Onions and Butter Side by Side!

Try it in your Refrigerator Does the butter taste and smell sweet when you take it out? It will be, if you have a BOHN SYPHON REFRIGERATOR

BOHN SYPHON REFRIGERATOR

Perfect refrigeration requires rapid circulation of pure, cold, dry air. The Bohn Siphon System causes the air to pass over the ice at frequent intervals. This is why the temperature stays at 40° and why no moisture is deposited upon the food. It is moisture that causes food flavors to mix. In a Bohn Siphon Refrigerator everything is so dry that you can strike it with a match, any length of time. You do not get that in your refrigerator? The Bohn "Flaxinium" insulation is the greatest heat-resisting lining ever put into a refrigerator. Bohn superiority is so generally recognized that practically every refrigerator and dining car in use is equipped with the Bohn Siphon. The car builders have studied the facts—they know! Model No. 43, Style A, (Illustrated above), size 30x21x35 inches, ice capacity 125 pounds, price \$69. Is an exceptional value. Our very large line of Refrigerators meets every requirement of both size and price. Call or write for illustrated catalog. We are the manufacturers, not middlemen.

THE NEW PHONOGRAPH

A good phonographic reproduction can be had only through the use of the PATHÉ unwearable Sapphire Ball. Above are shown the two means of reproducing the sounds. The first is a sapphire of round shape, the other a sharp-pointed needle. Imagine these two ends rubbing on a surface of only moderate hardness. Which one will scratch that surface?
