NEW MAXELL CASSETTES HAVE FOUR WAY WORKING LE.

NEW MAXELL CASSETTES HAVE FOUR WAY WORKING LE.

UD AUSTRALIAN DYNAMIC CASSETTES
(HIGH BIAS)

- New Standards of high reliability
- New levels of consistency, running efficiency and uniformity
- New high sensitivity and outstanding improvements in S/N Ratio
- Improved extra high saturation level
- Extremely wide frequency response with extra high pass characteristics

(See Frequency Response)

• Extremely low print through even after long periods of storage preserves original quality of recording
• Maxell's new PX Gamma Hematite is the most advanced oxide formulation in the magnetic tape industry
• New thermal hardening type binder ensures superb durability even in very heavy duty use
• Improved mirror oxide surface finish achieves new levels of output level consistency and extends high-pass output
• New cassette shell, with super high precision finish, has dimensional accuracy which sets a new and much higher standard

Recording Time

(L/4 ips)

UDC-46 46 min. (23 x 2)
UDC-60 60 min. (30 x 2)
UDC-90 90 min. (45 x 2)
UDC-120 120 min. (60 x 2)

This new ULTRA DYNAMIC Tape is truly an outstanding, premium quality product which is in a class by itself—unmatched and unparalleled in magnetic tape. It was developed exclusively for exceptionally high quality, high fidelity applications. The technological improvements embodied in the exclusive ULTRA DYNAMIC tape construction are truly epoch making. MAXELL's unique and advanced techniques plus an entirely new type of binder system contribute to the outstanding and desirable characteristics of this tape.

This unique combination of the finest quality open reel tape and the most practical, yet luxurious, library package is available with UD50-7VP or UD35-7VP... truly the perfect tape in the perfect package.
LOW NOISE CASSETTES
(NORMAL BIAS)

- Smooth frequency response and good dynamic range plus excellent S/N ratio, make the new LN Cassettes fully capable of High Fidelity performance.
- Unique new leader has: head cleaning function, running direction indicator, side A or B indicator, and 5 second cuing mark.
- Entirely new precision aligned pressure pad structure with pad bonded into pan shaped retainer insures against any misalignment of pad position.

Recording Time LN Model (Normal Bias)
- 30 min. C-30 (15 x 2)
- 60 min. C-60 (30 x 2)
- 90 min. C-90 (45 x 2)
- 120 min. C-120 (60 x 2)

LOW NOISE (NORMAL BIAS)
MAXELL LOW NOISE tape is a high efficiency low noise tape. Quality control and precise manufacturing processes assure uniformity, reliability and consistent wide frequency response. Mirror finished oxide surface improves tape to head surface contact and eliminates drop out as well as reducing friction and wear. The exceedingly low print through characteristics of LNE 35, (far superior to conventional tapes), makes it capable of stable performance for recording and reproduction even after long periods of dead storage.

STANDARD
(NORMAL BIAS)

MAXELL STANDARD tape is an all-round high consistency tape which can be used with excellent and extremely uniform results for all general recording applications.

MAXELL LOW-NOISE a superb quality tape in a smooth running, trouble free, heavy duty precision housing.
STATEMENT OF COMMITMENT
Ours is an age of superlatives; particularly in the area of product claims and counterclaims. Products are described with words like “reliability,” “dependability,” “quality,” and “consistency.” Everything from pencils to space vehicles are referred to with these words. The true meaning of these words now becomes a matter of degree. Such as: How much quality? How much reliability? How much consistency?
You will find words like those we have mentioned throughout this brochure. But, we have chosen to use them with great care.
The quality, dependability and reliability are integral parts of all Maxell products including the NEW ULTRA DYNAMIC Cassettes.
The total superiority of the NEW UD Cassettes is the result of the essential factors of precision craftsmanship, superior engineering, and material excellence.
When you choose Maxell UD Cassettes, you can be certain that they represent the most advanced achievement in the state of the art of magnetic tape products backed by a firm commitment to provide you with the magnetic tape product that suits your needs with the finest product that can be made and without compromise.

Maxell Corporation of America
130 W. Commercial Ave., Moonachie, N.J. 07074

Look for the colorful MAXELL display at your local dealer. It contains everything to fill all your magnetic tape needs. You can be sure of the finest quality tape products when they carry the MAXELL name.

8-TRACK CARTRIDGES
8T-200 8T-300 8T-400

MAXELL’s high reliability, smooth running heavy-duty construction combined with high performance tape formulations ensure optimum cartridge results: 40X to 12KH, superb S/N ratio (3dB better than ordinary tape), widest dynamic range, less than .3% wow & flutter (after 300 hours operation), high quality tough polyester base provides high resistance to moisture and -20 c to +80 c operating temperature range. When all is said and done, results are what count, and spectacular results are what you get with MAXELL tape cartridges.
