HISTORIC AMERICAN BUILDINGS SURVEY

CAMP WILLIAMS

(128TH INFANTRY REGIMENT CANTONMENT AREA SUBCOMPLEX–BUILDING 206)

- Location: 206 Holden Street
Camp Williams-Volk Field National Guard Training Center
Camp Douglas, Juneau County, Wisconsin
- Significance: Building 206 was constructed in 1940-1941 as a company mess hall for the 128th Infantry Regiment Cantonment Area.
- History: Lieutenant Colonel Henry C. Hengles designed Building 206, which was erected between 1940 and 1941 by the Works Progress Administration. It served as a company mess hall for the 128th Infantry Regiment Cantonment Area and replaced a wood-frame structure. The building was converted in 1958 into a barracks and used by the Wisconsin Military Academy. It currently is used as a workshop by the Camp Williams maintenance department.¹ A detailed history of the subcomplex is provided in the document for HABS No. WI-381-B.
- Description:
- A. General Statement: This building is constructed on a slight north northeast-south southwest axis. Directions have been simplified to north-south-east-west within this section.
1. Architectural character: Building 206 is a one-story, astylistic utilitarian, front-gabled structure constructed of tan, glazed tiles with red brick accents at the gables, corners and doorways. A wall chimney, open eaves with exposed rafter tails, heavy timber purlins and lintels adorn the building. The roof is sheathed with red asphalt shingles and features at the peak four metal cupola vents.
 2. Condition of Fabric: The exterior fabric is very good. Alterations are limited to the wholesale replacement of windows and doors. The kitchen was converted in 1958 into a latrine and the dining hall into an open barracks bay. The building is now used as a maintenance shop. Its interior is completely renovated.

B. Exterior Description:

1. General Description: Oriented on a north-south axis, the gabled north (main) facade has a central double door flanked by replacement double-hung sashes. A louvered vent underlined with a thin concrete sill is set in the gable peak. The open eaves are supported by five heavy timber purlins.

Beginning at the northwest corner, the west facade is pierced by six regularly placed, double-hung sash windows, an open expanse and two additional windows that coincide with the former kitchen area – the southernmost of which is infilled with matching tan, glazed tiles.

The south gabled endwall is defined by a central wall chimney flanked by a glass block window to the west (left) and a double-hung sash to the east (right).

Starting at the southeast corner, the east facade claims a doorway that once served the kitchen, two smaller double-hung sashes, a second doorway and six regularly placed, double-hung sashes that mirror those on the west facade.

2. Overall Dimensions: The building is 75' x 25'.
3. Foundations: The foundation is of poured concrete.
4. Walls: The walls are constructed with 12" x 5" tan glazed tile and are 8" thick. The tile is accented by red brick at the corners, around doorways, within the wall chimney and on the gables at the eaves.
5. Roof: The gabled roof is sheathed with red asphalt shingles over 6" wide boards. It is pierced at the peak by four metal cupola vents. The eaves are open with exposed 2 x 6 rafter tails set on 24" centers. Exposed timber purlins on the north (five) and south (six) gabled endwalls are 6" x 6" and project 15½". The gables are underscored by red brick accents.
6. Openings:

A. Windows: Windows are regularly placed throughout the building. Each has a concrete sill and a 5½" thick timber lintel. The windows are generally fitted with replacement, vinyl-clad, double-hung sashes with six-light, snap-in muntins.

Page 3

The two windows on the north (main) facade are 37" x 59". Those on the east and west facades, closest to that on the north, are also 37" x 59". Two smaller, double-hung sashes on the east facade that coincide with the former kitchen are 37" wide x 35½" tall, while the openings on the south side that flank the wall chimney are 49" x 59½". All remaining windows are 37" x 51".

B. Doorways: All doors are metal replacements. They are set in openings topped with 5½" thick wood lintels and featuring red brick surrounds. The double doorway on the north (main) facade is 67" x 80½". The two, door openings on the east facade are 39½" x 80½".

7. Chimney: A wall chimney constructed of tan, glazed tiles with red brick accents at the corners is centered on the south gabled endwall. It is 50" wide and projects 11". Two ash cleanouts at the bottom are infilled with concrete blocks. The top is crowned by a concrete cap pierced by two round tile flues.

C. Interior Description:

1. General Description: The south end of the building was originally a kitchen with the rest of the building occupied by an open dining hall. The kitchen was converted in 1958 into a latrine and the dining hall into an open barracks bay. The entire building presently serves as a workshop for the Camp Williams maintenance staff and has had its interior completely remodeled.

D. Setting:

Building 206 is a component of the 128th Infantry Regiment Cantonment Area Subcomplex, which also includes Building 204 (HABS WI-381-B-1), Building 205 (HABS WI-381-B-2), Building 207 (HABS WI-381-B-4), Building 208 (HABS WI-381-B-5), Building 209 (HABS WI-381-B-6), Building 210 (HABS WI-381-B-7), Building 212 (HABS WI-381-B-8), Building 213 (HABS WI-381-B-9), Building 214 (HABS WI-381-B-10), Building 215 (HABS WI-381-B-11), Building 216 (HABS WI-381-B-12), Building 217 (HABS WI-381-B-13) and Buildings 218-219 (HABS WI-381-B-14). Additional components of the general Camp Williams complex include the 127th Infantry Regiment Cantonment Area (HABS WI-381-A) and the former Officer's Club and present day museum (HABS WI-381-C).
