A Piano of the Highest Artistic Class

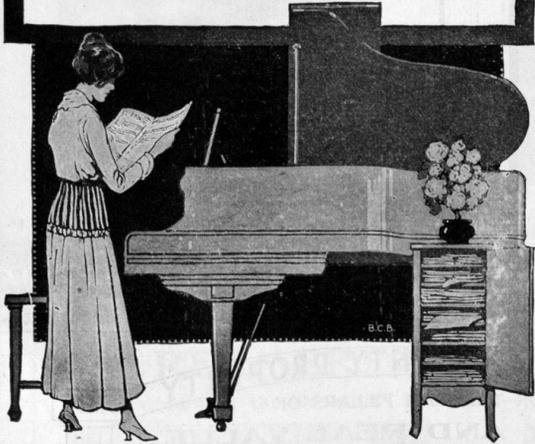

For the successful interpretation of good music a piano above the average is essential. The purity of tone, the perfection of every detail, the assurance of dependability, are to be carefully considered.

Wissner Pianos have been used for over a generation by artists of note, who select them for just these characteristics.

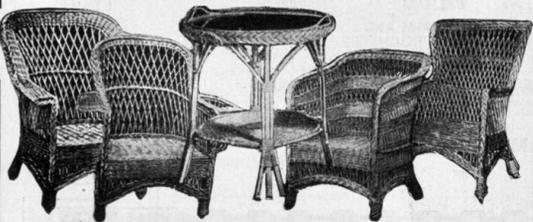

You will be welcome at our showrooms whether or not you wish to purchase.

HOUSEHOLD AIDS THAT HAVE BEEN TESTED AND ENDORSED

AN ACCURATE SCALE SUITABLE FOR KITCHEN USE.—The Chastillon Red Scale, made by John Chastillon & Sons, 87 Cliff Street, New York, is a spring balance scale approved by the New York City Department of Weights and Measures, and our own testing proves its accuracy in weighing. In the center of the dial is a red disk encircled with a broad white border, on which the ounces and fractional pounds and graduations are clearly defined. The scale is made in a number of styles and ranging from ten to twenty pounds capacity by one-half to one ounce divisions. The pan of the scale illustrated can be turned in a vertical position and hung against the wall when not in use. Price \$2.00 to \$3.00.

AN EFFICIENT POT AND PAN CLEANER.—The Mystic Mit, made by the Mystic Mit Co., 127 Duane St., N. Y., may be mystic in its origin, but is most practical in its usefulness. It will clean anything that is cleanable from pots and kettles to the kitchen table, and is safe on almost any surface except either fine enamel or aluminum. It is simply a pot cleaner made to be slipped over the hand, and its component parts are soft white twine twisted in with fine copper strands and so woven that all the abrasive qualities are on the outside. Price 10 cents.

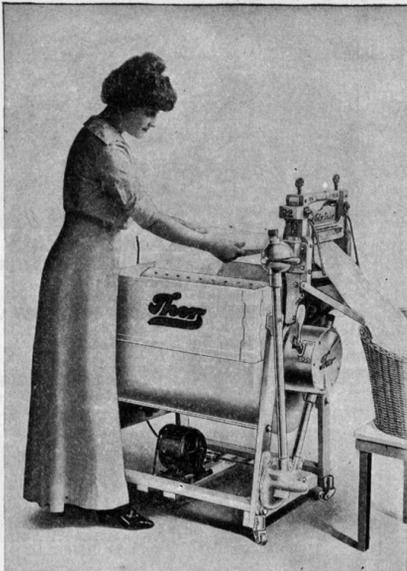

CONVENIENTLY SUPPLIES AN ABUNDANCE OF HOT WATER.—The Holyoke Kerosene Tank Water Heater, made by the Holyoke Heater Company, Holyoke, Mass., can be attached to the ordinary boiler or tank of any circulating water system. It is simple to connect and is especially useful in country houses where gas is not available. Kerosene is the fuel used, and the shell of the heater, the coils and the blue flame burner are assembled in one unit. By accurate test this useful contrivance heated the contents of a thirty gallon boiler to an average temperature of 140 degrees Fahrenheit in two and one-half hours, consuming two-thirds of a pint of oil each hour. This would mean an abundance of hot water for domestic use at a reasonable expense. Price \$20.

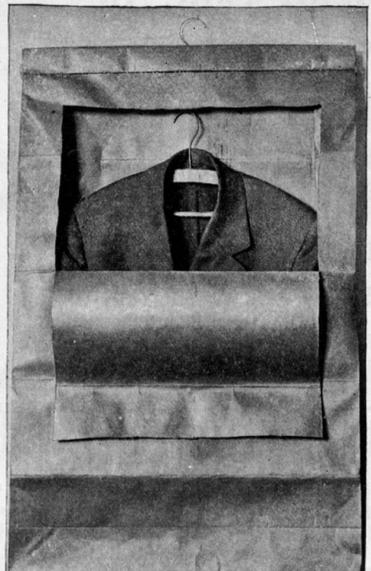

PREVENTS OVERCOOKED FOOD OR TARDINESS.—The 24-Hour Wizard Alarm Clock, made by Yankee Wizard Clock Co., 18 Broadway, New York, is an alarm clock that can be set to ring either loudly or softly according to need. It will alarm at any minute of the hour and at any hour out of the twelve. This accuracy is made possible by the move-

able rim around the face. The illustration shows the alarm set to ring in nine minutes. The office man can be reminded of an appointment; the commuter can catch his train, and the cook can boil eggs to exactly the right degree by aid of this alarm clock, which is as exact and as relentless in its reminding as a New England conscience. Price \$3.50.

A SAFETY-FIRST ELECTRIC CLOTHES WASHER.—The Thor Electric Home Washing Machine No. 25, made by the Hurley Machine Company, New York and Chicago. This electric washer is warranted to overcome what had hitherto been the defects in such machines. It is provided with a protective device which automatically prevents the motor being overloaded or burned out, and its reversible 11-inch roll wringer is equipped with a safety guard. The machine itself is built on the reversing cylinder principle, the cylinder containing the clothes being revolved first in one direction and then in the other, so that the suds are flushed back and forth through the fabric, thoroughly cleansing it. Tests have proven that the machine is simple to use, requires no attention after starting and produce excellent results at a cost of 1 1/2 to 2 cents an hour for electricity. Price \$90.

A PROTECTIVE CONTAINER FOR WOOLLY GARMENTS.—White Tar Moth Bags, made by the White Tar Company, 109 John St., New York, seem to be the last word in preparedness against the moths and dust that corrupt the furs and woolen goods which weigh so heavily on the housewife's mind each spring. The garments may be hung up inside and the whole bag hermetically sealed against air, dust and insects. The bags are made in four sizes, ranging from 24 to 30 inches wide and 37 to 70 inches long, and there are four varieties, Fine Tar, Cedar, Lavender and Odorous. The prices range from 50 cents to \$2.00.

AT YOUR SERVICE

These are some of the articles tested by The Tribune Institute and endorsed as being fully up to the claims of the manufacturer in that they will perform satisfactorily the service for which they are intended. All manner of household implements are sent in by manufacturers to The Tribune Institute, where they are given a thorough test, sometimes extending over several weeks, after which they are returned to the maker.

If they have passed satisfactorily both the engineering and the practical tests, they receive our endorsement and the manufacturer is entitled to associate the Tribune Institute Certificate of Approval with his advertising, and to stamp its Seal upon his product.

The housewife may be sure that any household implement showing this certificate and seal is worth buying, for it will do all that is claimed for it. The service of The Tribune Institute is placed at the disposal of both merchant and housewife absolutely free of charge. This is the first time such a service has been extended to newspaper readers and, considering the advertising and merchandising standards which are associated with The New York Tribune, can you think of a mark of approval carrying more weight than the stamp of this testing laboratory?

Details of the work done by The Tribune Institute will be found on page 6 of Part IV in to-day's Tribune.

It Is Moisture That Spoils Food!

Beware of wet bottles and dishes, dripping fruit and soggy food in your refrigerator!

That soggy, smudgy dampness you may have noticed on fruit, bottles, etc., in your refrigerator is laden with impurities and germs from the air and the melting ice. To prove this, just wipe off a bottle with a clean cloth. This smudge settles on the open food as willingly as upon the bottles, and it is this impure moisture that spoils the food. You can strike a phosphorus match on the inside of the ice chamber in a

BOHN SYPHON REFRIGERATOR

You can keep salt and soda crackers as dry as a chip—you can place onions and butter aside by side without transmitting a trace of their odors. No other refrigerator could stand such tests. The perfect refrigerator must have rapid circulation of pure, cold, dry air. Do you prefer this kind, or the ordinary "swampy" variety which is always plastering your food with smudgy moisture?

The style illustrated above, Model No. 43, 39x22x50 inches, 125 lbs. ice capacity, is our most popular model. Regular list price, \$48.00; now specially priced at \$45.00. The many other styles are also marked at attractive prices. There are Porcelain Lined Bohn Refrigerators from \$18.50 up. Call and see our argo line, in both wood and white porcelain exteriors. If you cannot call write for our handsome catalog. We are the manufacturers, not middlemen.

WHITE ENAMEL REFRIGERATOR CO., of New York, 53 West 42d Street. Telephone Bryant 7317.
