Most women wear their heels down—either on the inside or outside—within a week.

French heels with invisible shock absorbers—the new "Louis" rubber heel.

Right on your heel

That is where the full force of your step comes. That is why your leather heels run down so quickly. This wearing down of leather heels within one week shows the impact of your hard leather heels on still harder pavements. These constant shocks, coming directly on your heels, are communicated to your spine and constantly dissipate your energy. Avoid fatigue. Guard your every step. O'Sullivan's Rubber Heels are one of the most important of modern devices to make life smoother, more efficient. They are a recognized factor in conserving energy. 700,000 New Yorkers already wear them.

O'Sullivan's new Louis Rubber Heel

So many women want to add O'Sullivan's Heels of New Live Rubber to their dancing slippers and dress shoes, as well as walking boots, that we now make the Louis XIV heel shown below. You can get this heel everywhere in tan, white and black or dyed any color to order to match any slipper. 50c attached.

Be sure you get O'Sullivan's—they are made of new live rubber, rubber with all the spring in it.

One of the largest department stores abroad in one of its recent announcements says:

"There are hundreds of ladies throughout our country whose thanks have been given freely to the great American house—Julius Kayser & Co.—in acknowledgment of many hours of delightful comfort experienced by wearing their famous Silk Gloves. Kayser Silk Gloves should be favoured because they are the result of thirty years' experience in perfect glove-making, and possess every attribute demanded by fashion, taste and economy."

Kayser Silk Gloves cost no more than the ordinary kind: two clasped gloves are always 50c, 75c, \$1.00, \$1.25 and up; twelve and sixteen button lengths are always 75c, \$1.00, \$1.25, \$1.50 and up. The name "Kayser" is in the hem and with each pair is a guarantee ticket that the tips will outwear the gloves.
