HISTORIC AMERICAN BUILDINGS SURVEY

CAMP WILLIAMS

(127TH INFANTRY REGIMENT CANTONMENT AREA SUBCOMPLEX–BUILDING 124)

- Location: 124 Peoria Street
Camp Williams-Volk Field National Guard Training Center
Camp Douglas, Juneau County, Wisconsin
- Significance: Building 124 was constructed in 1940-1941 as a company mess hall for the 127th Infantry Regiment Cantonment Area.
- History: Lieutenant Colonel Henry C. Hengles designed Building 124, which was erected between 1940 and 1941 by the Works Progress Administration as a company mess hall for the 127th Infantry Regiment Cantonment Area. It replaced a wood-frame mess hall. The building currently functions as a private-room barracks.¹ A detailed history of the subcomplex is provided in the document for HABS No. WI-381-A.

Description:

- A. General Statement: This building is constructed on a slight west northwest-east southeast axis. Directions have been simplified to north-south-east-west within this section.
1. Architectural character: Building 124 is a one-story, astylistic utilitarian, front-gabled structure constructed of tan, glazed tiles with red brick accents at the gables, corners and original doorways. A wall chimney, heavy timber purlins and lintels adorn the building. Asphalt shingles sheath the roof.
 2. Condition of Fabric: The exterior fabric is good. Alterations are limited to the wholesale replacement of windows and doors. The sidewall eaves are also encased in aluminum. The top portion of the wall chimney has been replaced with red brick. The building has been converted into private-room barracks. Thus the interior is completely renovated.
- B. Exterior Description:
1. General Description: Oriented on an east-west axis, the gabled west (main)

facade is pierced by a central double doorway that is outfitted with a metal door and wood infill. It is flanked by replacement double-hung sashes. A louvered vent underlined with a thin concrete sill is set in the gable peak. The open eaves are supported by five heavy timber purlins.

Beginning at the southwest corner, the south facade is pierced by six regularly placed windows. The remainder of the facade consists of an open expanse, and two additional window openings – the first of which has been converted into a doorway.

The east gabled endwall is defined by a central wall chimney flanked by large, one-over-one, double-hung sashes.

Starting at the northeast corner, the north side claims a doorway that once led to the kitchen, two smaller windows and an original doorway that provided access to the dining hall. This latter entryway is now infilled with matching tile. The remainder of the facade is pierced by six regularly placed, double-hung sashes that mirror those to the south facade – the fourth of which is infilled with matching tile.

2. Overall Dimensions: The building is 75' x 25'.
3. Foundations: The foundation is of poured concrete.
4. Walls: The walls are constructed with 12" x 5" tan glazed tile and are 8" thick. The tile is accented by red brick at the corners, around original doorways, within the wall chimney and on the gables at the eaves.
5. Roof: The gabled roof is sheathed with asphalt shingles over 6" wide boards. The eaves are enclosed with aluminum. Five exposed timber purlins underline the eave on the west facade, as do six on the east. Each is 6" x 6" and project 15½". The gables are underscored by red brick accents.
6. Openings:
 - A. Windows: Windows are regularly placed throughout the building. Each has a concrete sill and a 5½" thick timber lintel. Generally, the windows are fitted with replacement, metal, one-over-one, double-hung sashes.

The two windows on the north (main) facade measure 37" x 60". Two

smaller, double-hung sashes on the north facade that coincide with the former kitchen are 37" wide x 35" tall, while those on the east facade that flank the wall chimney are 49" x 59½". All remaining windows are 37" x 51".

B. Doorways: All doors are metal-and-glass replacements. Those in original openings are topped with 5½" thick wood lintels and feature red brick surrounds. The double doorway on the north (main) facade is 67" x 80½" and fitted with a 40½" x 82" metal door and wood infill. The original door opening on the north facade is 40" x 80", while that which replaced a window on the south facade is 40" x 78".

7. Chimney: A wall chimney constructed of tan, glazed tile with red brick accents at the corners is centered on the east gabled endwall. It is 50" wide and projects 11". Two metal ash cleanout doors (10½" square) are at the bottom. The chimney's top portion has been replaced with red brick and is crowned by a concrete cap pierced by two square tile flues.

C. Interior Description:

- A. General Description: The east end of the building originally contained a kitchen. The rest of the building was occupied by an open dining hall. The mess hall has been converted into private-room barracks. No original fabric remains.

D. Setting:

Building 124 is a component of the 127th Infantry Regiment Cantonment Area Subcomplex, which also includes Building 117 (HABS WI-381-A-1), Building 118 (HABS WI-381-A-2), Building 119 (HABS WI-381-A-3), Building 120 (HABS WI-381-A-4), Building 121 (HABS WI-381-A-5), Building 122 (HABS WI-381-A-6), Building 123 (HABS WI-381-A-7), Building 125 (HABS WI-381-A-9), Building 126 (HABS WI-381-A-10), Building 127 (HABS WI-381-A-11), Building 128 (HABS WI-381-A-12), Building 129 (HABS WI-381-A-13), Building 130 (HABS WI-381-A-14), Building 131 (HABS WI-381-A-15) and Building 132 (HABS WI-381-A-16). Additional components of the general Camp Williams complex include the 128th Infantry Regiment Cantonment Area (HABS WI-381-B) and the former Officer's Club and present day museum (HABS WI-381-C).
