Noted sportsman gives 50 friends a new kind of Christmas gift

The new vacuum bottle that will not break

It will not break

LAST year a famous American polo player bought a new vacuum bottle.

Accidentally he dropped it on the floor. He picked it up—expecting to find it broken. ***But it was unharmed.*** It was not lined with fragile glass like the old-fashioned bottles—but made of steel throughout.

It was a new invention for keeping liquids hot or cold—the Stanley Ferrostat Vacuum Bottle.

This sportsman was so much delighted with this proof of its durability that he immediately bought fifty Stanley Vacuum Bottles to give to his friends for Christmas. He knew that the ***unbreakable*** bottle would be a surprise and a pleasure to every one of them.

How the Stanley Vacuum Bottle is made

The Stanley Bottle consists of two shells made from high grade steel, a specially insulated vacuum space separating the outer shell from the inner container.

The two, connected by welded joints, form a single steel unit of great strength.

Every Stanley is lined with blue Amalite, a flexible material with a surface like porcelain. Absolutely no glass or any fragile material is used in the construction of the bottle.

Its first cost is the last cost

The invention of the Stanley Vacuum Bottle puts an end to the many annoyances of the ordinary glass vacuum bottle. It eliminates the broken glass nuisance, the expense of refills, the many inconveniences.

There is no cost of upkeep or refills with the Stanley—the first cost is the last cost.

Naturally the initial cost of the Stanley is higher than the glass vacuum bottle, but in the end the Stanley is the most economical.

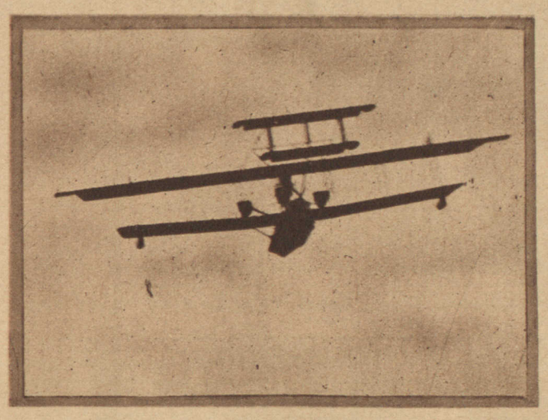
Stanley Vacuum Bottles come in one and two quart sizes, in a rich black finish. They are guaranteed not only against breakage, but to maintain their high efficiency as temperature retainers.

The Stanley is the only vacuum bottle made in two quart sizes.

Over 70,000 Stanley Vacuum Bottles are already in use in all kinds of climates under all sorts of conditions.

An ideal Christmas gift

Put the Stanley Ferrostat Vacuum Bottle first on your shopping list—it's the gift that will be appreciated the year round. Sold by the best department, drug, sporting, hardware, jewelry and automobile accessory stores. Get a Stanley Vacuum Bottle from your dealer today. Stanley Insulating Company, 43 Exchange Place, New York.



The NC-4 and all the overseas planes carried Stanley Vacuum Bottles.

The U. S. Navy, after characteristically thorough tests, adopted this new steel vacuum bottle because it will not break and because it is thoroughly efficient.

Even if it falls off the table or from an upstairs window, the Stanley Vacuum Bottle will not break.
