The serials are periodicals with dates, and sometimes issue numbering, while the miscellaneous publications embraces a wide field of political tracts, single handout sheets, private letters, newspaper clippings, posters, etc.... Fourteen countries are represented with each having a section and an additional section for French Territories. There is also an Appendix for German language items addressed to German prisoners of war, and civilians living in the Reich. There is also a small handful of pro-Axis or collaborator publications. All items are arranged alphabetically by title. With the exception of the titles for the Greek Miscellaneous items, which are in English, all publications are entitled as found, with diacritics. Miscellaneous items are defined as follows: a one page work is a flyer, a two page work on one sheet is a leaflet, and anything of greater length is a pamphlet. Please note that there are links for periodical issues and miscellaneous pieces that are located in both the regular and oversize boxes. Part of the collection consists of reproduced materials. Only a few items are also held in the Library's general collection, and they are designated by LC call number.

Scope and Content Note

This compilation is an inventory of various underground publications produced by the anti-Axis resistance groups in either Germany or in German occupied European countries during the second World War. This collection lay in arrears in the custody of the Library of Congress Serial Records Division for many years, before it was transferred to the Library's Rare Book and

Special Collections Division. Most of the materials originated from countries within Europe with the exception of a single serial title from the Dutch East Indies, and a handful of titles from North African French administrative areas in Algeria and Morocco and the French territories of St. Pierre and Miquelon and the West Indies.

Each nation has its own particular story to tell: the forced deportation of French workers to Germany, the Italian partisan campaign against Mussolini, the Norwegian government in exile, the Warsaw Uprising, and considerable material about the Greek Civil War that broke out in 1944 between Communist and Papandreou forces after the Germans left Greece.

Although photo-reproduced items are mostly in good shape, any user of this collection should be cautioned in advance of the brittle and precarious condition of many of the original pieces, which due to wartime shortages were printed on cheap paper stock.
