west of Nimitz Gate
Pearl Harbor Naval Shipyard and Intermediate Maintenance
Facility
City and County of Honolulu
Hawaii

U.S.G.S. Pearl Harbor Quadrangle Hawaii 7.5 minute series,
Universal Transverse Mercator Coordinates: 4.608060.2361640

Significance: Building 1B was used by Navy personnel to provide office
spaces. Building 1B functioned as part of the Pearl Harbor
Naval Complex but is only of minor importance to the historic
character of the National Historic Landmark.

Description: This building was constructed as a three-story, semi-permanent
administrative office annex. It is constructed with wood framing
and siding set on a concrete foundation. The original
construction consisted of wood frame double hung windows,
wood doors, and a flat bituminous built-up roofing on wood. The
overall dimensions of the building are 184 feet long by 40 feet
wide by 37 feet high.

History: This building was constructed at a cost of \$62,560 in 1941 as an
addition to the headquarters of the Navy Yard (now Naval
Shipyard and Intermediate Maintenance Facility). Built during
World War II to prepare Pearl Harbor for an increased military
presence, this building served as an administrative office. It
housed various administrative personnel, most recently the
engineering and management personnel required to oversee the
repair of Navy ships. Major renovations to the building includes
an addition of 2,120 square feet on all three floors (1944),
installation of a new stairway on the north end of the building
(1956), and sporadic replacement of the original windows with
jalousie style windows throughout the years. A Military
Construction project, P-215, will demolish the aged and
deteriorated building.
