He married 2d, Miriam Linsley, daughter of Dr. Reuben Linsley of Branford, Conn., Dec. 21, 1817. His children were :

- i. LINSLEY (Dr.), b. 1818.
- ii. OSCAR.
- iii. WILLIAM FITZ GREEN,<sup>7</sup> b. 1823; d. Aug. 11, 1825.
- iv. ELVIRA.

---

Charles Joseph Dudley, born at Montgomery, Ala., Dec. 3, 1851, son of Charles K. and brother to George W., began in childhood to show signs of mechanical ingenuity. He was of an inventive disposition, and constructed little models of steam engines and other machines with his jack-knife. At the outbreak of the late civil war, when he was ten years old, his father's machine-works were turned into a gun factory for the Confederate Government, and he was set to polishing muskets and cannons, and at length to turning gun barrels. He continued this work until the war ended. His father being thrown out of his regular business by the war, he was obliged to continue journey work during his minority, with the exception of three years schooling, during which time he secured a fair education, particularly in respect to machinery and manufacturing, keeping constantly in view his aim to be an inventor. He has long been engaged in constructing a crankless engine. His designs for such a machine are numerous and ingenious. He has produced a new mechanical movement to convert reciprocating motion into circular motion. His habits, like those of his brother, are steady and temperate, and he is a regular member of the M. E. Church South. He hopes to leave a good and noble record for the emulation of his posterity and the good of all.
