Scope and Content Note

The papers of Leonard F. Cushing (1901-1962) span the years 1794-1959, with the bulk of the material from 1926 to 1954. The papers consist of correspondence, blueprints, printed matter, newspaper clippings, and photographs. Most of the material relates to the restoration of the frigates *Constitution* and *Constellation*.

Much of the correspondence in the collection concerns Cushing's attempts to arouse public and congressional interest in restoring the frigates and his attempts to prove the authenticity of the *Constellation*. His testimony for its restoration before the Armed Services Committee of the House of Representatives on March 1, 1954, and his participation in the panel discussion on its authenticity on March 16, 1959, are documented. Correspondents include Robert H. Burgess, Garnett Laidlaw Eskew, Samuel N. Friedel, W. E. Howard, Jr., Fred C. Kilguss, Burton M. Parks, Leverett Saltonstall, Charles Scarlett, Russell M. Stephens, Donald Stewart, and J. R. Whittemore.

The blueprints in the collection include reproductions of the original full plans of the *Constellation* by Joshua Humphreys made in 1794 and the original drawing of the *Constitution* by Charles Ware made in 1817. Blueprints for the restoration of the *Constitution* are dated 1926-1931. For the *Constellation*, there are blueprints for restoration dated 1853, 1860, 1888, and 1948. There are also photographs showing the decaying condition of the frigates and photographs of the restored frigates. Newspaper clippings document the histories of the frigates, the controversy over the authenticity of the *Constellation*, and Cushing's transfer of the ship from Boston to Baltimore.
