Page 1

Building 28 is a concrete block building situated at the southwest corner of the ordnance area. Rectangular in plan, it measures 25 feet-5 inches by 54 feet-2 inches. It was as an SH-11 type of structure by H & D from plan WB 9-13.

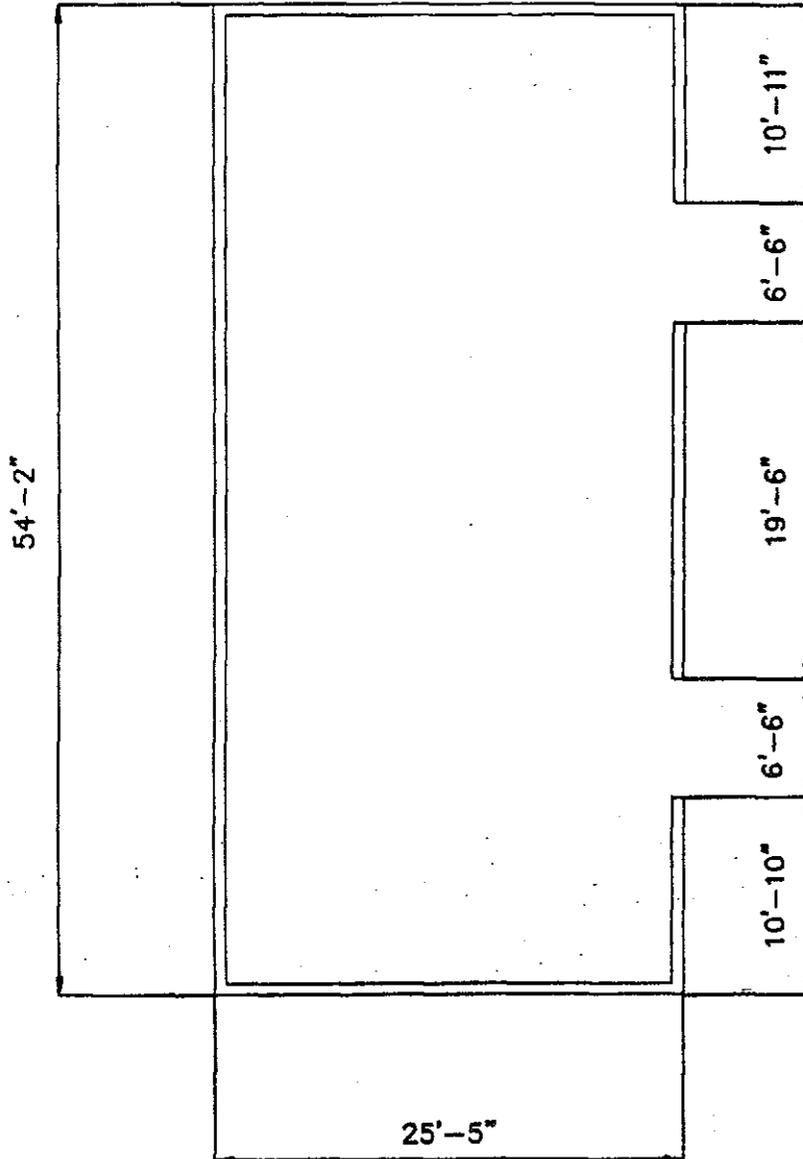

The broadside of building 28 faces east to the roadway. There are two sliding metal doors in this elevation. There are 11 small, vertical window openings on the building, at least two in each wall. No sashes are extant, however. The building has a concrete foundation, asbestos shingle siding in the gables, exposed rafter tails and two metal vent flues on the ridge. It seems to be in good structural condition, although the foundation has weathered and there is a small hole in the north wall.
