good citizens should, therefore, immediately withdraw from all connection with these parties.

Sixth. That we favor reforms in the abolition of all sinecures with useless offices and officers, and in elections by the people instead of appointments by the President; that as competency, honesty and sobriety are essential qualifications for office, we oppose removals except when absolutely necessary to secure effectiveness in vital issues; that the collection of revenues from alcoholic liquors and tobacco should be abolished, since the vices of men are not proper subjects of taxation; that revenue from custom duties should be levied for the support of the Government economically administered, and in such manner as will foster American industries and labor; that the public lands should be held for homes for the people, and not bestowed as gifts to corporations, or sold in large tracts for speculation upon the needs of actual settlers; that grateful care and support should be given to our soldiers and sailors disabled in the service of their country, and to their dependent widows and orphans; that we repudiate as un-American and contrary to and subversive of the principles of the Declaration of Independence, that any persons or people should be excluded from residence or citizenship who may desire the benefits which our institutions confer upon the oppressed of all nations; that while these are important reforms, and are demanded for purity of administration and the welfare of the people, their importance sinks into insignificance when compared with the drink traffic, which now annually wastes \$300,000,000 of the wealth created by toil and thrift, dragging down

thousands of families from comfort to poverty, filling jails, penitentiaries, insane asylums, hospitals and institutions for dependency, impairing the health and destroying the lives of thousands, lowering intellectual vigor, and dulling the cunning hand of the artisan, causing bankruptcy, insolvency and loss in trade, and by its corrupting power endangering the perpetuity of free institutions; that Congress should exercise its undoubted power by prohibiting the manufacture and sale of intoxicating beverages in the District of Columbia, the Territories of the United States, and all places over which the Government has exclusive jurisdiction; that hereafter no State should be admitted to the Union until its Constitution shall expressly and forever prohibit polygamy and the manufacture and sale of intoxicating beverages; and that Congress shall submit to the States an Amendment to the Constitution, forever prohibiting the importation, exportation, manufacture and sale of alcoholic drinks.

Seventh. We earnestly call the attention of the mechanic, the miner and manufacturer to the investigation of the baneful effects upon labor and industry of the needless liquor business. It will be found the robber who lessens wages and profits, foments discontent and strikes, and the destroyer of family welfare. Labor, and all legitimate industries demand deliverance from the taxation and loss which this traffic imposes; and no tariff or other legislation can so healthily stimulate production, or increase the demand for capital and labor, or insure so much of comfort and content to the laborer, mechanic and capitalist as would the suppression of this traffic.

Eighth. That the activity and co-operation of the women of America for the promotion of tem-

perance has in all the history of the past been a strength and encouragement which we gratefully acknowledge and record. In the later and present phase of the movement for the prohibition of the traffic, the purity of purpose and method, the earnestness, zeal, intelligence and devotion of the mothers and daughters of the Women's Christian Temperance Union have been eminently blessed of God. Kansas and Iowa have been given them as "sheaves" of rejoicing, and the education and the arousing of the public mind, and the now prevailing demand for the Constitutional Amendment are largely the fruit of their prayers and labors. Sharing in the efforts that shall bring the question of the abolition of this traffic to the polls, they shall join in the grand "Praise God from whom all blessings flow," when by law victory shall be achieved.

Ninth. That believing in the civil and political equality of the sexes, and that the ballot in the hands of woman is her right for protection, and would prove a powerful ally for the abolition of the liquor traffic, the execution of law, the promotion of reform in civil affairs, and the removal of corruption in public life, we enunciate the principle and relegate the practical outworking of this reform to the discretion of the Prohibition party in the several States, according to the condition of public sentiment in those States.

Tenth. That we gratefully acknowledge the presence of the Divine Spirit guiding the counsels and granting the success which has been vouchsafed in the progress of the temperance reform, and we earnestly ask the voters of these United States to make the principles of the above declaration dominant in the Government of the nation.

NATIONAL GREENBACK-LABOR PLATFORM, ADOPTED AT INDIANAPOLIS,

MAY 29, 1884.

Eight years ago our young party met in this city for the first time, and proclaimed to the world its immortal principle, and placed before the American people as a Presidential candidate that great philanthropist and spotless statesman, Peter Cooper. Since that Convention our party has organized all over the Union, and through discussion and agitation has been educating the people to a sense of their rights and duties to themselves and their country. These labors have accomplished wonders. We now have a great, harmonious party, and thousands who believe in our principles in the ranks of other parties.

"We point with pride to our history." We forced the remonetization of the silver dollar; prevented the refunding of the public debt into long-time bonds; secured the payment of the bonds, until the "best banking system the world ever saw" for robbing the producer now totters because of its contracting foundation; we have stopped the squandering of our public domain upon corporations; we have stopped the wholesale destruction of our greenback currency, and secured a decision of the Supreme Court of the United States establishing forever the right of the people to issue their own money.

Notwithstanding all this, never in our history have the banks, land-grant railroads and other monopolies, been more insolent in their demands for further privileges—still more class legislation. In this emergency the dominant parties

are arrayed against the people, and are the abject tools of the corporate monopolies.

In the last Congress they repealed over \$12,000,000 of annual taxes for the banks, throwing the burden upon the people to pay or pay interest thereon.

Both old parties in the present Congress vie with each other in their efforts to further repeal taxes in order to stop the payment of the public debt, and save the banks whose charters they have renewed for twenty years. Notwithstanding the distress of business, the shrinkage of wages and panic, they persist in locking up, on various pretexes, \$400,000,000 of money, every dollar of which the people pay interest upon, and need, and most of which should be promptly applied to pay bonds now payable.

The old parties are united—they cannot agree what taxes to repeal—in efforts to squander the income of the Government upon every pretext rather than pay the debt.

A bill has already passed the United States Senate making the banks a present of over \$50,000,000 more of the people's money in order to enable them to levy a still greater burden of interest taxes.

A joint effort is being made by the old party leaders to overthrow the sovereign constitutional power of the people to control their own financial affairs and issue their own money, in order to forever enslave the masses to bankers and other business. The House of Representatives

has passed bills reclaiming nearly 100,000,000 acres of lands granted to and forfeited by railroad companies. These bills have gone to the Senate, a body composed largely of aristocratic millionaires, who, according to their own party papers, generally purchased their elections in order to protect great monopolies which they represent. This body has thus far defied the people and the House, and refused to act upon these bills in the interest of the people.

Therefore we, the National party of the United States, in National Convention assembled, this 29th day of May, A. D. 1884, declare:

First. That we hold the late decision of the Supreme Court on the legal-tender question to be a full vindication of the theory which our party has always advocated on the right and authority of Congress over the issue of legal-tender notes, and we hereby pledge ourselves to uphold said decision, and to defend the Constitution against alterations or amendments intended to deprive the people of any rights or privileges conferred by that instrument. We demand the issue of such money in sufficient quantities to supply the actual demand of trade and commerce, in accordance with the increase of population and the development of our industries. We demand the substitution of greenbacks for national bank notes and the prompt payment of the public debt. We want that money which saved our country in time of war, and which has given it prosperity and happiness in peace. We condemn the retirement of the fractional currency and the small denominations of greenbacks and demand their restoration. We demand the issue of the hoards of money now locked up in the United States Treasury, by applying them to the payment of the public debt now due.

Second. We denounce, as dangerous to our Republican institutions those methods and policies of the Democratic and Republican parties which have sanctioned or permitted the establishment of land, railroad, money, and other gigantic corporate monopolies; and we demand such Governmental action as may be necessary to take from such monopolies the powers they have so corruptly and unjustly usurped, and restore them to the people to whom they belong.

Third. The public lands being the natural inheritance of the people, we denounce that policy which has granted to corporations vast tracts of land, and we demand that immediate and vigorous measures be taken to reclaim from such corporations, for the people's use and benefit, all such land grants as have been forfeited by reason of non-fulfilment of contract, or that may have been wrongfully acquired by corrupt legislation, and that such reclaimed lands and other public domain be henceforth held as a sacred trust, to be granted only to actual settlers in limited quantities; and we also demand that the alien ownership of land, individual or corporate, shall be prohibited.

Fourth. We demand Congressional regulation of inter-State commerce. We denounce "pooling," stock-watering and discrimination in rates and charges, and demand that Congress shall correct these abuses, even, if necessary, by the construction of national railroads. We also demand

the establishment of a Government Postal Telegraph system.

Fifth. All private property, all forms of money and obligations to pay money, should bear their just proportion of the public taxes. We demand a graduated income tax.

Sixth. We demand the amelioration of the condition of labor by enforcing the sanitary laws in industrial establishments, by the abolition of the convict labor system, by a rigid inspection of mines and factories, by a reduction of the hours of labor in industrial establishments, by fostering educational institutions, and by abolishing child labor.

Seventh. We condemn all importations of contracted labor, made with a view of reducing to starvation wages the workmen of this country, and demand laws for its prevention.

Eighth. We insist upon a Constitutional Amendment reducing the terms of United States Senators.

Ninth. We demand such rules for the government of Congress as shall place all representatives of the people upon an equal footing, and take away from committees a veto power greater than that of the President.

Tenth. The question as to the amount of duties to be levied upon various articles of import has been agitated and quarrelled over and has divided communities for nearly a hundred years. It is not now and never will be settled unless by the abolition of indirect taxation. It is a convenient issue—always raised when people are excited over abuses in their midst. While we favor a wise revision of the tariff laws, with a view to raising a revenue from luxuries rather than necessities, we insist that as an economic question its importance is insignificant as compared with financial issues; for, whereas, we have suffered our worst panics under low and also under high tariffs, we have never suffered from a panic nor seen our factories and workshops closed while the volume of money in circulation was adequate to the needs of commerce. Give our farmers and manufacturers money as cheap as you now give it to our bankers, and they can pay high wages to labor, and compete with all the world.

Eleventh. For the purpose of testing the sense of the people upon the subject, we are in favor of submitting to a vote of the people an Amendment to the Constitution in favor of suffrage regardless of sex, and also on the subject of the liquor traffic.

Twelfth. All disabled soldiers of the late war should be equitably pensioned, and we denounce the policy of keeping a small army of office-holders whose only business is to prevent, on technical grounds, deserving soldiers from obtaining justice from the Government they helped to save.

Thirteenth. As our name indicates, we are a National party, knowing no East, no West, no North, no South. Having no sectional prejudices, we can properly place in nomination for the high offices of State as candidates men from any section of the Union.

Fourteenth. We appeal to all people who believe in our principles to aid us by voice, pen and votes.

NEW YORK STATE DEMOCRATIC PLATFORM, ADOPTED AT SARATOGA,

SEPTEMBER 25, 1885.

The Democrats of the State of New York in Convention assembled congratulate the peo-

ple of the whole Union upon the election and the inauguration of Grover Cleveland to be

President of the United States. We commend the wise and statesmanlike tone of his inaugural address and the significant public recognition in the selection of his Cabinet advisers of the fact that the union of these thirty eight indestructible States is at last thoroughly re-established. His firm, considerate, and conscientious conduct as President has already proved the falsity of the predictions of national calamity with which his enemies and the enemies of the Democratic party endeavored to alarm the public mind during the canvass. We hereby tender to him our hearty approbation of the public policy which has governed his official action, and we especially emphasize in our approbation the effort he has made to eradicate corruption and incompetency from the public service by the appointment of honest and capable Democrats, in order that there shall be a thorough and wholesome reform of the methods condemned by the people who confided to him the administration of his high official trust.

We heartily approve the administration of the State Government by Governor David B. Hill, its able head, and his efficient Democratic associates in other departments. Their fidelity to principle, devotion to official duty, strict regard for the public interests, unceasing efforts to secure economy in expenditure, and efficiency in every branch of official service, and the beneficent results of prosperity and good government which have attended their efforts have justly commended them to the confidence of the people.

An enumeration of the inhabitants of the State, as demanded by the Constitution, is all that is required for the purposes of equitable district representation. The elaborate census taken by the Federal Government, once in ten years affords detailed and complete information as to the progress and resources of the State. To duplicate this work and expense would, therefore, be a waste of public money.

We reaffirm the declarations of the Democratic National Conventions of 1875, 1880, and 1884 in regard to the necessity of reforming the Civil Service, but we condemn the actual administration of the existing Civil Service law, as the same has been executed by the Republican party. They have abused its provisions for the purpose of retaining Republicans in office; they have, through the machinery of the law, formulated lists of eligibles composed almost exclusively of Republicans; they have extended the period during which, by the provisions of the law, those eligible for appointment to office should remain on the registers, so as to exclude all Democrats from all offices within the rules of the Civil Service. We ask that the commission at Washington be reorganized, so that its majority shall be in sympathy with the Administration; that both parties be fairly represented in the examining boards; that the present lists of persons eligible for appointment be annulled. While, therefore, proclaiming our approbation of the general spirit which inspired the recent legislation of the Federal Government, and of the State of New York, to promote a needed reform of the Civil Service, we must, at the same time, place on record our wish and purpose that the proper officers of each Government charged with the execution of that legislation, and empowered to make suitable rules and regulations to carry it into effect, shall

take care that the Constitutional power of the Executive and heads of departments to make appointments shall not be impaired, and that the machinery, whatever it may be, for the testing of eligible candidates shall not be prostituted to unworthy purposes.

The Convention believes that the experiment of coining standard silver dollars in the hope of maintaining a fixed ratio with gold has gone far enough, and cannot be continued longer without great danger to the business interests of the country. The loss in interest alone on the silver dollars stored up in the Treasury is over \$4,000,000 per annum, and this accumulation of silver, purchased at a cost of \$180,000,000, is worth to-day not more than \$166,000,000, with every prospect of a further depreciation. We therefore demand the repeal of the act under which the compulsory coining of silver goes on, but we will welcome any practical measure of agreement with other nations by which the ratio of value between gold and silver may be made less fluctuating, but to this end, the first step must be the stoppage of any further compulsory coining of silver dollars.

The national Democratic platform pledges the party "to revise the tariff in a spirit of fairness to all interests." While it declares in favor of a reduction of taxation and the enlargement of a free list, in order to lessen the cost of production, it commits the party to a due regard for existing interests, as a "plain dictate of justice," and declares that American labor shall not be deprived of the ability "to compete successfully with foreign labor," and that the proposed duties shall be sufficient to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in this country. This Convention calls for a revision of the tariff upon the principles thus laid down, in order that the market for our products may be enlarged, and that industry may be relieved from unnecessary burdens, and the serious obstacles which have paralyzed its operations and narrowed up the field for the remunerative employment of labor and capital offered by the exhaustless natural resources of this country. We also demand that the methods of administration in the Custom Houses shall be thoroughly reformed, and the vexatious annoyances and oppressive regulations which have driven our own merchants out of business shall be swept away, and that the conduct of business between the people and the Government shall be made as simple and inexpensive as possible.

The people of the State having declared by a large majority their opposition to the contract system in prisons, we are opposed to contract convict labor in any form, and in favor of a proper substitute that will employ convicts according to the State account system.

We favor prohibiting the employment of children in the factories and other industrial establishments in the State under fourteen years of age.

We favor limiting the hours of labor to ten per day for all women employed in mills and other industrial establishments in the State.

We are in favor of such legislation as shall insure to honorably discharged soldiers and sailors of the late war for the preservation of the Union, priority in examination under the Civil Service laws and regulations of this State and the cities thereof, and upon passing such

examination successfully priority in certification and appointment over all other persons.

We favor lengthening and improving the locks of the canals, thereby doubling their capacity and reducing the cost of transportation between the lakes and the ocean.

The efforts of the Republican Legislatures of 1884 and 1885 having proved inadequate to prevent the manufacture and sale of counterfeit compounds in simulation of genuine butter

and cheese, the product of the dairy, we demand the enactment of such laws as shall effectually protect the people by prohibiting such fraud and deception.

We oppose all sumptuary and other laws that interfere with the Constitutional right of personal liberty, and favor the enactment of such excise laws as shall be alike just to all, considering the claims of all, and protecting their individual rights.

NEW YORK STATE REPUBLICAN PLATFORM, ADOPTED AT SARATOGA,
SEPTEMBER 23, 1885.

The Republican party of New York, in Convention represented, declares:

First. That the provisions of the existing Civil Service laws of the State and nation should be strengthened and extended to all grades of the public service to which they may be applicable, so that the selection of administrative officers in the Civil Service shall, so far as possible, be governed solely by capacity and fitness. We insist upon the enforcement of these laws by all public officials, not only in the letter but also in the spirit. Honorably discharged soldiers and sailors who are shown by competitive examination to possess the necessary requirements should be given the preference in certification and in appointment.

Second. That the laws affecting the government of cities shall be simplified so as to enable the people to fix responsibility with ease and certainty.

Third. That we demand of Congress the passage of an act putting an end to the enlargement of the stock by money formed of silver, or based upon silver. The maintenance of the gold standard, of the parity with gold of all kinds of money in use, is essential to the prosperity of our country, and the restoration of silver to the former position as good money through equality with gold before the law in a majority of commercial nations must remain, until accomplished, the chief aim of our monetary policy.

Fourth. That we emphasize the demand of the last National Republican Convention "that the imposition of duties on foreign imports shall be made, not for revenue only, but that in raising the requisite revenues for the Government such duties shall be so levied as to afford security to our diversified industries, and protection to the rights and wages of the laborer, to the end that active and intelligent labor, as well as capital, may have its just reward, and the laboring man his full share in the national prosperity." The persistent threats of the Democratic leaders to overthrow this policy add to the present troubles of trade and the paralysis of industry. Until the full effects of the revision of 1883 can be fairly estimated, agitation for the radical change of the tariff law is a gratuitous assault on the wages of labor, on all branches of production, and all the interests of traffic. We are opposed to the introduction of any system of free trade, the inevitable effect of which would be to destroy our mills and factories and to carry down American wages to the standard of the Old World.

Fifth. That while we cordially indorse the dying sentiments of the great soldier and citizen, Ulysses S. Grant, in favor of harmony and

good feeling between the North and the South, we insist that an end shall be put to the criminal evasion of the guarantees of equal civil and political rights promised by the Constitution to every freeman. The right of suffrage must be maintained free and untrammelled, and if that right is unlawfully denied to any part of the people of any State its representation in Congress and the Electoral College should be reduced.

Sixth. That the Legislature having, pursuant to the will of the people expressed at the polls, abolished the system of contract labor in the prisons of the State, we urge the enactment of laws tending to distribute as widely and equitably as possible the burden of competition with free labor.

Seventh. That in the letting of contracts for State work no contract should be awarded to any person or corporation discriminating against any class or organization of laborers.

Eighth. That we recommend legislation guaranteeing the benefits of the public schools to all the children of the State, and such control of factory employment as will surround the women and children employed therein with the necessary safeguards for their physical, mental and moral well-being.

Ninth. That stringent laws should be passed for the improvement of the sanitary condition of the homes of workingmen in cities.

Tenth. That we demand the strict enforcement by the national Government of the law prohibiting the importation of contract labor.

Eleventh. That we recommend legislation to foster the agricultural and dairy interests of the State, and such as will prevent the adulteration of articles of food.

Twelfth. That we favor the continuance of the Railroad Commission upon a non-partisan basis.

Thirteenth. That in the interest of cheap transportation for the country, and of reduced taxation for the people of this State, we declare in favor of asking the national Government to assist in the improvement of the locks and the deepening of the channel of the Erie Canal under State control.

Fourteenth. That the improvement in the system of taxation, commenced by recent Republican Legislatures, under which large sums have been collected from sources which previously escaped taxation, should be perfected and extended, so that the burden may fall equally upon all classes of property.

Fifteenth. We condemn the hypocrisy of the Democratic party in pledging itself before election to Civil Service Reform, and after election denouncing through its press and its leaders the Civil Service act as unconstitutional, while the

national Administration removes tried and faithful public servants and replaces them with persons whose only recommendation is active, and in some instances disreputable, political work.

Sixteenth. We denounce the hypocritical pretences under which faithful Republican officers are removed on the plea of offensive partisanship, while such men as Higgins, Thomas, Troop, Chase, Pillsbury, Aquila Jones and others, some of whose names appear upon the prison records of the country, and whose recommendation is political partisanship, are appointed in their places. While removing elsewhere, on the ground of offensive partisanship, Republicans who edit newspapers, the national Administration continues in a high judicial office in the city of New York a prominent Democratic appointee who publicly announces himself as having assumed, since his appointment, the control of an avowedly partisan journal.

We believe it the duty of the Republican majority of the Senate to oppose the confirmation of any person appointed in violation of the letter or spirit of the Civil Service act.

We denounce the national Administration for its obvious willingness to abandon the opinions they have professed upon currency, and to compromise with those leaders of their party who are

avowedly in favor of the continued debasement of the currency; for its hostility to the commerce of the country, evinced by its refusal to carry out the system adopted by Congress for the encouragement of American shipping; for its arbitrary action in repudiating a contract, regularly entered into by the duly authorized agents of the Government, and persevering in an attempt to deprive American mechanics of their means of livelihood until an aroused public opinion compelled it to abandon the attempt, and for its hostility further evinced by the arbitrary enforcement of the customs laws by illegal provisions and tricks intended to deprive merchants of any fair opportunity for asserting their rights.

We denounce the Democratic State Executive for his action in reference to the census, resulting in an extra session of the Legislature at a large and useless expense, while he vetoed necessary appropriations for the State Board of Health, in the face of a dreaded epidemic. We denounce his conduct in vetoing the Brooklyn reform bills in order to commend himself to the local Democratic leader, while he approved bills legalizing claims dating from the days of Tweed, and barred by the statute of limitations and judicial decisions, and thereby imposed additional burdens on an overburdened city.

* The Democratic party of to-day claims lineal descent from the first Republican party, and President Jefferson as its founder. † Political parties were disorganized at the time of the election of John Quincy Adams. He claimed to be a Republican, but was mainly supported by old Federalists. The opposition to his administration, composed mostly of Republicans, took the name of Democrats, and elected Jackson President.

Metric System of Weights and Measures.

THE metric system is based upon the distance from the equator to the pole. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Mètre*. The cube of the tenth part of the *mètre* was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo*, and *myria*, from the Greek, and the subdivisions by *deci*, *centi*, and *milli*, from the Latin:—

* Includes 148 Japanese.

† Colored includes also Indians taxed (or civilized), Chinese and Japanese. In California most of the population classified as colored are Chinese, and are not voters.

NOTE.—Alaska and the Indian Territory are not included in the above, not having been organized when the census of 1880 was taken. The population of Alaska (1880) was 30,178, mostly natives. The population of the Indian Territory was estimated at 70,000. Indians not taxed are excluded by law from the census. The estimated number in 1881 was about 245,000, excluding Alaska. The whole population of the United States in 1880 was estimated by Spofford at 50,500,000. The estimated population of the United States at the beginning of 1886 is 57,500,000.

The total male population of the United States in 1880 was 25,518,820; female, 24,636,963. The total native population was 43,475,840; foreign born, 6,679,943.

The centre of population in 1880 was in the State of Kentucky, one mile from the south bank of the Ohio River, one and a half miles from the village of Taylorsville, Ky., and eight miles west by south from the heart of the city of Cincinnati.

A noteworthy feature of the movement of the centre of population westward since 1790 is the closeness with which it has clung to the parallel of 39° North Latitude.

AGGREGATE BANKING CAPITAL AND DEPOSITS IN THE UNITED STATES, 1876-1882.

The following report by the Comptroller of the Currency shows the aggregate amount of capital and deposits of all the banking institutions of the United States for a series of years. The law repealing the tax on capital and deposits of State banks and private bankers went into effect November 30, 1882, and the Comptroller therefore has no data for continuing the table beyond that date.

The figures in the above table, from 1876 to 1884, inclusive, are taken from the Chronicle Fire Tables. The waste by fires in the United States during the past three years has averaged \$100,000,000 annually (an amount equal to double the annual interest charge on the national debt). To this must be added, the expense of maintaining fire-extinguishing departments and appliances and of conducting insurance companies, to obtain an estimate of what the people pay out on account of fire.

Expectation of Life.

The mortality tables governing life insurance, and in use in the United States, have been the "Combined Experience, or Actuaries' Table," based on the experience of seventeen English life-insurance companies, deduced from 62,537 policies, and the "American Experience Table," arranged by Mr. Sheppard Homans in 1868, from the experience of the Mutual Life Insurance Company of New York and other companies. These not being a fair expression of the mortality of American assured lives, the American Chamber of Life Insurance, in 1872, began the collection of statistics of mortality experience. After ten years the work was completed, and it embraces the experience of thirty American life-insurance companies, covering more than a million policies. The following table is made up from it, and shows, on the average, the number of additional years which any person may expect to live, at a given age:

United States Civil Service Rules.

THE regulations prescribed by the act of January 16, 1883, entitled "An act to regulate and improve the Civil Service of the United States," and acts amendatory thereof, are under the direction of the United States Civil Service Commission, which is composed of three persons, appointed by the President and confirmed by the Senate.

The purpose of the Civil Service law is stated by the act to be "For open, competitive examinations for testing the fitness of applicants for the public service now classified, or to be classified hereafter. Such examinations shall be practical in their character, and so far as may be shall relate to those matters which will fairly test the relative capacity and fitness of the persons examined to discharge the duties of the service into which they seek to be appointed;" also "There shall be non-competitive examinations in all proper cases, before the commission, when competent persons do not compete, after notice has been given of the vacancy."

The Commission appoints a chief examiner, and it also appoints examining boards for Washington and for each State and Territory where examinations are to take place, each board consisting of not less than three persons who are in the official service of the United States, and who reside in such States and Territories. The address of the Commission is Washington, D. C.

CLASSIFICATION.

There are three branches of the public service classified under the Civil Service act: 1. Offices classified in the departments at Washington are designated as "The Classified Departmental Service." 2. Those classified under any collector, naval officer, surveyor or appraiser in any customs district are designated as "The Classified Customs Service." 3. Those classified under any postmaster are designated as "The Classified Postal Service."

The Departmental Service embraces the clerkships (except those excepted from examination) in all the departments at Washington except the State department. The Customs Service embraces the customs districts where the officials are as many as fifty. The Postal Service embraces the post-offices where the officials are as many as fifty. For places in the Departmental Service, where technical additional qualifications are needed, special examinations are held. These are held for the State Department, the Pension, Patent and Signal offices, and the Geological Survey.

APPLICATIONS.

Applicants for examination must be citizens of the United States of the proper age. No person habitually using intoxicating liquors can be appointed. No discrimination is made on account of sex, color, or political or religious opinions. The qualified age for examinations for the Departmental and Customs services is 18 to 45, and for the Postal Service 16 to 35. But the limitations of age do not apply to applicants honorably discharged from the military or naval service of the country. Applicants must furnish proof of mental and physical fitness.

Every one seeking to be examined must first file an application blank. The blank for the Departmental Service should be requested directly of the Civil Service Commission, at Washington; for the Customs Service, of the head of the custom office which the applicant seeks to enter; for the Postal Service, of the head of the post-office which the applicant seeks to enter. These papers should be returned to the officers from whom they emanated.

EXAMINATIONS.

The applicants to enter the services designated are examined as to their relative capacity and fitness on the following subjects: First, orthography, penmanship, and copying; second, arithmetic—fundamental rules, fractions and percentages; third, interest, discount, and elements of book-keeping and of accounts; fourth, elements of the English language, letter-writing, and the proper construction of sentences; fifth, elements of geography, history, and the government of the United States. No one will be certified for appointment whose standing upon a just grading in the general examination is less than 65 per centum of a complete proficiency in the three first subjects mentioned; and that measure of proficiency will be deemed adequate.

The law also prescribes competitive examinations to test the fitness of persons in the service, for promotion therein.

Persons passing an examination are graded and registered. The Commission gives a certificate to the person, stating the grade which he has attained on examination, and his proficiency in the several subjects shown by the markings.

APPOINTMENTS.

When there is a vacancy to be filled the appointing officer applies to the Commission or proper examining board, and it reports to him the names of the four persons graded highest on the proper register of those in his branch of the service and remaining eligible, and from the said four a selection must be made.

In making the selection, persons honorably discharged from the military and naval service of the United States, by reason of disability resulting from wounds or sickness incurred in the line of duty, must be preferred, provided they are otherwise fitted for the discharge of the duties.

Every appointment is made for a probationary period of six months, at the end of which time, if the conduct and capacity of the person appointed have been found satisfactory, the appointment is made absolute.

EXCEPTIONS FROM EXAMINATIONS.

The following are excepted from examination for appointments: confidential clerks of heads of departments or offices, cashiers of collectors and postmasters, superintendents of money-order divisions in post-offices, custodians of money for whose fidelity another officer is under bond, disbursing officers who give bonds, persons in the secret service, translators, interpreters, stenographers, persons whose employment is exclusively professional and chief clerks, deputy collectors and superintendents and chiefs of divisions or bureaus.

Officers requiring to be confirmed by the Senate, laborers and workmen do not come within the jurisdiction of the Civil Service rules.

The Silver Question.

In all civilized countries either gold or silver has been adopted as the standard of monetary value. The following is a list of the most important countries in the world, divided into three groups, those using (1) a gold standard, (2) a silver standard, (3) a double or variable standard. Of these last it may be said that the term "variable" is preferable to that of "double," inasmuch as the double standard never exists at one and the same time, gold or silver becoming alternately the standard, as the state of the exchanges makes the one or the other the more desirable as the practical medium of exchange.

THE PRESIDENT ON THE COMPULSORY COINAGE OF SILVER.

In recommending the suspension of the compulsory coinage of silver dollars directed by the law passed in February, 1878, the President, in his Message to Congress, December, 1885, said:

"Since February, 1878, the Government has, under the compulsory provisions of law, purchased silver bullion and coined the same at the rate of more than 2,000,000 every month. By this process up to the present date 215,759,431 silver dollars have been coined. A reasonable appreciation of a delegation of power to the General Government would limit its exercise without express restrictive words to the people's needs and the requirements of the public welfare. Upon this theory, the authority to 'coin money' given to Congress by the Constitution, if it permits the purchase by the Government of bullion for coinage in any event, does not justify such purchase and coinage to an extent beyond the amount needed for a sufficient circulating medium.

"The desire to utilize the silver product of the country should not lead to a misuse or the perversion of this power. The necessity for such an addition to the silver currency of the nation as is compelled by the silver coinage act is negated by the fact that up to the present time only about fifty millions of the silver dollars so coined have actually found their way into circulation, leaving more than one hundred and sixty-five millions in the possession of the Government, the custody of which has entailed a considerable expense for the construction of vaults for its deposit. Against this latter amount there are outstanding silver certificates amounting to about \$93,000,000.

"Every month two millions of gold in the public Treasury are paid out for two millions or more of silver dollars, to be added to the idle mass already accumulated. If continued long enough this operation will result in the substitution of silver for all the gold the Government owns applicable to its general purposes. It will not do to rely upon the customs receipts of the Government to make good this drain of gold, because the silver thus coined having been made legal tender for all debts and dues, public and private, at times during the last six months 58 per cent of the receipts for duties have been in silver or silver certificates, while the average within that period has been 20 per cent. The proportion of silver and its certificates received by the Government will probably increase as time goes on, for the reason that the nearer the period approaches when it will be obliged to offer silver in payment of its obligations, the greater inducement there will be to hoard gold against depreciation in the value of silver, or for the purpose of speculating. This hoarding of gold has already begun. When the time comes that gold has been withdrawn from circulation, then will be apparent the difference between the real value of the silver dollar and a dollar in gold, and the two coins will part company. Gold, still the standard of value, and necessary in our dealings with other countries, will be at a premium over silver; banks which have substituted gold for the deposits of their customers may pay them with silver bought with such gold, thus making a handsome profit; rich speculators will sell their hoarded gold to their neighbors who need it to liquidate their foreign debts at a ruinous premium over silver, and the laboring men and women of the land, most defenceless of all, will find that the dollar received for the wage of their toil has sadly shrunk in its purchasing power.

"It may be said that the latter result will be but temporary, and that ultimately the price of labor will be adjusted to the change; but even if this takes place the wageworker cannot possibly gain, but must inevitably lose, since the price he is compelled to pay for his living will not only be measured in a coin heavily depreciated and fluctuating and uncertain in its value, but this uncertainty in the value of the purchasing medium will be made the pretext for an advance in prices beyond that justified by actual depreciation.

"That disaster has not already overtaken us furnishes no proof that danger does not wait upon a continuation of the present silver coinage. We have been saved by the most careful management and unusual expedients, by a combination of fortunate conditions, and by a confident expectation that the course of the Government in regard to silver coinage would be speedily changed by the action of Congress. Prosperity hesitates upon our threshold because of the dangers and uncertainties surrounding this question. Capital timidly shrinks from trade, and investors are unwilling to take the chance of the questionable shape in which their money will be returned to them, while enterprise halts at a risk against which care and sagacious management do not protect. As a necessary consequence labor lacks employment, and suffering and distress are visited upon a portion of our fellow-citizens especially entitled to the careful consideration of those charged with the duties of legislation. No interest appeals to us so strongly for a safe and stable currency as the vast army of the unemployed."

THE SILVER QUESTION—Continued.

THE OPPOSING VIEWS IN THE CONTROVERSY STATED.

The main issue as to the relative or combined merits of silver and gold as media of exchange is not the question immediately before the people of the United States at the present time. It is whether the Compulsory Coinage law shall be continued under the present circumstances, or suspended until a permanent definite policy with respect to our standard of value is duly considered and decided upon. Practically we have a gold standard; legally we have a double one of gold and silver. The law makes a dollar of 412½ grains of silver nine-tenths fine equal, in a debt-paying capacity, to a gold dollar of 25 8-10th grains nine-tenths fine, although the gold dollar will purchase more than 575 grains of silver bullion of standard fineness. There is a discrepancy of more than 20 per cent here, and in this difference lies the bone of contention.

The supporters of the gold standard claim that there can be but one standard; that in obedience to Gresham's law the cheaper metal will always drive out the dearer, and that the continued coinage of silver will eventually drive out the gold and reduce our standard 20 per cent or more in value, thereby affecting debits and credits accordingly. They claim that to permit this to take place will be unwise in an economic sense, and immoral in that it partakes of repudiation; that it will separate the basis of our financial system from that of the other civilized commercial nations of the world. President Cleveland, in his Message, shows that his sympathies are very strongly enlisted on this side of the question.

The supporters of the continued coinage claim that we are a silver-producing nation and interested in finding as much use for it as possible; that there will be no repudiation in coming to the silver standard, since, with the exception of about five years, it has always been legal tender. They fail to see that any disaster will accrue if it is allowed to prevail, and regard its opponents as in some way influenced in favor of the rich as against the poor—the capitalists of the East as against the agricultural masses of the West and South.

There is a middle class who have no particular leaning either way, but join the gold men in behalf of suspension until a clearer intelligence is reached by the people as to what had best be done. The silver men, or bimetalists of the Cernuschi school, who hoped to see a common agreement among the principal nations arrived at, favor at least temporary suspension as the best means of attaining in the end what they desire.

As to the working people; it is to their interest that the purchasing power of the few dollars they can earn should not be diminished, as certainly would be the case were the 412½ grain dollar to drop from its token to its bullion value. Those who have fixed wages under contract would suffer to the extent of the depreciation, which is now 20 per cent. Those having small annuities or definite sums left them by will, or due them in any way, would also suffer. It is very decidedly to the workingman's interest to have his dollar as good as possible, and 100 cents worth of gold makes a better dollar than 80 cents worth of silver. It is therefore to his interest that the flood of silver dollars should not be permitted to rise any higher and further endanger the present real standard.—The World, December 30, 1885.

STATEMENT SHOWING THE SPACE REQUIRED FOR THE STORAGE OF UNITED STATES GOLD AND SILVER COINS.

Description.	Amount.	How Put Up.	Space Required.
Gold coin.....	\$1,000,000	\$5,000 in 8-oz. duck bags.	Nearly 17 cubic feet.
Silver dollars.....	1,000,000	1,000 in 8-oz. duck bags.	250 cubic feet.
Subsidiary silver.....	1,000,000	1,000 in 8-oz. duck bags.	150 cubic feet.

The space occupied by a bag of standard silver dollars, piled snugly in mass, is 12 inches long, 9 wide, and 4 deep. Small silver (subsidiary) packs better than dollars. The weight of a thousand dollars in subsidiary silver being 56 ounces less than that of an equal value in standard silver dollars, the spaces occupied by each vary but little from each other.

The Public Lands of the United States.

The following is a tabular statement, prepared by the General Land Office, showing the number of acres of public lands of the United States surveyed in the land States, and Territories up to June 30, 1884, during the past fiscal year, and the total of the public lands surveyed up to June 30, 1885; also the total area of the public domain remaining unsurveyed within the same.

The total number of acres of public lands granted by the United States to States and corporations for railroads up to June 30, 1885, was 48,149,525. Of this 667,741 acres have since been declared forfeited by the United States, leaving a remainder of 47,481,784 acres.

The public lands of the United States still unsold and open to settlement are divided into two classes, one class being sold by the Government for \$1.25 per acre as the minimum price, the other at \$2.50 per acre, being the alternate sections reserved by the United States in land grants to railroads, etc. Such tracts are sold upon application to the Land Register. Heads of families, or citizens over twenty-one years, who may settle upon any quarter section (or 160 acres) have the right under the pre-emption law of prior claim to purchase, on complying with the regulations.

Under the homestead laws, any citizen, or intending citizen, has the right to 160 acres of the \$1.25 land, or 80 acres of the \$2.50 land, after an actual settlement and cultivation of the same for five years. Under the timber culture law, any settler who has cultivated for two years as much as five acres in trees of an 80-acre homestead, or ten acres of a homestead of 160 acres, is entitled to a free patent for the land at the end of three years.

Naturalization Laws of the United States.

THE conditions under and the manner in which an alien may be admitted to become a citizen of the United States are prescribed by Sections 2165-74 of the Revised Statutes of the United States.

DECLARATION OF INTENTION.

The alien must declare upon oath before a circuit or district court of the United States, or a district or supreme court of the Territories, or a court of record of any of the States having common law jurisdiction, and a seal and clerk, two years at least prior to his admission, that it is, *bona fide*, his intention to become a citizen of the United States, and to renounce forever all allegiance and fidelity to any foreign prince or State, and particularly to the one of which he may be at the time a citizen or subject.

OATH ON APPLICATION FOR ADMISSION.

He must, at the time of his application to be admitted, declare on oath, before some one of the courts above specified, "that he will support the constitution of the United States, and that he absolutely and entirely renounces and abjures all allegiance and fidelity to every foreign prince, potentate, State or sovereignty, and particularly, by name, to the prince, potentate, state or sovereignty of which he was before a citizen or subject," which proceedings must be recorded by the clerk of the court.

CONDITIONS FOR CITIZENSHIP.

If it shall appear to the satisfaction of the court to which the alien has applied that he has resided continuously within the United States for at least five years, and within the State or territory where such court is at the time held one year at least; and that during that time "he has behaved as a man of good moral character, attached to the principles of the constitution of the United States, and well disposed to the good order and happiness of the same," he will be admitted to citizenship.

TITLES OF NOBILITY.

If the applicant has borne any hereditary title or order of nobility he must make an express renunciation of the same at the time of his application.

SOLDIERS.

Any alien of the age of twenty-one years and upward, who has been in the armies of the United States and has been honorably discharged therefrom, may become a citizen on his petition, without any previous declaration of intention, provided that he has resided in the United States at least one year previous to his application and is of good moral character.

MINORS.

Any alien under the age of twenty-one years who has resided in the United States three years next preceding his arriving at that age, and who has continued to reside therein to the time he may make application to be admitted a citizen thereof, may, after he arrives at the age of twenty one years, and after he has resided five years within the United States, including the three years of his minority, be admitted a citizen; but he must make a declaration on oath and prove to the satisfaction of the court that for two years next preceding it his been his *bona fide* intention to become a citizen.

CHILDREN OF NATURALIZED CITIZENS.

The children of persons who have been duly naturalized, being under the age of twenty-one years at the time of the naturalization of their parents, shall, if dwelling in the United States, be considered as citizens thereof.

CITIZENS' CHILDREN WHO ARE BORN ABROAD.

The children of persons who now are or have been citizens of the United States are, though born out of the limits and jurisdiction of the United States, considered as citizens thereof.

PROTECTION ABROAD TO NATURALIZED CITIZENS.

Section 2000 of the Revised Statutes of the United States declares that "all naturalized citizens of the United States while in foreign countries are entitled to and shall receive from this Government the same protection of persons and property which is accorded to native-born citizens."

OUR CENTRAL AND SOUTH AMERICAN NEIGHBORS.

STATISTICS OF OUR TRADE WITH THEM, COMPARED WITH THAT OF GREAT BRITAIN, FRANCE, AND GERMANY.

The following statistics have been compiled from United States Consular reports and from blue books, and can be regarded, as a whole, as an approximate exhibit of the trade relations of the United States and the three leading European nations with Mexico and Central and South America. In consequence of the imperfect method of keeping trade records in most of the Central and South American countries, it has been impossible to obtain complete statistics from them collectively, covering any one year's commerce. The best data available for separate years, therefore, has been taken. Though the exhibit, therefore, is not a perfect one, it is relatively correct, and the best that can be made under present circumstances. It shows how largely Europe, through our indifference, mismanagement, and obstructive laws, takes away from us our natural trade with our neighbors.

* Exclusive of Nicaragua. † Mexican exports of 1884. ‡ No data obtainable for the year reported. The imports and exports of Bolivia and Paraguay are almost wholly through adjacent countries.

Total trade of Great Britain, France, and Germany with Central and South American countries, \$433,137,353. Total trade of the United States with the same countries, \$124,100,297. If to the total trade of the three European countries named that of Spain, Italy, and other European countries (of which data is imperfect) be added, it will be shown that the trade of Europe with Central and South America is upward of \$500,000,000 as against the United States' trade of about \$125,000,000. In other words, the United States does, with its own neighbors, less than twenty per cent of the world's trade with them.

The following statement, furnished by the Secretary of State of the United States, showing the direct exports by principal manufacturers of Great Britain, France, and the United States to South America, will enable exporters to note the difference in the character of the trade of the first two countries as compared with ours.

The foregoing table shows how inexcusably we run behind Great Britain and France in the commerce of this continent, even in those manufactures in which we most excel, and in which we lead those countries wherever we put the necessary trade appliances in motion. In cotton manufactures the sales of Great Britain are as \$15 to our \$1, and when this is reduced to quantity, the disproportion is much greater on account of the cheaper quality of the British goods.

Total.....	1,461	1,060,264.73	19,123	2,455,720.57

The total number of vessels engaged in the coasting trade, excluding those engaged in the fisheries and upon the Northern lakes and Western rivers, is 15,918, and their tonnage 2,001,917.73.
 The estimated value of the whole amount of floating property under the flag, by adopting the methods of calculation usually made use of and allowing 10 per cent for the difference between wooden and iron vessels, is about \$180,000,000.

Patent Office Procedure.

PATENTS are issued in the name of the United States, and under the seal of the Patent Office to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter, or any new and useful improvement thereof, not known or used by others in this country, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof, and not in public use or on sale for more than two years prior to his application, unless the same is proved to have been abandoned; and by any person who, by his own industry, genius, efforts, and expense has invented and produced any new and original design for a manufacture, bust, statue, alto-relievo, or bas-relief; any new and original design for the printing of woollen, silk, cotton, or other fabrics; any new and original impression, ornament, pattern, print, or picture to be printed, painted, cast, or otherwise placed on or worked into any article of manufacture; or any new, useful, and original shape or configuration of any article of manufacture, the same not having been known nor used by others before his invention or production thereof, nor patented nor described in any printed publication, upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees.

The receipt of letters patent from a foreign government will not prevent the inventor from obtaining a patent in the United States, unless the invention shall have been introduced into public use in the United States more than two years prior to the application. But every patent granted for an invention which has been previously patented by the same inventor in a foreign country will be so limited as to expire at the same time with the foreign patent, or, if there be more than one, at the same time with the one having the shortest unexpired term, but in no case will it be in force more than seventeen years.

APPLICATIONS.

Application for a patent must be made in writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the same, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor and attested by two witnesses.

When the nature of the case admits of drawings, the applicant must furnish one copy signed by the inventor or his attorney in fact, and attested by two witnesses, to be filed in the Patent Office. In all cases which admit of representation by model, the applicant, if required by the commissioner, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen. Such oath may be made before any person within the United States authorized by law to administer oaths, or when the applicant resides in a foreign country, before any minister, chargé d'affaires, consul, or commercial agent, holding commission under the Government of the United States, or before any notary public of the foreign country in which the applicant may be.

On the filing of such application and the payment of the fees required by law, if, on such examination, it appears that the claimant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the commissioner will issue a patent therefor.

ASSIGNMENTS.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

REISSUES.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without any fraudulent or deceptive intention. In the cases of patents issued and assigned prior to July 8th, 1870, the applications for reissue may be made by the assignees; but in the cases of patents issued or assigned since that date the applications must be made and the specification sworn to by the inventors, if they be living.

CAVEATS.

A caveat, under the patent law, is a notice given to the office of the caveator's claim as inventor, in order to prevent the grant of a patent to another for the same alleged invention upon an application filed during the life of the caveat without notice to the caveator.

Any citizen of the United States who has made a new invention or discovery, and desires further time to mature the same may, on payment of a fee of ten dollars, file in the patent office a caveat setting forth the object and the distinguishing characteristics of the invention, and praying protection of his right until he shall have matured his invention. Such caveat shall be filed in the confidential archives of the office and preserved in secrecy, and shall be operative for the term of one year from the filing thereof.

An alien has the same privilege, if he has resided in the United States one year next preceding the filing of his caveat, and has made oath of his intention to become a citizen.

The caveat must comprise a specification, oath, and, when the nature of the case admits of it, a drawing, and, like the application, must be limited to a single invention or improvement.

PATENT OFFICE PROCEDURE—Continued.

FEES.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, \$15. On issuing each original patent, \$20. In design cases: For three years and six months, \$10; for seven years, \$15; for fourteen years, \$30. On filing each caveat, \$10. On every application for the reissue of a patent, \$30. On filing each disclaimer, \$10. For certified copies of patents and other papers, including certified printed copies, ten cents per hundred words. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, \$1; of over three hundred and under one thousand words, \$2; of over one thousand words, \$3. For copies of drawings, the reasonable cost of making them.

PATENT OFFICE STATISTICS.

The receipts of the Patent Office during the fiscal year 1884-85 were \$1,074,974, and expenditures, \$934,123. Receipts over expenditures, \$140,851.

The following is a statement of the business of the office during the fiscal year, 1884-85:

The total number of applications filed at the Patent Office in forty-seven years, 1837-1883, was 485,625; number of caveats filed, 73,746; number of patents issued, 317,248. Receipts, \$17,072,728; expenditures, \$14,359,665. Net surplus, \$2,722,072.

Copyright Law of the United States.

Any citizen of the United States, or resident therein, who is the author, inventor, designer, or proprietor of any book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph or negative thereof, or of a painting, drawing, chromo, statue, statuary, and of models or designs intended to be perfected as works of the fine arts, and the executors, administrators, or assigns of any such person, may secure to himself the sole liberty of printing, publishing, completing, copying, executing, and vending the same, and, if a dramatic composition, or publicly performing or representing it, or causing it to be performed or represented by others.

Every applicant for a copyright must state distinctly the name and residence of the claimant, and whether right is claimed as author, designer, or proprietor. No affidavit or formal application is required.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph, or a description of the painting, drawing, chromo, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be sent by mail or otherwise, prepaid, addressed, "LIBRARIAN OF CONGRESS, WASHINGTON, D.C." This must be done before publication of the book or other article.

A fee of 50 cents, for recording the title of each book or other article, must be inclosed with the title as above, and 50 cents in addition (or one dollar in all) for each certificate of copyright under seal of the Librarian of Congress, which will be transmitted by early mail.

Within ten days after publication of each book or other article, two complete copies must be sent prepaid, or under free labels, furnished by the Librarian, to perfect the copyright, with the address, "LIBRARIAN OF CONGRESS, WASHINGTON, D.C."

Without the deposit of copies above required the copyright is void, and a penalty of \$25 is incurred.

No copyright is valid unless notice is given by inserting in every copy published:
"Entered according to act of Congress, in the year—, by—, in the office of the Librarian of Congress, at Washington," or, at the option of the person entering the copyright, the words: "Copyright, 18—, by—"

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice "Entered according to act of Congress," or "Copyright," or words of the same import, in or upon any book or other article.

Each copyright secures the exclusive right of publishing the book or article copyrighted for the term of twenty-eight years. Six months before the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all.

Any copyright is assignable in law by any instrument of writing, but such assignment must be recorded in the office of the Librarian of Congress within sixty days from its date. The fee for this record and certificate is one dollar.

Any author may reserve the right to translate or to dramatize his own work. In this case notice should be given by printing the words "Right of Translation Reserved," or "All Rights Reserved," below the notice of copyright entry, and notifying the Librarian of Congress of such reservation, to be entered upon the record.

In the case of books published in more than one volume, or of periodicals published in numbers, or of engravings, photographs, or other articles published with variations, a copyright is to be entered for each volume or part of a book, or number of a periodical, or variety, as to style, title, or inscription, of any other article.

Copyrights cannot be granted upon trade-marks, nor upon labels intended to be used with any article of manufacture. If protection for such prints or labels is desired, application must be made to the Patent Office, where they are registered at a fee of \$6 for labels and \$25 for trade-marks.

INTERNATIONAL COPYRIGHT.

A bill has been introduced into the present Congress of the United States, at the instance of the American Copyright League, providing "that the citizens of foreign states and countries of which the laws, treaties, or conventions confer, or shall hereafter confer, upon citizens of the United States rights of copyright equal to those accorded to their own citizens, shall have in the United States rights of copyright equal to those enjoyed by citizens of the United States."

Queen Victoria's Family.

JANUARY 1, 1886.

QUEEN VICTORIA was born May 24, 1819; succeeded her uncle, King William IV., June 20, 1837; married February 10, 1840, Prince Albert of Coburg and Gotha, who died in 1861. Their children were:

1. The Crown Princess of Germany (Victoria), born 1840; married, 1858, Frederick William, eldest son of the Emperor of Germany. Issue, four sons and four daughters, and three grandchildren.

2. The Prince of Wales (Albert Edward), born 1841; married, 1863, the Princess Alexandra of Denmark. Issue, three sons and three daughters. The eldest son is Prince Victor, born 1864.

3. The Grand Duchess of Hesse (Alice), born 1843, died 1878; married, 1862, the Grand Duke of Hesse. Issue, two sons and five daughters. The eldest daughter married Prince Louis of Battenberg, 1884, and has a daughter.

4. The Duke of Edinburgh (Alfred), born 1844; married, 1874, the Grand Duchess Marie, of Russia. Issue, one son and three daughters.

5. Princess Christian (Helena), born 1846; married, 1866, Prince Christian of Schleswig-Holstein. Issue, three sons and two daughters.

6. Princess Louise, born 1848; married, 1871, the Marquis of Lorne, eldest son of the Duke of Argyll. No issue.

7. The Duke of Connaught (Arthur), born 1850; married, 1879, the Princess Louise of Prussia. Issue, one son and one daughter.

8. The Duke of Albany (Leopold), born 1853, died 1884; married, 1882, the Princess Helen of Waldeck. Issue, one son and one daughter.

ARMY RETIRED LIST.

The names of retired officers of the army are borne on two lists; one known as the four hundred, or limited list, and the other as officers retired by operation of law, or the unlimited list. The retired list was originally established on August 3, 1861, and the number of officers was, in 1878, limited to 400. An officer who has served forty consecutive years as a commissioned officer shall be retired on his own application to the President. An officer who has been thirty years in service may on his own application be retired by the President, in his discretion. An officer who has served forty-five years as a commissioned officer, or is sixty-two years of age, may be retired by the President, in his discretion, without application by the officer. An officer who is examined by a retiring board, and found to be incapacitated for active service, such incapacity being a result of an incident of service, he shall be retired from active service; and when such incapacity is not the result of any incident of the service he shall be retired from active service or wholly retired, in the discretion of the President. All retirements under these laws are made to the four hundred list. By the act of June 30, 1882, an officer who has served forty years in the regular volunteer service as an officer or soldier, or both, must be retired on his own application to the President; and when an officer is sixty-four years of age he must be placed on the retired list. All retirements under this law go to what is known as the unlimited list.—Hudson's Army and Navy List.

Of the 1,191 vessels, 1,098 were steamers carrying 44,221,791 bushels of grain, and 93 sailers carrying 2,881,473 bushels. More grain by 1,700,477 bushels were shipped from New-York in 1885 than in 1884, but there was a tremendous falling off from 1880, when 113,343,163 bushels were carried. The following are the totals for each year since 1879:

YEAR.	Steam.	Sail.	Total.	YEAR.	Steam.	Sail.	Total.

Clearing Houses of the World.

COMPARISON OF THEIR EXCHANGES.

The following figures from *The Financier* show that the New-York Clearing House transacts the largest business of any clearing house in the world, and that its annual exchanges exceed those of London by more than \$8,000,000,000, and lack only \$273,400,000 of equaling the aggregate exchanges of London, Boston, Philadelphia, and Chicago. The following are the principal clearing houses, and the figures represent the amount of their exchanges.

Marriage and Divorce Laws.

Marriage, Licenses. Required in all the States and Territories except Dakota, Montana, New-Mexico, New-Jersey, and New-York. In Maryland legal marriage can be had only by an ordained minister.

Marriage, Prohibition of. Marriages between whites and persons of negro descent are prohibited and punishable in California, Colorado, Delaware, Georgia, Florida, Kentucky, Maryland, Mississippi, Missouri, Nebraska, North Carolina, Oregon, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

Marriages between whites and Indians are prohibited in Arizona and North Carolina.

Marriages between whites and Chinese are prohibited in Arizona.

The marriage of first cousins is forbidden in Arkansas, Dakota, Indiana, Kansas, Montana, Nevada, New-Mexico, Ohio, Washington Territory, and Wyoming, and in some of them is declared incestuous and void.

Marriage, Age to Contract. In New-Jersey and Ohio males under twenty-one years and females under eighteen years of age must obtain the consent of parents or guardians. In Massachusetts a marriage between a male over fourteen and a female over twelve is legal, even without the consent of parents.

Marriage, Presumption of. In Missouri it has been held that where parties cohabit and represent themselves as husband and wife, a marriage is presumed, and when parties capable of contracting agree, in express terms, with each other, to be husband and wife, and cohabit as such, the marriage is valid, without any further ceremony being performed. In California marriage is declared a civil contract; consent, followed by a mutual assumption of marital rights and obligations, is sufficient.

Divorce, Previous Residence Required. Dakota, ninety days; Arizona, Idaho, Nebraska, Nevada, and Wyoming, six months; Colorado, Illinois, Iowa, Kansas, Kentucky, Maine, Mississippi, Minnesota, Montana, New-Hampshire, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont (both parties, as husband and wife), West Virginia, and Wisconsin, one year; Florida, Indiana, Maryland, North Carolina, and Tennessee, two years; Connecticut, Massachusetts, and New-Jersey (for desertion), three years.

Divorce, Causes for. The violation of the marriage vow is cause for absolute divorce in all the States, excepting South Carolina, which has no divorce law.

Wilful desertion, one year, in Arizona, Arkansas, Colorado, Dakota, Florida, Idaho, Kansas, Kentucky, Montana, Nevada, Rhode Island, Utah, Wisconsin, and Wyoming.

Wilful desertion, two years, in Alabama, Illinois, Indiana, Iowa, Michigan, Mississippi, Nebraska, Pennsylvania, Tennessee.

Wilful desertion, three years, in Connecticut, Delaware, Georgia, Maine, Maryland, Massachusetts, Minnesota, New-Hampshire, New-Jersey, Ohio, Oregon, Vermont, and West Virginia.

Wilful desertion, five years, in Virginia.

Habitual drunkenness, in all the States *except* Louisiana, Maryland, New-Jersey, New-York, North Carolina, Pennsylvania, South Carolina, Texas, Vermont, Virginia, and West Virginia.

Imprisonment for felony or conviction of felony, in all the States *except* Florida, Louisiana, Maine, Maryland, Nevada, New-Jersey, New-York, North Carolina, Rhode Island, South Carolina, and Wisconsin.

"Cruel and abusive treatment," "intolerable cruelty," "extreme cruelty" or "inhuman treatment," in all the States *except* Florida, Kentucky, Louisiana, Maryland, Michigan, New-York, North Carolina, Pennsylvania, South Carolina, Tennessee, and West Virginia.

Failure to provide: one year in California, Nevada, and Wyoming; two years in Indiana and Idaho; three years in Massachusetts; no time specified in Maine, Nebraska, Rhode Island, and Vermont. "Gross neglect of duty" in Kansas; wilful neglect for three years, in Delaware.

Fraud and fraudulent contract, in Connecticut, Georgia, Idaho, Kansas, Ohio, and Pennsylvania.

Absence without being heard of, in New-Hampshire; absence two years, in Tennessee; seven years, in Connecticut and Vermont; absence without reasonable cause one year, in Missouri; separation five years, in Kentucky; voluntary separation, five years, in Wisconsin.

Ungovernable temper, in Kentucky; "habitual indulgence in violent and ungovernable temper," in Florida; "such indignities as make life intolerable," in Missouri and Wyoming; "indignities as render life burdensome," in Oregon and Pennsylvania.

Other causes in different States are as follows: "Husband notoriously immoral before marriage, unknown to wife," in West Virginia; "fugitive from justice," in Virginia; "gross misbehavior or wickedness," in Rhode Island; "attempt on life," in Illinois; "refusal of wife to remove into the State," in Tennessee; "mental incapacity at time of marriage," in Georgia; "three years with any religious society that believes the marriage relation unlawful," in Massachusetts; "joining any religious sect that believes marriage unlawful, and refusing to cohabit six months," in New-Hampshire; "parties cannot live in peace and union," in Utah; "settled aversion, which tends to permanently destroy all peace and happiness," in Kentucky.

In Georgia an absolute divorce is granted only after the concurrent verdict of two juries, at different terms of the court. In New-York absolute divorce is granted for but one cause, adultery. In South Carolina there is no divorce law.

All of the causes above enumerated are for absolute or full divorce.

Divorce, Remarriage. There are no restrictions upon remarriage by divorced persons in Connecticut, Kentucky, Illinois, and Minnesota. Either party may remarry, but defendant must wait two years and obtain permission from the court in Massachusetts. The decree of the court may restrain the guilty party from remarrying in Virginia. Parties cannot remarry until after two years, except by permission of the court, in Maine. In the State of New-York the plaintiff may remarry, but the defendant cannot do so during the plaintiff's life-time, unless the decree be modified or proof that five years have elapsed and that complainant has married again and defendant's conduct has been uniformly good. Any violation of this is punished as bigamy, even though the other party has been married.

The courts of every State, and particularly of New-York, are very jealous of their jurisdiction, and generally refuse to recognize as valid a divorce against one of the citizens of the State by the court of another State, unless both parties to the suit were subject at the time to the jurisdiction of the court granting the divorce.

Kansas courts grant divorces for the reason that the applicant's husband or wife has obtained a divorce in another State and the applicant has been forbidden to remarry. If a wife in New-York obtains a divorce from her husband, and he is forbidden to remarry, he may go to Kansas and obtain a divorce on that ground. If his wife contests the case, or can be served with the papers in Kansas, so that she is brought under the jurisdiction of the Kansas court, the courts of New-York must recognize the divorce as valid, and cannot punish the husband for remarrying in New-York.

New-York permits polygamy and polyandry in certain cases. Desertion for five years, without knowledge that the deserter is living, permits the one deserted to marry again; and the second marriage is valid, though the deserter returns. The second marriage may be declared void, but only from the date of the decree, by a court of competent jurisdiction, upon proper petition; but if no such petition is made, and all parties are satisfied, one husband may live in lawful wedlock with two or more wives, or one wife with two or more husbands. The children will inherit, and both wives will be entitled to dower.

Weather Signals of the U. S. Signal Service.

The following cuts represent the flags in use where Weather Signals are displayed.

	No. 1.	No. 2.	No. 3.	No. 4.
White flag	Higher	Lower	Stationary
Red centre	Temperature.	Temperature.	Temperature.
White flag	General	Clear or	Local Rain
Blue centre	Rain or Snow.	Fair Weather.	or Snow.
White flag	Cold
Black centre	Wave.
Red flag	Storm Signal or
Black centre	Strong N. W. Wind.

Flags will be hoisted daily at 7.30 A. M.; the weather forecasts indicated by them cover a period of twenty-four hours. Flags should be read from the top of staff downward; when strung horizontally begin with end showing red flag. Example, Nos. (1 Red), (1 Blue), (2 Blue), (4 Blue), at one hoist indicate higher temperatures and general rain or snow, followed by clear, cold weather.

HERSCHEL'S WEATHER TABLE.

FOR FORETELLING THE WEATHER, THROUGHOUT ALL THE LUNATIONS OF EACH YEAR, FOREVER.

This table, and the accompanying remarks, are the result of many years' actual observation, the whole being constructed on a due consideration of the attraction of the Sun and Moon, in their several positions respecting the Earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the Moon into any of its quarters, and that so near the truth as to seldom or never be found to fail.

<i>If New Moon, First Quarter, Full Moon, or last Quarter, happens</i>		IN SUMMER.		IN WINTER.	
	Between midnight and 2 o'clock.	Fair.....	Frost unless wind South-west.

TABLE SHOWING THE NUMBER OF CLOUDY, CLEAR, AND RAINY DAYS IN EACH MONTH.

The following table and statements of weather indications are from "The Connecticut Almanac for 1886," prepared by Prof. A. W. Philips, of Yale College, and published by H. H. Peck, New Haven. The table of cloudy, clear, and rainy days, calculated for Connecticut, suits New York and its neighborhood.

	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
Clear.....	11.0	9.8	11.0	10.3	9.6	10.0	11.2	10.8	12.7	12.0	10.3	10.0

Sunset Colors.—A gray, lowering sunset, or one where the sky is green or yellowish green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

Halo (Sun Dogs).—By halo we mean the large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates a storm.

Corona.—By this term we mean the small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain; growing larger, fair weather.

Rainbows.—A morning rainbow is regarded as a sign of rain; an evening rainbow, of fair weather.

Sky Color.—A deep blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm.

Fog.—Fogs indicate settled weather. A morning fog usually breaks away before noon.

Visibility.—Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicates rain.

Clouds.—In observing clouds, we observe their kinds, motions, and outlines. The clouds frequently called "mare's tails" we term Cirri. They are marked by their light texture, fibrous and sundered as in the "mare's tail," or interlacing as in the far-spreading white cloud, which produce the halo. Small, regularly formed groups of these clouds are frequently seen in fair and settled weather. The Cirri are also the clouds on the fore-part of the storm. In this case they are usually more abundant, their outline is very ragged, and they gradually blend into a white, far-reaching cloud bank. The cloud well-known as "cotton bales," or "thunder heads," we term cumulus. When they appear during the heat of the day and pass away in the evening, continued fair weather may be expected. When they increase with rapidity, sink into the lower part of the atmosphere, and remain as the evening approaches, rain is at hand. If loose patches appear thrown out from their surfaces, showers may be expected. The clouds usually seen after nightfall, lying in one horizontal plane, and not of great extent, are attendant on fine weather. Small, black, inky clouds and dark scud indicate rain.

Barometer.—In using the barometer, we should notice whether it be greatly above or below the mean height and the rapidity of its rise or fall. If it be higher and steady, continued fair, though not cloudless weather may be expected. If it be lower and falling, rain, or at least damp, cloudy weather is at hand. A rapid rise or fall (greater than 0.01 inch per hour) indicates continued unsettled weather and much wind.

Frost.—The first frost and last frost are usually preceded by a temperature very much above the mean.

As a protection to our customers against worthless imitations, we publish a fac-simile of our TRADE MARK LABEL, which will be found on every package of H. W. Johns' Liquid Paints.

COPYRIGHT 1885, by H. W. JOHNS.

These Paints are in every respect strictly first-class, being composed of the best and purest materials obtainable. They have a larger sale than any other paints made in this country or abroad, and although they cost a trifle more per gallon than any others, they will do more and better work for the same amount of money, owing to their wonderful covering properties, while their superior durability renders them the most economical paints in the world for exterior and interior decoration.
