The Soundcraft Range

From live sound to post-production, Soundcraft mixing consoles are built to perform. With professional features, intuitive operation and uncompromised sound quality, Soundcraft consoles are relied upon throughout the professional audio industry, delivering optimum performance time after time.

Drawing from 30 years' mixing console design and manufacturing expertise, Soundcraft has developed a unique insight into professional audio requirements. World-class production techniques, combined with extensive testing procedures, ensure that every mixing console is built to the same exacting standards.

Series FIVE at The Troubadour, West Hollywood

Soundcraft's **Live** range features both front-of-house, monitor and dual-purpose consoles, all designed to cope with the increasing demands of touring and theatre installations. From the highly-specified Series FIVE front-of-house console to the compact Spirit

MH4 at the Cubby Bear Club, USA

Powerstation powered mixer, Soundcraft live consoles combine lightness and strength, offering exceptional portability, great flexibility and unprecedented

mixing control. A comparison chart on page 68 provides an at-a-glance guide to the range's features, simplifying the choice of console for any live application. Comparison charts are also provided for multi-purpose and recording/post-production consoles.

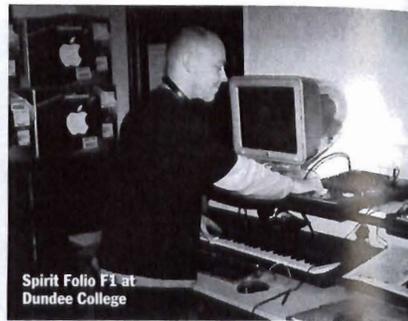

Soundcraft's **Multi-Purpose** console range combines professional facilities and sound quality with exceptional value. Suitable for stage and studio use, these consoles are ergonomically designed, achieving optimum performance from compact frames. One of the latest additions to the Soundcraft multi-purpose range is the Spirit

E Series. With a special ES model featuring 10 stereo inputs and 4 mono inputs, as well as regular 6, 8 and 12 mono input frame sizes, the Spirit E Series encompasses a massive range of applications.

Spirit M Series in Sonifcom Studios, Hertfordshire, UK

Soundcraft's **Recording / Post-Production** consoles are used in a wide variety of applications, from location audio to multitrack music recording, and are easily expandable to suit even the largest production.

Spirit Folio F1 at Dundee College

Series 15 in Dave Lee Travis' Production Studio, UK

Designed for the varied requirements of on-air, TV and radio production, Soundcraft's **Broadcast** consoles are fully modular. From the specialist B800 live broadcast and production console to the RM1d digital radio console, each delivers the high levels of flexibility and functionality required in the demanding broadcast environment. Please refer to our Broadcast Range Brochure for further information on these consoles.

324 Live at the Jerry Lewis Telethon, New York

Units, featuring high quality components and circuitry throughout for exceptional reliability.

This technical catalogue contains features, specifications and block diagrams on individual Soundcraft consoles, digital interface units and power supply units. For further information, please contact Soundcraft for a product information CD (see the following page) or an individual product brochure, or visit the Soundcraft website at: www.soundcraft.com

Soundcraft also manufacture a range of **Digital Interface Units** and **Power Supply**

also manufacture a range of **Digital Interface Units** and **Power Supply**

ALSO AVAILABLE FROM SOUNDCRAFT

Additional information about the wide range of Soundcraft products can be found by visiting our website at www.soundcraft.com or by requesting an individual product brochure. We have also produced a number of guides and information CD-ROMs, designed to help you quickly find the information you need straight from your desktop.

PRODUCT INFORMATION CDs

Our Product Information CD and Product Images CD are PC and Mac compatible and are designed to run on any standard web browser. The information CD features product summary pages, which contain a picture and brief description of each console in the Soundcraft range, together with brochures, technical data and user guides. The images CD features hi-res, lo-res, greyscale and web-optimised images, along with product and corporate logos.

MIXING GUIDES

To help you get the most out of your Soundcraft console, we have produced two booklets – The Soundcraft Guide to Mixing and The Spirit Guide to Digital Mixing. Each guide contains information on choosing and using your mixer and sound equipment, together with connection and setup guides, mixing techniques, sample applications and troubleshooting. These guides are also available on the Product Information CD as PDF files.

SOUNDCRAFT WEBSITE

Our website at www.soundcraft.com is updated regularly and provides a great source for all the latest news from Soundcraft. Here you can find useful information in the form of downloadable brochures, user guides, technical data sheets, mark-up sheets, application guides, software updates, logos, images and advertisements. The website also contains contact information for all sales, technical support and service enquiries.

For further information, please contact our Marketing Department on +44 (0)1707 665000 or via email at info@soundcraft.com

- Now equipped to handle 16 separate monitor mixes
- Fully modular frame sizes: 24+4, 32+4, 40+4, 48+4, 56+4
- Flexible Auxiliary Bus structure (with up to four stereo sends for in-ear monitoring) allows use as FOH, Monitors or a combination
- 8 Group busses with 12 Aux busses in total (FOH mode)
- 16 Monitor busses (configurable as 16 mono, 12 mono/2 stereo, 8 mono/4 stereo) in Monitor mode
- LCR panning on inputs
- Semi-parametric EQ on stereo aux outputs
- Integral 20x8 Output matrix
- 8 VCA groups and 8 Mute groups
- Snapshot automation and MIDI control
- Integrated control of dbx DriveRack and BSS Varicurve

TYPICAL SPECIFICATIONS

Frequency Response	XLR Input to any Output +0/-0.5dB, 20Hz - 20kHz
T.H.D. (@+10dBu)	XLR In to Direct Out < 0.006% @ 1kHz < 0.01% @ 10kHz
	XLR In to Mix Out < 0.006% @ 1kHz < 0.01% @ 10kHz
Noise	Mic Input E.I.N. (22Hz-22kHz, unweighted) < -128dBu (150Ω source)
	Mix Output Residual Noise (no inputs routed, Mix fader @ 0dB) -90dB
	Mix Output Bus Noise (48 ch. routed, faders @ -∞, Mix fader @ 0dB) < -84dBu
	Grp Output Bus Noise (48 ch. routed, faders @ -∞, Grp fader @ 0dB) < -84dBu
	Aux Output Bus Noise (48 ch. routed, sends @ -∞, Grp fader @ 0dB) < -85dBu
Crosstalk (1kHz, +20dBu Input signals)	Input Channel muting > 102dB
	Input fader cutoff > 100dB
	Input pan pot isolation > 60dB
	Mix routing isolation > 102dB
	Group routing isolation > 88dB
	Group-group crosstalk < -90dB
	Group-Mix crosstalk < -90dB
	Mix-group crosstalk < -95dB
	Aux send off < -93dB
CMRR	Mono input -85dB @ 1kHz
Oscillator	63Hz to 10kHz/Pink Noise, variable level
HP Filter (Mono Input)	30-400Hz, 12dB/octave
EQ (Mono Input)	HF 1.2kHz - 20kHz, ±15dB, shelving
	Hi-Mid 750Hz - 12kHz, ±15dB, Q = 0.5 - 3.0
	Lo-Mid 75Hz - 1.2kHz, ±15dB, Q = 0.5 - 3.0
	LF 35Hz - 550Hz, ±15dB, shelving
Metering	Overbridge 8 VU Meters monitoring Group/Aux/Matrix, + 3 VU Meters monitoring Left Mix/AFL/PFL, Right Mix/AFL/PFL & Mono (centre) Mix + Peak LEDs
	Mono & Stereo Inputs 12-LED bargraph + Peak LED

Power Consumption	48 Ch Console, each 17V rail takes 6.5A (nominal)(measured without Littlites connected) The 8V rail takes 0.5A (nominal)
Operating conditions	Temperature Range -10°C to +30°C
	Relative Humidity 0% to 80%
Power Supply Unit	Type CPS800

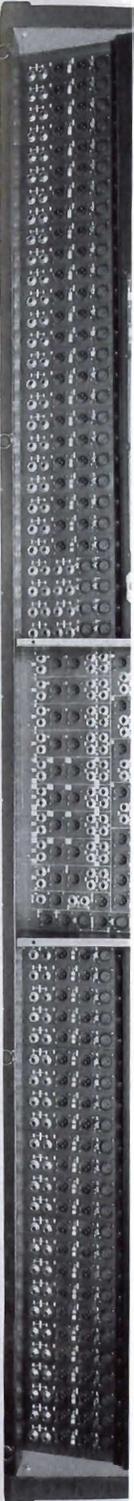

INPUT / OUTPUT SPECIFICATIONS

Input & Output Levels	Mic Input +26dBu max.
	Balanced Inputs +21dBu max.
	Balanced Outputs +21dBu max.
	Nominal Operating Level 0dBu
Input & Output Impedances	Mic Input 2kΩ
	All other Inputs > 10kΩ
	Headphone Output 50Ω
	All other Outputs < 75Ω

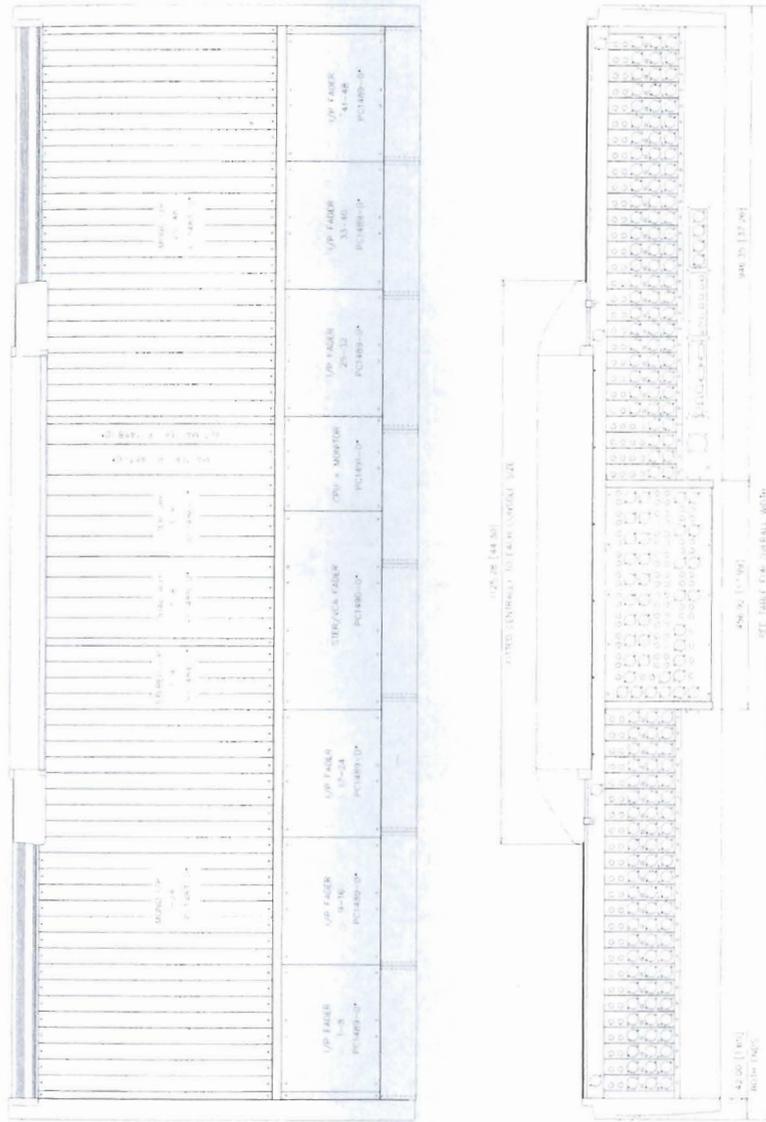

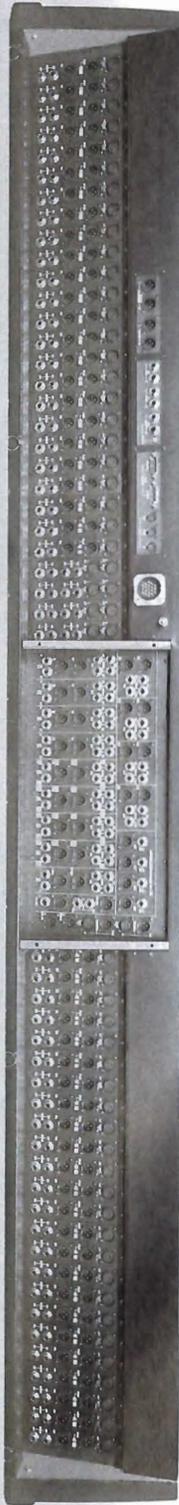

DIMENSIONS & WEIGHT

Height	All frame sizes 365mm (14.4")

SYSTEM BLOCK DIAGRAM

- Semi-modular frame sizes: 24+4, 32+4, 40+4, 48+4, 56+4
- Flexible Auxiliary Bus structure with 2 stereo sends for in-ear monitoring
- 8 group busses and 12 aux busses (FOH mode)
- 12 monitor busses: 12 mono, or 8 mono + 2 stereo (Monitor mode)
- Swap mode allows fader control of Aux outputs in Monitor mode
- Integral 12x4 Output matrix, optional expansion to 12x8
- 3-band EQ on FX Returns 1-8, switchable to Group or Aux outputs
- LCR panning on inputs
- 8 VCA groups and 8 Mute groups
- Integrated control of dbx DriveRack and BSS Varicurve
- Integral LED bargraph metering for all inputs and outputs
- Optional VU output meterbridge

TYPICAL SPECIFICATIONS

Frequency Response	XLR Input to any Output	+0/-1dB, 20Hz - 20kHz

Series FIVE

SERIES
FIVE

- Highly specified front-of-house console
- 24 - 56 channel frame sizes
- 4 stereo mic/line inputs with full EQ as standard
- 8 sub-groups
- 12 auxiliary busses

- 10 VCA groups
- Built-in 16x10 output matrix
- 4-band fully parametric EQ on both mono and stereo inputs
- Sweepable filters on all input channels
- Input metering on every channel
- VU output meterbridge included as standard
- 8 mute groups plus 256 MIDI controllable snapshots of all input and output mutes
- MIDI program change transmission and DataFader continuous controller
- Switchable LCR panning as standard
- Compact, lightweight frame designed to withstand touring
- Rugged power supply with three year warranty
- 28 input expander frame available

TYPICAL SPECIFICATIONS

Frequency Response	XLR Input to any Output +0/-0.5dB, 20Hz - 20kHz

Noise	Mic Input E.I.N. (22Hz - 22kHz, unweighted) < -127dBu (150Ω source) Mix Bus Output Noise (40 ch. routed) < -80dBu
Crosstalk (@ 1kHz)	Channel Muting > 90dB Channel Routing & Channel Fader Attenuation & Aux Send Attenuation > 80dB Mono Input CMRR -52dB @ 1kHz
Oscillator	63Hz to 10kHz / pink noise, variable level
Filter	HP 20Hz - 400Hz, 12dB/octave
EQ	HF 12kHz, +/-15dB Hi-Mid 400Hz - 12kHz, +/-15dB, Q = 1.3 / 2.7 Lo-Mid 40Hz - 1.2kHz, +/-15dB, Q = 1.3 / 2.7 LF 60Hz, +/-15dB
Metering	Overbridge 8 VU Meters monitoring Group/Aux/FX Returns/Matrix & 3 VU Meters monitoring Left Mix/Right Mix & Mono (centre) Mix/PFL/AFL Mono Input 8-LED bargraph + Peak LED Stereo Input 8-LED bargraph + Peak LED
Power Consumption	450W
Operating Conditions	Temperature Range -10°C to +30°C Humidity 0% to 80%
Power Supply Unit	Type CPS275

- 8 mute groups plus MIDI control
- LED input metering and VU output metering
- 8 aux sends with external pre/post switching in pairs
- 4-band EQ with switchable Q and variable high-pass filter
- Monocoque frame combines lightness with strength and solidity

Series TWO

- Highly flexible live performance console
- Classic 3-tier raked styling
- 24, 32 and 40 channel frame sizes
- Standard 8-bus, 8-aux structure

- 2 fully-featured stereo input channels included as standard
- 8 group outputs with stereo and mono master busses
- Built-in 11 x 2 output matrix
- 8 mute groups and MIDI muting
- 4-band EQ with two sweepable mids
- Sweepable high pass filtering on each mono channel
- LED bargraph input and output metering

FIVE Monitor

- Dedicated monitor mixing console
- 40 - 60 channel frame sizes
- Choice of 24 or 32-bus output structures
- MIDI messaging to BSS FPC-900 Varicurve™ Remote for instant control of outboard EQ

- Optional stereo mic/line inputs with full EQ
- Built-in 23 x 12 or 23 x 16 output matrix
- 8 VCA groups and 8 mute groups
- 4-band fully parametric EQ on both mono and stereo inputs
- Sweepable filters on all input channels
- A and B XLR inputs for every channel
- Input metering on every channel
- Optional parametric EQ output module
- Two separate solo systems suitable for feeding a number of different systems - such as wedges and in-ear
- Sends can be globally configured as mono or stereo
- Compact, lightweight frame designed to withstand touring
- Rugged power supply with three year warranty

SPIRIT

- 4, 8 or 12 mono inputs with 3-band EQ (swept mid)
- 4 stereo inputs
- Rugged chassis design, with integral rackmount capability
- 4 dedicated level-controlled FX returns with master level control
- 4 auxiliary sends – 2 pre-fade, 2 post-fade
- Pre- /post-fade switchable direct output on every mono input channel
- Signal detect and peak LEDs on all input channels
- S/PDIF digital output
- Global 48V phantom power
- 100mm faders throughout

- 6, 8 and 12 mono channels with 2 stereo inputs
- ES model with 10 stereo channels and 4 mono inputs
- Precision, ultra-linear mic preamps
- High resolution, wide gain stages with masses of headroom
- 100mm high accuracy faders
- Integral switched mode low noise PSU design with universal input
- Professional insert points for external processing
- Intuitive solo system
- True professional +48v phantom power for condenser microphones
- Multi point signal channel status monitoring on all channels
- Built in, extensive metering for mix and solo system
- Precision 3-band EQ with swept mid (mono input)
- Easy conversion to rack mounting (cost option kit)

Digital Interface Units

MIC/LINE

The Mic / Line interface converts the digital TDIF port on the rear of all Soundcraft digital consoles into 8 true mic/line inputs. It also provides 8 balanced outputs. The mic preamp is designed with exactly the same characteristics as those found on the Digital 328 and 324 Live.

TYPICAL SPECIFICATIONS

Frequency Response	10Hz - 20kHz, +0/-0.5dB
T.H.D. @ 1kHz	0.05%
Crosstalk @ 1kHz	95dB
Dynamic Range	> 110dB
A/D Conversion	Mic/Line Inputs 24-bit, 128x oversampling
D/A Conversion	All Outputs 24-bit dithered by source when applicable Max Output Level +18dBu
Phantom Power Capability	80mA maximum
Bit Depth	16/20/24 bits selectable from source
Sampling Rate	44kHz - 50kHz selectable from source
Mains Input Voltage Range	90 - 240 VAC @ 50/60Hz
Mains Fuse Rating	T1.0A L/250V
Dimensions	486mm (W) x 230mm (D) x 89mm (H) (2U)
Weight	4.25 kg (excluding packaging)
Power Supply	Integrated, 90 - 240V, 50/60Hz, 25W

- 8 balanced XLR inputs
- 8 balanced TRS inputs
- 8 insert points
- 8 balanced direct outputs
- 8 individual +48V phantom power switches
- 8 individual insert point switches
- 8 individual high pass filters (100Hz, 18dB per octave)
- 8 4-stage meters per channel
- 8 UltraMic+ preamplifiers

AES/EBU

The AES/EBU interface converts the digital TDIF port on the rear of all Soundcraft Digital consoles into 4 AES/EBU inputs and outputs. Users of systems such as Digidesign Pro Tools™ can now interface directly with Soundcraft digital consoles. 8 outputs can be fed to units with AES/EBU inputs. The interface requires 1U half rack space and is shipped with power supply.

TYPICAL SPECIFICATIONS

Frequency Response	10Hz - 20kHz, +0/-0.5dB
T.H.D. @ 1kHz	0.02%
Bit Depth	16/20/24 bits selectable from source
Sampling Rate	44 - 50kHz selectable from source
Dimensions	220mm (W) x 157mm (L) x 48mm (H)
Weight	0.8 kg without power supply
Power Supply	9V AC, 3.5W

ANALOGUE

The analogue interface converts the digital TDIF port on the rear of all Soundcraft Digital consoles into 8 analogue Phono (RCA) inputs and 8 analogue Phono (RCA) outputs. All conversion is done using 20-bit technology. The unit allows a standard analogue multitrack to be connected, or to add 8 extra analogue inputs when you need to expand your operation. It will also allow the 8 TDIF outputs to be fed to units accepting analogue inputs. The interface requires 1U half rack space and is shipped with power supply.

TYPICAL SPECIFICATIONS

Frequency Response	10Hz - 20kHz, +0/-0.5dB
T.H.D. @ 1kHz	0.02%
Crosstalk @ 1kHz	80dB
Dynamic Range	> 93dB
A/D Converter	20-bit, 64x oversampling
D/A Converter	20-bit, 64x oversampling
Sampling Frequency	Operates at console frequency
Analogue I/P Level	Maximum +10dBu
Analogue O/P Level	Maximum +10dBu
T.H.D.	0.008 @ 1kHz
Dimensions	220mm (W) x 157mm (L) x 48mm (H)
Weight	0.7 kg without power supply
Power Supply	9V AC, 3.5W

Power Supply Units

CPS2000

All Soundcraft power supply units feature high quality components throughout. Features on the top-of-the-range CPS2000 include:

- Linear circuitry, using industry standard components
- Fewer voltage rails for greater simplicity and reliability
- Load is spread across several power devices on each rail, for optimum heat dissipation
- Voltage monitoring for world-wide use
- Front panel status LEDs indicating thermal shutdown and low mains power
- Heavy current wiring is all hard soldered, minimising number of connectors
- Built-in diode output linking allows two supplies to be paralleled for redundant operation, without a separate switcher box
- Heavy-duty Socapex® DC connectors on both the console and power supply
- Thermal sensing fan speed control for reduced noise and longer life
