PREFACE.

T being grown as unfashionable for a Book now to appear in publick without a Preface, as for a Lady to appear at a Ball without a Hoop-petticoat, I shall conform to Custom for Fashion's sake, and not thro' any Necessity. The Subject being both common and universal, needs no Arguments to introduce it, and being so necessary for the Gratification of the Appetite, stands in need of no Encomiums to allure Persons to the Practice of it; since there are but few now-a-days who love not good Eating and Drinking. Therefore I entirely quit those two Topicks; but having three or four Pages to be filled up, previous to the Subject it self, I shall employ them on a Subject I think new, and not yet handled by any
PREFACE.

any of the Pretenders to the Art of Cookery; and that is, The Antiquity of it; which, if it either instruct or divert, I shall be satisfied, if you are so.

COOKERY, Confectionary, &c. like all other Sciences and Arts, had their Infancy, and did not arrive at a State of Maturity but by slow Degrees, various Experiments, and a long Tract of Time: For in the Infant-Age of the World, when the new Inhabitants contented themselves with the simple Provision of Nature, viz. the Vegetable Diet, the Fruits and Productions of the teeming Ground, as they succeeded one another in their several peculiar Seasons, the Art of Cookery was unknown; Apples, Nuts, and Herbs were both Meat and Sauce, and Mankind stood in no need of any additional Sauces, Ragœs, &c. but a good Appetite; which a healthful and vigorous Constitution, a clear, wholesome, odoriferous Air, moderate Exercise, and an Exemption from anxious Cares, always supplied them with.

WE read of no palled Appetites, but such as proceeded from the Decays of Nature, by reason of an advanced old Age; but on the contrary, a craving Stomach, even upon a Death-bed, as in Isaac; nor no Sicknesses but those that were both the first
first and the last, which proceeded from the Struggles of Nature, which abhorred the Dissolution of Soul and Body; no Physicians to prescribe for the Sick, nor no Apothecaries to compound Medicines for two thousand Years and upwards. Food and Physick were then one and the same thing.

BUT when Men began to pass from a Vegetable to an Animal Diet, and feed on Flesh, Fowls, and Fish, then Seasonings grew necessary, both to render it more palatable and savoury, and also to preserve that Part which was not immediately spent from Stinking and Corruption: And probably Salt was the first Seasoning discover'd; for of Salt we read, Gen. xiv.

AND this seems to be necessary, especially for those who were advanced in Age, whose Palates, with their Bodies, had lost their Vigour as to Taste, whose digestive Faculty grew weak and impotent, and thence proceeded the Use of Soops and savoury Messes; so that Cookery then began to become a Science, though Luxury had not brought it to the height of an Art. Thus we read, that Jacob made such palatable Pottage, that Esau purchased a Mess of it at the extravagant Price of his Birthright. And Isaac, before by his Last Will and Testament he bequeathed his Blessing to his Son.
PREFACE.

Son Esau, required him to make some savoury Meat, such as his Soul loved, i. e. such as was relishable to his blunted Palate.

So that Seasonings of some Sort were then in Use; though whether they were Salt, savoury Herbs, or Roots only; or Spices, the Fruits of Trees, such as Pepper, Cloves, Nutmegs; Bark, as Cinnamon; Roots, as Ginger, &c. I shall not determine.

As for the Methods of the Cookery of those Times, Boiling or Stewing seems to have been the principal; Broiling or Roasting the next; besides which, I presume scarce any other were used for two thousand Years and more; for I remember no other in the History of Genesis.

That Esau was the first Cook, I shall not presume to assert; for Abraham gave Order to dress a Fatted Calf; but Esau is the first Person mentioned that made any Advances beyond plain Dressing, as Boiling, Roasting, &c. Fortho' we find indeed, that Rebeccah his Mother was accomplished with the Skill of making savoury Meat as well as he, yet whether he learned it from her, or she from him, is a Question too knotty for me to determine.
BUT Cookery did not long remain a simple Science, or a bare Piece of Housewifery or Family Oeconomy, but in process of Time, when Luxury enter’d the World, it grew to an Art, nay a Trade; for in 1 Sam. viij. 13. when the Israelites grew Fashionists, and would have a King, that they might be like the rest of their Neighbours, we read of Cooks, Confectioners, &c.

THIS Art being of universal Use, and in constant Practice, has been ever since upon the Improvement; and we may, I think, with good reason believe, is arrived at its greatest Height and Perfection, if it is not got beyond it, even to its Declension; for whatsoever new, upstart, out-of-the-way Messes some Humourists have invented, such as stuffing a roasted Leg of Mutton with pickled Herring, and the like, are only the Sallies of a capricious Appetite, and debauching rather than improving the Art itself.

THE Art of Cookery, &c. is indeed diversified according to the Diversity of Nations or Countries; and to treat of it in that Latitude would fill an unportable Volume, and rather confound than improve those that would accomplish themselves with it. I shall therefore confine what I have to communicate within the limits of Practicability and Usefulness, and so within the Compass of
P R E F A C E.

of a Manual, that shall neither burthen the Hands to hold, the Eyes in reading, nor the Mind in conceiving.

WHAT you will find in the following Sheets, are Directions generally for Dressing after the best, most natural, and wholesome Manner, such Provisions as are the Product of our own Country, and in such a Manner as is most agreeable to English Palates; saving that I have so far temporiz'd, as, since we have to our Disgrace so fondly admired the French Tongue, French Modes, and also French Messes, to present you now and then with such Receipts of French Cookery, as I think may not be disagreeable to English Palates.

THERE are indeed already in the World various Books that treat on this Subject, and which bear great Names, as Cooks to Kings, Princes, and Noblemen, and from which one might justly expect something more than many, if not most of these I have read, perform, but found myself deceived in my Expectations; for many of them to us are impracticable, others whimsical, others unpalatable, unless to depraved Palates, some unwholesome, many things copied from old Authors, and recommended without (as I am persuaded) the Copiers ever having had any Experience of the Palatableness, or
or had any Regard to the Wholesomeness of them: Which two Things ought to be the standing Rules, that no Pretenders to Cookery ought to deviate from. And I cannot but believe, that those celebrated Performers, notwithstanding all their Professions of having ingenuously communicated their Art, industriously concealed their best Receipts from the Publick.

BUT what I here present the World with, is the Product of my own Experience, and that for the Space of thirty Years and upwards, during which time, I have been constantly employed in fashionable and noble Families, in which the Provisions ordered according to the following Directions, have had the general Approbation of such as have been at many noble Entertainments.

These Receipts are all suitable to English Constitutions and English Palates, wholesome, toothsome, all practicable and easy to be performed. Here are those proper for a frugal, and also for a sumptuous Table, and, if rightly observed, will prevent the spoiling of many a good Dish of Meat, the Waste of many good Materials, the Vexation that frequently attends such Mismanagements, and the Curses not unfrequently besowed on Cooks with the usual Re-
Preface.

Reflection, That whereas God sends good Meat, the Devil sends Cooks.

As to those Parts that treat of Confectionary, Pickles, Cordials, English Wines, &c. what I have said in relation to Cookery is equally applicable to them also.

It is true, I have not been so numerous in Receipts as some who have gone before me; but I think I have made amends in giving none but what are approved and practicable, and fit either for a genteel or a noble Table; and although I have omitted odd and fantastical Messes, yet I have set down a considerable number of Receipts.

The Treatise is divided into ten Parts: Cookery contains above an hundred Receipts, Pickles fifty, Puddings above fifty, Pastry above forty, Cakes forty, Creams and Jellies above forty, Preserving an hundred, Made Wines forty, Cordial Waters and Powders above seventy, Medicines and Salves above two hundred: In all near eight hundred.

I Have likewise presented you with Schemes engraven on Copper-Plates for the regular Disposition or Placing the Dishes of Provision on the Table according to the best Manner,
Manner, both for Summer and Winter, first and second Courses, &c.

As for the Receipts for Medicines, Salves, Ointments, good in several Diseases, Wounds, Hurts, Bruises, Aches, Pains, &c. which amount to above two hundred, they are generally Family Receipts, that have never been made publick; excellent in their kind, and approved Remedies, which have not been obtained by me without much Difficulty; and of such Efficacy in Distempers, &c. to which they are appropriated, that they have cured when all other Means have failed; and a few of them which I have communicated to a Friend, have procured a very handsome Livelihood.

THET are very proper for those Generous, Charitable, and Christian Gentlewomen that have a Disposition to be serviceable to their poor Country Neighbours, labouring under any of the afflicted Circumstances mentioned; who by making the Medicines, and generously contributing as occasions offer, may help the Poor in their Afflictions, gain their Good-Will and Wishes, entitle themselves to their Blessings and Prayers, and also have the Pleasure of seeing the Good they do in this World, and have good Reason to hope for a Re-
PREFACE.

A Reward (though not by way of Merit) in the World to come.

AS the Whole of this Collection has cost me much Pains and a thirty Years diligent Application, and I have had Experience of their Use and Efficacy, I hope they will be as kindly accepted, as by me they are generously offered to the Publick: And if they prove to the Advantage of many, the End will be answered that is proposed by her that is ready to serve the Publick in what she may.

To make a Soup.

AKE a Leg of Beef, and boil it down with some Salt, a bundle of Sweet-herbs, an Onion, a few Cloves, a bit of Nutmeg; boil three gallons of Water to one; then take two or three pounds of lean Beef cut in thin slices; then put in your Stew-pan a piece of Butter, as big as an Egg, and flour it, and let the Pan be hot, and shake it till the Butter be brown; then lay your Beef in your Pan over a pretty quick Fire, cover it close, give it a turn now and then, and strain in your strong Broth, with an Anchovy or two, a handful of Spinage and En-
dive boiled green, and drained and shred gros; then have Pallets ready boiled and cut in pieces, and Toasts fry’d and cut like dice, and Forc’d-meat Balls fry’d: Take out the fry’d Beef, and put all the rest together with a little Pepper, and let it boil a quarter of an hour, and serve it up with a Knuckle of Veal, or a Fowl boiled, in the middle.

Another Gravy Soup.

TAKE a Leg of Beef, and a piece of the Neck, and boil it till you have all the goodness out of it; then strain it from the Meat; then take half a pound of fresh Butter, and put it in a Stew-pan and brown it; then put in an Onion stuck with Cloves, some Endive, Sellary and Spinage, and your strong Broth, and season it to your Palate with Salt, Pepper, and Spices; and let it boil together, and put in Chips of French Bread dried by the fire; and serve it up with a French Roll toasted in the middle.

To make Craw-fish or Lobster Soup.

TAKE Whittings, Flounders and Grigs, and put them in a gallon of Water, with Pepper, Salt, Cloves, Mace, a bunch of Sweet-herbs, a little Onion, and boil them to pieces, and strain them out of the Liquor; then take a large Carp, and cut off the Fish of one side of it, and put some Eel to it, and make Forc’d-meat of it, and lay it on the Carp as before; dredge grated Bread over it, and butter a Dish well, and put it in an Oven and bake it; then take an hundred of Craw-fish, break all the shells of the claws and tail, and take out the meat as whole as you can; then break all the shells small, and the spawn of a Lobster, and put them to the Soup, (and if you please some Gravy) and give them a boil together; and
and strain the liquor out into another Sauce-pan, with the tops of French Rolls dried and beat, and sifted, and give it a boil up to thicken; then brown some Butter, and put in your tails and claws of your Crawfish, and some of your Forc’d-meat made into Balls, and put your baked Carp in the middle of the dish, and pour your Soup on boiling hot, and your Crawfish or Lobster in it; garnish the dish with Lemon and scalded Greens.

**A Fasting-Day Soup.**

*AKE* Spinage, Sorrel, Chervil and Lettuce, and chop them a little; then brown some Butter, and put in your Herbs, keep them stirring that they do not burn; then have boiling Water over the fire, and put to it a very little Pepper, some Salt, a whole Onion stuck with Cloves, and a French Roll cut in slices and dried very hard, and some Pistachio kernels blanched and shread fine, and let all boil together; then beat up the yolks of eight Eggs with a little White-wine and the juice of a Lemon, and mix it with your Broth, and toast a whole French Roll, and put in the middle of your dish, and pour your Soup over it; garnish your dish with ten or twelve poached Eggs and scalded Spinage.

**Savoury Balls.**

*AKE* part of a Leg of Lamb or Veal and scrape it fine, with the same quantity of minc’d Beef-suet, a little lean Bacon, sweet herbs, a Shallot, and Anchovies, beat it in a Mortar till it is as smooth as Wax; season it with savoury Spice, and make it into little Balls.
The Compleat Housewife.

Another Way.

Take the Flesh of Fowl, Beef-fuet and
Marrow, the same quantity; six or eight
Oysters, lean Bacon, sweet herbs and savoury Spices; pound it, and make it into little Balls.

A Caudle for Sweet Pyes.

Take Sack and White-wine alike in quan-
tity, a little Verjuice and Sugar, boil it, and
brow it with two or three Eggs, as butter'd Ale; when the Pyes are baked, pour it in at the Funnel, and shake it together.

A Lear for savoury Pyes.

Take Claret, Gravy, Oyster Liquor, two
or three Anchovies, a faggot of sweet Herbs
and an Onion; boil it up and thicken it with
brown Butter; then pour it into your savoury
Pyes when called for.

A Ragoo for made Dishes.

Take Claret, Gravy, sweet Herbs, and sa-
voury Spice, tos up in it Lamb-stones,
Cock's-Combs, boiled, blanched and sliced, with
sliced Sweet-meats, Oysters, Mushrooms, Truffles,
and Murrels; thickenthese with brown Butter,
use it when called for.

To make Plumb-Porridge.

Take a Leg and Shin of Beef to ten gal-
ions of Water, boil it very tender, and
when the Broth is strong, strain it out, wipe the
Pot, and put in the Broth again; slice six Penny-
loaves thin, cutting off the top and bottom; put some
some of the liquor to it, cover it up, and let it stand a quarter of an hour, and then put it in your Pot, let it boil a quarter of an hour, then put in five pounds of Currants, let them boil a little, and put in five pounds of Raisins, and two pound of Prunes, and let them boil till they swell; then put in three quarters of an ounce of Mace, half an ounce of Cloves, two Nutmegs, all of them beat fine, and mix it with a little liquor cold, and put them in a very little while, and take off the Pot, and put in three pounds of Sugar, a little Salt, a quart of Sack, and a quart of Claret, the juice of two or three Lemons; you may thicken with Sagoe instead of Bread, if you please; pour them into earthen Pans, and keep them for use.

A Soop or Pottage.

TAKE several knuckles of Mutton, a knuckle of Veal, a Shin of Beef, and put to them twelve quarts of Water, cover the Pot close, and set it on the fire; let it not boil too fast; scum it well, and let it stand on the fire twenty-four hours; then strain it through a Colander, and when 'tis cold take off the Fat, and set it on the fire again, and season it with Salt, a few Cloves, Pepper, a blade of Mace, a Nutmeg quartered, a bunch of Sweet-herbs, and a pint of Gravy; let all these boil up for half an hour, and then strain it, put Spinage, Sorrel, green Peas, Asparagus, or Artichoke-bottom, according to the time of year; then thicken it up with the yolks of three or four Eggs; have in readiness some Sheep's Tongues, Cox-combs, and Sweetbreads sliced thin and fried, and put them in, and some Mushrooms, and French bread dried and cut in little bits, some Forc'd-meat Balls, and some very thin slices of Bacon; make all these very hot, and garnish the dish with Coleworts and Spinage scalded green.
The Compleat Housewife.

To make Peas-Pottage.

TAKE a quart of white Peas, a piece of Neck-beef, and four quarts of fair Water, and boil them till they are all to pieces, then strain them through a Colander; then take an handful or two of Spinage, a top or two of young Coleworts, and a very small Leek; shred the Herbs a little, and put them into a Frying-pan, or Stew-pan, with three quarters of a pound of fresh Butter, but the Butter must be very hot before you put in your Herbs; let them fry a little while, then put in your liquor, and two or three Anchovies, some Salt and Pepper to your taste, a sprig of Mint rubb'd in small, and let all boil together till you think it is thick enough; then have in readiness some Forc'd-meat, and make three or fourscore Balls, about the bigness of large Peas, fry them brown, and put them in the dish you serve it in, and fry some thin slices of Bacon, put some in the dish and some on the brim of the dish, with scalded Spinage; fry some Toasts after the Balls brown and hard, and break them into the Dish; then pour your Pottage over all, and serve to the Table.

To make strong Broth to keep for Use.

TAKE part of a Leg of Beef, and the Scrag-end of a Neck of Mutton, and break the Bones in pieces, and put to it as much Water as will cover it, and a little Salt; and when it boils, scum it clean, and put into it a whole Onion stuck with Cloves, a bunch of Sweet-herbs, some Pepper, a Nutmeg quartered; let these boil till the Meat is boiled in pieces, and the strength boiled out of it; then put to it two or three Anchovies, and when they are dissolved, strain it out; and keep it for any sort of Hash or Fricasy.
To make Forc'd Meat.

Take part of a Leg of Mutton, Veal or Beef, and pick off the Skins and Fat, and to every pound of Meat put two pounds of Beef-suet; shred them together very fine, then season it with Pepper, Salt, Cloves, Mace, Nutmeg, and Sage; then put all into a stone Mortar, and to every two pounds of Meat put half a pint of Oysters and six Eggs well beaten; then mix them all together, and beat it very well; then keep it in an earthen Pot for your use; put a little Flour on the top, and when you roll them up flour your Hands.

A Lamb Pye.

Cut a hind quarter of Lamb into thin slices; season it with sweet Spices, and lay it in the Pye, mix'd with half a pound of Raisins of the Sun stoned, half a pound of Currants, 2 or 3 Spanish Potatoes boil'd, blanch'd, and sliced; or an Artichoke bottom or two, with Prunella's, Damsons, Gooseberries, Grapes, Citron and Lemon Chips: Lay on Butter, and close the Pye; when 'tis baked make a Caudle for it.

A Chicken Pye.

Take small Chickens; roll up a piece of Butter in sweet Spice, and put it into them; then season them, and lay them in the Pye, with the Marrow of two Bones, with Fruit and Preserves, as the Lamb Pye, with a Caudle.

A Lumber Pye.

Take a pound and a half of a Fillet of Veal, and mince it with the same quantity of Beef Suet.
Suet, season it with sweet Spice, five Pippins, an handful of Spinage, and an hard Lettuce, Thyme and Parsley: Mix it with a penny grated white Loaf, the yolks of Eggs, Sack and Orange-flower Water, a pound and an half of Currants and Preferves, as the Lamb Pye, with a Caudle. An Humble Pye is made the same way.

*An Lamb Pye.*

Cut a hind quarter of Lamb into thin slices; season it with savoury Spice, and lay them in the Pye with an hard Lettuce, and Artichoke bottoms, the tops of an hundred of Asparagus: Lay on Butter, and close the Pye. When it is bak'd, pour into it a Lear.

*An Mutton Pye.*

Season your Mutton-stakes with savoury Spice; fill the Pye, lay on the Butter, and close the Pye: When it is baked, toss up a handful of chopp’d Capers, Cucumbers and Oyters, in Gravy, an Anchovy, and drawn Butter.

*An Pigeon Pye.*

Truss and season your Pigeons with savoury Spice, lard them with Bacon, and stuff them with Forc’d-meat, and lay them in the Pye with the Ingredients for savoury Pyes, with Butter, and close the Pye. A Lear. A Chicken or Capon Pye is made the same way.

*An Battalia Pye.*

Take four small Chickens, four squab Pigeons, four sucking Rabbets; cut them in pieces, season them with savoury Spice, and lay ’em in
in the Pye, with four Sweet-breads sliced, and as many Sheep's-tongues, two shiver'd Palates, two pair of Lamb-bones, twenty or thirty Coxcombs, with favoury Balls and Oysters. Lay on Butter, and close the Pye. A Lear.

A Neats-Tongue Pye.

HALF boil the Tongues, blanch and slice them; season them with favoury Spice, with Balls, sliced Lemon and Butter, and close the Pye. When it is bak'd, pour into it a Ragoo.

To pickle Oysters.

TAKE a quart of Oysters, and wash them in their own Liquor very well, till all the grittiness is out; put them in a Sauce-pan or Stew-pan, and strain the Liquor over them, set them on the fire, and scum them; then put in three or four blades of Mace, a spoonful of whole Pepper-corns; when you think they are boiled enough, throw in a glass of White-wine; Let them have a thorough scald; then take them up, and when they are cold, put them in a Pot, and pour the Liquor over them, and keep them for use. Take them out with a Spoon.

To collar Eels.

TAKE your Eel and cut it open; take out the Bones, and cut off the Head and Tail, and lay the Eel flat on a Dreffer, and shred Sage as fine as possible, and mix it with black Pepper beat, Nutmeg grated, and Salt, and lay it all over the Eel, and roll it up hard in little Cloths, and tye it up tight at each end; then set over some Water with Pepper and Salt, five or six Cloves, three
three or four blades of Mace, a Bay-leaf or two; boil it and the Bones and Head and Tail well together; then take out the Head and Tail, and put it away, and put in your Eels, and let them boil till they are tender; then take them out of the Liquor, and boil the Liquor longer; then take it off, and when ’tis cold, put it to your Eels, but do not take off the little Cloths till you use them.

To pot Lobsters.

TAKE a dozen of large Lobsters; take out all the Meat of their Tails and Claws after they are boil’d; then season them with beaten Pepper, Salt, Cloves, Mace, and Nutmeg, all finely beaten and mix’d together; then take a Pot, put therein a layer of fresh Butter, upon which put a layer of Lobster, and then strew over some Seasoning, and repeat the same till your Pot is full, and your Lobster all in; bake it about an hour and half, then set it by two or three days, and it will be fit to eat. It will keep a Month or more, if you pour from it the Liquor when it comes out of the Oven, and fill it up with clarified Butter. Eat it with Vinegar.

Hung Beef.

MAKE a strong Brine with Bay-falt, and Pe-tre-falt, and Pump-water, and steep therein a Rib of Beef for nine days; then hang it up in a Chimney where Wood or Saw-dust is burnt; when ’tis a little dry, wash the out-side with Blood two or three times, to make it look black, and when ’tis dried enough, boil it for use.

To roast a Cod’s Head.

TAKE the Head, wash and scour it very clean, then scotch it with a Knife, and strew a little

Give a spoonful to a young Person, with as much Cream of Tartar as will lie on a Threepence, to one that is older two spoonfuls, and Cream of Tartar accordingly.

**For a Rheumatism.**

Let the Party take of the finest glazed Gun-powder as much as a large Thimble may hold, wet it in a Spoon with Milk from the Cow, and drink a good half pint of warm Milk after it; be covered warm in Bed and sweat. Give it fasting about seven in the Morning, and take this nine or ten Mornings together.

When 'tis cold, scum off the Butter and melt it, and put it in a Gallipot for use. The Liquor is very good to dip Flannels into, and bathe any green Bruise or Ache as hot as can be born.

A good Vomit.

TAKE two ounces of the finest white Allum, beat it small, put it into better than half a pint of new Milk, let it on a slow fire till the Milk is turn'd clear; let it stand a quarter of an Hour, strain it off, and drink it just warm. Or else take half a dram of Hipococuana, and Carduus Tea with it.

TAKE one pound of May Butter without Salt, out of the Churn, a pint of Ale not too stale, a good handful of green Wormwood; let the Ale be hot, and put in the Butter to melt, shred the Wormwood, and let them boil together till it turns green; strain it, and when 'tis cold take the Ointment from the Dregs.

To cure the Piles.

TAKE two pennyworth of Litharge of Gold, one ounce of Sallet Oil, one spoonful of White-wine Vinegar; put all into a new Gallipot, beat it together with a Knife till 'tis as thick as an Ointment: spread it on a Cloth and apply it to the place; if inward, put it up as far as you can.

To make the Teeth white.

TAKE three spoonfuls of Celandine, nine spoonfuls of Honey, half a spoonful of burnt Allum; mix these together and rub the Teeth with it.

A Powder for the Teeth.

HALF an ounce of Cream of Tartar, and a quarter of an ounce of Powder of Myrrh; rub the Teeth with it two or three times a Week.

be melted; and powder what is to be powdered, and sift it fine; then boil them, and strain them thro' a Canvas Bag into a Pottle of White-wine; then boil the Wine with the Ingredients an hour with a gentle fire, and let it stand till 'tis no hotter than Blood; then put to it two drams of Camphire, and two ounces of Venice Turpentine, and stir it constantly till 'tis cold. Be sure your Stuff be no hotter than Blood when you put in your Camphire and Turpentine, otherwise 'tis spoil'd; make it up in Rolls and keep it for use. 'Tis the best Salve made.

To cure an Ague.

TAKE Tobacco Dust and Soot an equal quantity, and 9 Cloves of Garlick; beat it well together, and mix it with Soap into a pretty stiff Paste, and make two Cakes something broader than a 5 Shilling piece, and something thicker; lay it on the inside of each Wrist, and bind it on with Rags. Put it on an hour before the Fit is expected. If it does not do the first time, in three or four Days repeat it with fresh.

To take out the Redness and Scurf after the Small-pox.

AFTER the first Scabs are well off, anoint the Face going to Bed with the following Ointment. Beat common Allum very fine, and sift it thro' a lawn Sieve, and mix it with Oil, like a thick Cream, and lay it all over the Face with a Feather; in the Morning, have Bran boiled in Water till 'tis slippery, then wash it off as hot as you can bear it. So do for a Month or more as there is Occasion.
To make Brimstone-Lozenges for a short Breath.

Take of Brimstone-flour and double-refin'd Sugar beaten and sifted an equal quantity; make it in Lozenges with Gum-dragon steep'd in Rose-water; dry them in the Sun, and take three or four a Day.

For a Burn.

Take common Allum, beat and sift it, and beat it up with whites of Eggs to a Curd; then with a Feather anoint the Place. It will cure without any other thing.

To procure the Menses.

Take a quarter of an ounce of pure Myrrh made into fine Powder; mix it with three quarters of an ounce of Conserve of Bugloss-flowers; two Days before your Expectation take this quantity at four times, laft at Night, and first in the Morning; drink after each time a Draught of Poffet-drink made of Ale, White-wine and Milk, and boil in it some Pennyroyal, and a few Camomile Flowers.

To stop Flooding.

Dissolve a quarter of an ounce of Venice-Treacle in four spoonfuls of Water, and drop in it thirty or forty of Jones's Drops. Take it when occasion requires, especially in Child-bed.
To provoke Urine presently when stopped.

In a quart of Beer boil a handful of the Berries of Eglantine till it comes to a pint; drink it off lukewarm.

To draw up the Uvula.

Take Ground-Ivy and heat it well between two Tiles, and lay it as warm as can be born on the top of the Head.

The Blood of a Hare, dri'd and drank in Red-wine, does stop the Bloody-Flux, or any Lait, tho' never so severe.

For a Thrush in Childrens Mouths.

Take a hot Sea-Coal, and quench it in as much Spring-water as will cover the Coal; wash it with this five or six times a day.

For the Worms in Children.

Take of Mithridate and Honey, of each a Pennyworth, Oil of Mace 2 Pennyworth; melt them together, and spread upon Leather cut in the Shape of an Heart; Oil of Savin and Wormwood, of each six drops, of Aloes and Saffron in Powder, of each one dram; rub the Oils and strew the Powders all over the Plaister; apply it, being warm'd, to the Child's Stomach, with the Point upwards.

For a Weakness in the Back or Reins.

Take an ounce of Venice Turpentine, wash it in red Rose-water, work it in the Water till it is white, pour the Water from it, and work Y 3 it
it up into Pills with Powder of Turmeric, and
one grated Nutmeg; you may put a little Rhubarb as you see occasion. Take three in the
Morning, and three in the Evening, in a little
Syrup of Elder.

For the yellow Jaundice.

TAKE a handful of Burdock-roots, cut them
in Slices to the Cores, and dry them; half a
handful of the inner Rind of Barberries, three
Races of Turmeric beat very fine, three or four
Tabes of the whitest Goose-dung; put all in a
quart of strong Beer, cover it close, and let it in-
fuse in the Embers all Night; in the Morning
strain it off; add to it a Groat's worth of Saffron.
Take half a pint at a time, first and last. It must
be a handful of Dock-roots when dry.

An approved Remedy for a Cancer in
the Breast.

TAKE of the hard Knobs or Warts which
grow on the Legs of a Stone-Horse, dry
them carefully, and powder them; give from 1
scruple to half a dram, every Morning and Even-
ing in a Glass of Sack. You must continue tak-
ing them for a Month or six Weeks, or longer,
if the Cancer is far gone.

An approved Medicine for the Stone.

TAKE six pounds of black Cherries, stamp
them in a Mortar till the Kernels are bruised;
then take of the Powder of Amber, and of Coral
prepared, of each 2 ounces; put them with the
Cherries into a Still, and with a gentle Fire draw
off the Water, which, if you take for the Stone,
mix a dram of the Powder of Amber with a spoon-
ful of it, drinking three or four spoonfuls after it; if for the Palsy or Convulsion, take four spoonfuls, without adding any thing, in the Morning fasting.

To give Ease in Fits of the Stone, and to cure the Suppression of Urine, which usually attends them.

TAKE of Snail’s-Shells and Bees, of each an equal quantity, dry them in an Oven with a moderate Heat, then beat them to a very fine Powder, of which give as much as will lie upon a Six-pence in a quarter of a pint of Bean-flower-water, every Morning, fasting two hours after it; continue this for three days together. This has been often found to break the Stone, and to force a speedy Passage for the Urine.
Directions for Painting Rooms or Pales.

The Price of the Materials.

\text{One Hundred Weight of red Lead} & 00 & 18 & 0 \\
\text{One Hundred Weight of white Lead} & 01 & 02 & 0 \\
\text{Linseed Oil by the Gallon} & 00 & 03 & 2 \\
\text{A small quantity of Oil of Turpentine is sufficient.} & & & \\
\end{array}
\]

The red Lead must be ground with Linseed Oil, and may be used very thin, it being the priming or first colouring; when 'tis used, some drying Oil must be put to it.

To prepare the drying Oil,

Take two quarts of Linseed Oil, put it in a Skillet or Sauce-pan, and put to it a pound of burnt Amber; boil it for two hours gently; prepare this without Doors for fear of endangering the House; let it settle, and it will be fit for use; pour the clear off, and use that with the white Lead, the Lees or Dregs being as good to be used with the red Lead.
For the second priming.

Take a Hundred Weight of white Lead with an equal quantity of Whiting in bulk, but not in weight; grind them together with Linseed Oil pretty stiff, when 'tis used, put to it some of the drying Oil above-mentioned, with a small quantity of Oil of Turpentine. This is not to be laid on till the first priming is very dry.

To prepare the Putty or Paste to stop all joints in the Pales or Wood, that no Water may soak in.

Take a quantity of Whiting, and mix it very stiff with Linseed-Oil, and drying Oil, of each an equal quantity; when 'tis so stiff it cannot be wrought by the Hand, more Whiting must be added and beat up with a Mallet till 'tis stiffer than Dough; when your second priming is dry, stop such Places as require with this Putty, and when the Putty is skinn'd over, that is, the outside dry, then proceed and lay on the last Paint, which is thus to be prepared.

Take of the best white Lead, grind it very stiff with Linseed-Oil, and when 'tis used put to it some of the drying Oil, and some Oil of Turpentine. Thus will the Work be finished to great Satisfaction; for it will be more clean and more durable than it can be performed by a House-Painter, without you pay considerably more than the common Rates. Repeat this last Preparation once in five Years, and it will preserve any Out-works that are exposed to the Weather, time out of Mind. But for Rooms or Places within Doors, proceed thus. 

The
The Wainscot Colour for Rooms.

When you mix your last Paint, add to your white Lead a small quantity of yellow Oaker, and use it as above directed. 'Tis now the universal fashion to paint all Rooms of a plain Wainscot Colour; and if it should alter, 'tis but mixing any other Colour with the white Lead instead of yellow Oaker. There must be bought six Chamber-Pots of Earth, and six Brushes, and keep them to what they belong to.

To make yellow Varnish.

Take one quart of Spirit of Wine, and seven ounces of Seed-Lake, half an ounce of Sandarack, a quarter of an ounce of Gum-Anime, and one dram of Mastic. Let these infuse for 36 or 40 hours, strain it off, and keep it for use. 'Tis good for Frames of Chairs, or Tables, or any thing black or brown; do it on with a Brush three or four times, nine times if you polish it afterwards, and a day between every doing: Lay it very thin the first and second time, afterwards something thicker.

To make white Varnish.

To one quart of Spirit of Wine take eight ounces of Sandarack well wash'd in Spirit of Wine, that Spirit of Wine will make the yellow Varnish; then add to it a quarter of an ounce of Gum-Anime well pick'd, half an ounce of Camphire, and one dram of Mastic; steep this as long as the yellow Varnish, then strain it out and keep it for use.
To boil Plate.

TAKE twelve gallons of Water, or a quantity according to your Plate in Largeness or Quantity; there must be Water enough to cover it. Put the Water in a Copper or large Kettle, and when it boils put in half a pound of red Argil, a pound of common Salt, an ounce of Roch-Allum; first put your Plate into a Charcoal fire, and cover it till 'tis red hot; then throw it into your Copper, and let it boil half an hour; then take it out and wash it in cold fair Water, and set it before the Charcoal Fire till 'tis very dry.

For a Bite of a mad Dog: It has cured when the Person was disordered, and the Salt Water failed.

TAKE of Turmentil-roots one ounce, Asaechoetida as much as a Bean, Caster four pennyworth, Lignum-Aloes two pennyworth; steep these in Milk twelve hours; boil the Milk and drink it fasting before the Change or Full Moon, or as oft as Occasion.

An excellent Way of washing, to save Soap, and whiten Cloaths.

TAKE a Butter-Tub, or one of that Size, and with a Gimlet bore Holes in it about half way; then put into your Tub some clean Straw, and over that about a peck of Wood-Ashes; then fill it with cold Water, and set it in another Vessel to receive that Water as it runs out of the Holes of the Tub: If 'tis too strong a Lye, add to it some warm Water, and then wash your Linen in it slightly, soaping the Cloths before you wash.
wash them: two pound of Soap will go as far as six pound, and make the Cloths whiter and cleaner, when they by Experience have got the right way. If 'tis too strong for the Hands, make it weaker with Water.

To take Mildew out of Linnen.

TAKE Soap and rub it on very well; then scrape Chalk very fine, and rub that in well, and lay in on the Grafs, and as it dries, wet it a little, and at once or twice doing it will come out.

FINISH.
