HISTORIC AMERICAN BUILDINGS SURVEY

BROADHEAD MANOR, FOUR-BEDROOM TYPE

HABS No. PA-6221-E

Location: 3686 Old Orchard Circle, Pittsburgh, Allegheny County, Pennsylvania

USGS Pittsburgh West Quadrangle

UTM Coordinates: 17.059224.4481009, 17.057761.4477752,
17.057738.4478090, 17.057753.4478241

Significance: Constructed in 1943-44, Broadhead Manor is among Pittsburgh's first public housing projects. Built as defense housing, it was designed to be converted to low income housing at the end of World War II. All of the rows in the complex had the same basic exterior design. However, there were originally four different floor plans for one- through four-bedroom units. This is representative of the four-bedroom unit type.

Description: There are eight rows which contain four bedroom units. Each unit is two stories with a flat roof. The front or "service" walls are red brick. The rear or "garden" walls are cream brick. Side walls are either red brick or stone. On the front facade, each unit has an entrance to the side flanked by a small opening for a coal chute, now bricked in, and a pair of double hung sash windows. Some units retain wooden doors with a small diamond-shaped window opening. Other units have flush steel replacement doors. Some units have aluminum panels which shield the entrance. These appear to have been added in the 1970s. The garden facade has a central entrance flanked by double hung sash. Double hung sash alternate with fixed sash on the second floor. The roof has a deep overhang. The soffit is covered with aluminum. A concrete slab, also covered with aluminum, projects over the first floor. Many units have blue or beige glazed brick, T-shaped terrace walls. Each unit has a clothes line pole at the end of the yard.

The first story features a living room, kitchen, combined coal-heater-storage room, and closet. On the second story, there are four bedrooms, a bathroom, and a stairhall. The interior walls and ceilings are finished with painted (off-white) plaster. The walls in the coal-heater-storage room are finished with ceramic tile. The wood floor on the second story, wood stairs, two-panel doors, and wood trim throughout the unit are painted (grey). The stairs are framed by a solid balustrade of plaster with wood trim. The first story and second story bathroom floors are finished with linoleum tile.

History: Broadhead Manor was designed by James A. Mitchell and Dahlen Ritchey and constructed in 1943-44 as defense housing. In 1954 ownership was transferred from the Public Housing Administration to the Housing Authority City of Pittsburgh. Although the floor plans have remained unchanged, elements have been updated over the years. Wood windows have been replaced with aluminum sash and frames. Soffits and first floor concrete projections have been covered with aluminum. Most paneled wood doors have been replaced with flush steel doors. Aluminum panels were added to shield the front entrances, however, many of these have since been removed.
