## **Administrative Information**

### **Provenance**

The papers of the Alexander Graham Bell family were given to the Library of Congress between 1947 and 1984. The main body of papers was deeded to the Library by the Bell family in 1975. Additional items were transferred from various sources in 1977. Mabel H. Grosvenor deposited material in 1976 and 1977. Additional material was purchased in 1998.

### **Processing History**

The papers of the Alexander Graham Bell family were arranged and described in 1976. Additional material was incorporated into the collection in 1981, 1985, and 1999.

### **Transfers**

Items have been transferred from the Manuscript Division to other custodial divisions of the Library. Some photographic prints, negatives, and other pictorial material have been transferred to the Gilbert H. Grosvenor Collection of Photographs of the Alexander Graham Bell Family in the Prints and Photographs Division. Cartographic material has been transferred to the Geography and Map Division. Music compositions have been transferred to the Music Division. All transfers are identified in these divisions as part of the Alexander Graham Bell Family Papers.

### **Related Material**

The [Grosvenor Family Papers](#) in this division include material related to Alexander Graham Bell and his family.

### **Copyright Status**

Copyright in the unpublished writings of Alexander Graham Bell and the members of his family represented in these papers and in other collections of papers in the custody of the Library of Congress has been dedicated to the public.

### **Access and Restrictions**

The papers of the Alexander Graham Bell family are open to research. Researchers are advised to contact the Manuscript Reading Room prior to visiting. Many collections are stored off-site and advance notice is needed to retrieve these items for research use.

### **Microfilm**

A microfilm edition of many of Bell's scientific notebooks is available on twenty-two reels. Consult a reference librarian in the Manuscript Division concerning availability for purchase or interlibrary loan. A microfilm edition of "The Tongue" by Alexander Bell (1790-1865) is available on one reel. The microfilm consists of a negative copy and is housed in the Photoduplication Service.

## Online Content

Selected items from the papers of the Alexander Graham Bell family are available on the Library of Congress Web site at <http://hdl.loc.gov/loc.mss/collmss.ms000006>.

## Scope and Content Note

The Alexander Graham Bell Family Papers span the years 1834-1970, with the bulk of the material concentrated during the period 1855-1922. They include correspondence, [diaries](#), [journals](#), [speeches](#), publications, and [scientific notebooks](#) of Alexander Graham Bell, his wife, Mabel Gardiner Hubbard Bell, and their forebears and descendants, members principally of the Bell, Hubbard, Grosvenor, and Symonds families. They document Bell's varied activities throughout his entire career. Although the bulk of the items pertains to the invention of the telephone in 1876, Bell's contributions to the education of the deaf and his scientific and technological interests in a wide range of subjects are also amply represented, including eugenics, marine engineering, and aviation.

Among the scientific material in the papers is a group of scientific notebooks in which Bell recorded his daily experiments and observations, including the entry for March 10, 1876: "I then shouted into M[outhpiece] the following sentence: 'Mr. Watson - come here - I want to see you.' To my delight he came and declared that he had heard and understood what I said."

Although much of Bell's voluminous correspondence is contained in the [General Correspondence](#) series, an even larger part is included in a [Subject File](#). Among the many people with whom Bell corresponded are Edward M. Gallaudet, Joseph Henry, Helen Keller, George Kennan, Samuel P. Langley, Guglielmo Marconi, Simon Newcomb, John Wesley Powell, Charles Sumner Tainter, and several presidents of the United States, including Ulysses S. Grant, Theodore Roosevelt, William H. Taft, and Woodrow Wilson.

The [Family Papers](#) series includes papers of Alexander Graham Bell's father, Alexander Melville Bell, a leader in the field of vocal physiology and elocution, and Mabel Gardiner Hubbard Bell's father, Gardiner Greene Hubbard, one of the founders of the telephone industry and the first president of the National Geographic Society. There is also a group of letters exchanged between Alexander Graham and Mabel Gardiner Hubbard Bell, 1875-1921. The Family Papers extend to many of Bell's descendants, including members of the Fairchild and Grosvenor families.

Additions made to the collection in 1981 and 1998 include correspondence and related papers of the Genealogical Record Office founded by Bell to study the impact of heredity on longevity. Also included are docket books of United States and British patents, published volumes of the *American Annals of the Deaf*, some of which were annotated by Alexander Graham Bell, correspondence of Mabel Gardiner Hubbard Bell and her daughter, Marian Fairchild, scrapbooks, and court proceedings of Bell patent litigation.

## Organization of the Papers

The collection is arranged in twelve series:

- Journals and Diaries, 1867-1910
